tion were alive with hunters. Notwithstanding the poor bags that are reported up to this time secretary Kalbfus, of the 1; Archie VanValin, 2 turkeys and 2 squirstate game commission, who recently made a trip through the game sections of the State, says birds of all kinds and squirrels are unusually plentiful. They are to be seen in sections of the State where they have not been known for 20 years past. He

predicted a good hunting season. Mr. Kalbfus will wage a war on violators of the game laws this year and to the end of carrying out the state laws will invoke to his aid the act of March 22nd, rel had been brought in there. 1899, which makes the constables of the wardens, and requires them to prosecute town. laws coming under their immediate notice or reported to them in writing in a manner prescribed by the act. The penalty for neglecting or refusing to

so act is \$50, or two months imprisonment. Constables get \$10 extra from the county for successful prosecution of all game cases, besides this under the act of 1897 the informer is entitled to one-half of all fines recovered. So that where the constable is the informer he is certainly well paid for his services.

By the aid of the constables and the agents of the commission Mr. Kalbfus hopes to prevent many violations and to apprehend and punish those who hunt regardless of the law and who formerly went free. While reports are meagre and everyone knows enough to make allowance for all stories told about the 15th of October or April, enough is known to indicate that birds are scarce. Squirrels seem to be fair-

ly plentiful and wild turkeys are reported numerous in every section of the county, with Vogel's minstrels at Garman's tonight though few of them were bagged ou Tuesis a good minstrel. He ranks with the day. The best records made at various

It is regarded as absolutely futile to attempt to do so by merely dumping the cans of fry sent out by the national and state hatcheries into the streams, for they are either too small to help themselves or just the right size to be gobbled up by some time.

The old canal. running from the foot of Lamb street to a point directly opposite the P. R. R. round house, has always been fed by springs and makes an excellent natural pond. This has been cleaned out and two dams built across it. The intention is to place the fry that are secured in the upper dam, where they will be fed and cared for until large enough to run into the lower one and then, after staying there until a fair size they will be permitted to run right through the drain into Spring creek.

The idea is an excellent one. The pond lency

A BEAR OPENS THE SEASON AT STATE COLLEGE.

The sports about State College are about run to death as the result of a big black bear's having opened up their season a day earlier than the regular time. Of course John Snyder got 8 grays; Jim Holmes, 7; Hamil Holmes 8, and two College students attention on Tuesday was given to bruin.

Early Monday morning Mr. James Holmes ceturned from having taken his cow to pasture just north of the College, and reported that he had seen a bear ruminating around through the fields out there. If State had beaten Yale at football there couldn't have been more excitement in that village than there was a

minute or so later. Everyone who remembered the thrill of the great bear hunt a number of years ago, when bruin actually invaded the college campus and was chased off by three hundred howling students only to fall a victim to Gum Hubler's deadly aim, was up in arms and keen for the chase. Scores headed for the Barrens, but Will Foster and Irv Holmes were the only ones who got near enough for business. The former paid his compliments to bruin with a Winchester and the old bear was so

overcome with William's aim that he laid down and rolled over in the road. But he didn't stay down. He ambled on and then Irv Holmes put a load of buck-shot into him that made him switch his tail like a nervous mule in fly time. No, that ain't right, for bears don't have tails, do they? But he would have switched 'er, all right, if he had had one, so Irv thinks, and that is all that is necessary.

It was growing dark and the critter got to cover, after leaving a trail of gore that they say must have taken two gallons of blood to make. Next morning, bright and early, there was a great army after him. The bed he had laid in out near Buggersburg, on Tate's ridge, was found and they went after him for dear life, but he escaped to the mountains without having presented
