

THE LONG OVERCOATS

THE PROPER THING.

There are countless other styles of course, but fashion always hits upon one particular design as the season's leading feature. This season it happens to be the lengthly garment--so popular has it become and so great the demand that there is a decided scarcity of long coats throughout the country--a scarcity everywhere but at Sim's. We bought such a tremendous stock that we can afford to smile indulgently at those stores whose meager display forces them to declare the short top coat as popular as any. We know it is not, so do you.
