STATE COLLEGE

OFFERS EXCEPTIONAL ADVANTAGES.

# TUITION IS FREE IN ALL COURSES.

TAKING EFFECT IN SEPT. 1900, the General Courses have been extensively modified, so as to furnish a much more varied range of electives, after the Freshman year, than heretofore, including History; the English, French, German, Spanish, Latin and Greek Languages and Literatures; Psychology; Ethics, Pedagogies, and Political Science. These courses are especially adapted to the wants of those who seek either the most thorough training for the Profession of Teaching, or a general College Education.

The courses in Chemistry, Civil, Electrical, Mechanical and Mining Engineering are among the very best in the United States. Graduates have no difficulty in securing and holding positions.

YOUNG WOMEN are admitted to all courses on the same terms as Young Men.

THE FALL SESSION opens Sepember 12th, 1900.

When Williamsport Dickinson Seminary was founded, money making was not in the thought of its promotors. #### Man Leaps Into A Thresher.

CABOOL, Mo., July 19.—Lee Simmons, son of J. R. Simmons of 10 miles north of this place, committed suicide this morning by jumping headforemost into the mouth of a steam threshing machine while it was in full motion. He prepared for the act by giving his pocketbook and keys to his brother, but told nothing of his intentions.

A few moments before his leap into the grinding mouth of the machine he asked a workman what the result would be should he jump into it. He was told that it meant instant death, and was asked if he contemplated such a thing. He gave an insignificant answer.

After sitting about the machine, he volunteered to feed, and cautioned his brother, who was running the engine, to give it full speed. He held the wheat sack until the machine was at full speed, then jumped into the cylinder headlong.

The back part of the skull was torn off, exposing the brain. His body was pulled out before it was badly mangled. He was about 21 years old and single.

men who did come. Canon Petit said that in the morning there was really a remarkable cure. He said a child was brought in by its mother. On one side of its legs it wore an iron brace. After the little one kissed the relic and the case bearing it had been rubbed on the child's limbs, the mother removed the brace, he said, and the child was able to walk out of the church alone.

Many brought their crippled and other-wise stricken children to the church during the day, and while no other cures were al leged to have taken place immediately the faith of the parents that good would come of the visit was unabated.

Mr. Eloff and many other members of the Kruger family were at her bedside when she passed away. KRUGER INFORMED OF WIFE'S DEATH. LONDON, July 21.—Owing to the Sunday telegraph hours in Holland, says a dispatch to the Daily Mail from Hilversum, Mr. Kruger was not informed of his wife's death until this evening. The news was broken to him by Dr. Heymans and Secretary Boescoten. Mr. Kruger, who had just returned from Hilversum church, burst into tears and asked to be left alone. "He exclaimed: 'She was a good wife We quarrelled only once, and that was six months after we were married.' He prayed for a long time and now is calmly sleep-

Crops About Gone.

No Relief from Western Drouth in Sight-104 De-

KANSAS CITY, Mo., July 21.—No relief came to-day to break the almost unprecedented drouth in the Southwest. The day was a repetition of the past two weeks, with reports from many places in Western Missouri, Kansas and the territories of temperatures over the 100 mark.

At most places the sun shone merciless-ly with not a cloud nor a breeze to break its rays. In Kansas City last night proved more bearable, a breeze from the north alleviating the conditions, but a day of intense heat followed.

To-night there is a prospect of rain in Oklahoma, but there are no indications of a change from any part of the Southwest.

With no relief in sight, the fears for the crops are fast becoming realities, and the scarcity of water and generally dry conditions make the element of fire a most serious one. What the real damage to corn, the crop most affected, will be, is problematical, but it is probably safe to say that half the crop will be lost. The supply of water is short in almost every direction, and the shipment of cattle and hogs to the market to save them must con-

In Kansas City to-day the government thermometer reached 102, and at Marys-ville, Kan., 104 was recorded against 100 yesterday. There were three prostrations at Marysville.

BURLINGTON, Ia., July 14.—To-day was the sixth day in succession that the mercury went to 100 and over. The humidity in the atmosphere makes it very oppressive. There are no indications of rain.

St. Paul, Minn., July 14.—Yesterday's record was equaled to-day by the government thermometer, the maximum being 98. There was a strong breeze from the South blowing most of the day, which greatly added to the discomfort. Up to 8 o'clock this evening no prostrations had

been reported.

The hot weather continues throughout entire Tw. Minnesota, the Dakotas, Huron reporting ed there. 102 and Sioux Falls 100. At the latter place a child went to sleep in the sun and died from the effects. New Ulm, Minn., reports a temperature of 104, with a num-

ber of prostrations.

Prof. William Hayes of the state agricultural experimental farm, reports that the hot weather is doing a great deal of damage to wheat in Southern Minnesota, and that chinch bugs are very numerous. He believes that but a small crop will be harvested in this section.

Reports to the weather bureau show that the hot weather continued to-day in nineteen States and territories of the great corn belt, the Ohio valley and various portions of the South. There seems to be no immediate evidence of abatement except in. the South and Southwest, where local thunderstorms may cause some moderation.

The States affected include Indiana, Illinois, Wisconsin, Minnesota, Iowa, Missouri, Kentucky, Tennessee, Alabama, Mississippi, Louisiana, Arkansas, Oklahoma, Kansas, Nebraska, South Dakota, North Dakota, Colorado and Mishiran. Dakota, Colorado and Michigan. It has become considerably warmer also in the upper lake region and in New England, Marquette, Mich., reporting to-day a record-breaking temperature of 102 de-

The weather bureau thermometer on the custom house registered 106 degrees. On the streets and in exposed places the mercury went many de-

grees higher. As early as 7 a. m. the day gave promise of being unusually warm. At that time the thermometer registered 90 degrees and from then on until 3:30 p. m., the mercury steadily climbed upward under the impulse of fierce sun shining from a cloudless sky. Hardly a breath of air stirred all day and the little that did circulate came as the draught from a furnace, so intensely hot

was it. The Governor's proclamation was gen erally heeded, nearly every church in the city holding well attended services, given up to prayer that the drouth, which has prevailed for several months and threatens the destruction of all vegetables, might be
