Bellefonte, Pa., December 6, 1901.

The Teredo and its Work.

Of the various forms of animal life that cause damage by their habits of boring into various substances, the Teredo navalis, or ship worm" as it is commonly called, easily heads the list for general destructive It is found in every sea, and every piece of unprotected timber immersed in salt water is subject to its ravages. works secretly, silently and effectually. A timber may appear perfectly sound upon the surface, but upon cutting into it, it will be found fairly honeycombed with the passages drilled by this indefatigable

Teredos belong to an old and well scattered family. They were well known to the ancients, who found the problem of protecting their ships' bottoms from the ravages of the pest a most serious one. In 1713 Holland came near suffering an inundation through the agency of the creatures. The Zeeland dikes were found ready to collapse by reason of long continued at tacks on the part of teredos, and had not the situation been discovered most deplorable consequences must have resulted. teredo is a cylindrical, worm shaped creature, and as found in Pacific coast waters is usually about a foot long and rarely exceeds half an inch in diameter. The head contains the boring apparatus, which consists of two peculiarly shaped shells. These working together have an action closely resembling an auger bit. The long, whip like body is nearly transparent and so ten- by the "Mexico and California Special," the der that it will hardly bear its own weight. finest train that crosses the continent. The creature bores into the timber when it of the grain of the wood, unless turned aside by some obstacle in its path, such as

a knot, spike or another burrow. It lines its tube like passage with a thin calcareous deposit, which serves as a protection to its crystalline body. No matter how many teredos may be operating in the same piece of timber, no excavation will be railroad. For detailed itineraries, giving found breaking into another. How the rates and full information, address Thos. E. artisans, working within the interior of the Watt. Passenger Agent Western District, timber, can so unerlingly avoid obstacles in their path is a puzzle to scientists. The section of a log taken as an example measured but 18 inches in diameter, yet contained over 800 teredo holes by actual count.

To obtain a live teredo means a diligent and in many cases a disagreeable search. The writer made a number of visits to various wharves, but it was not until an extremely low tide that success attended his dislodging the creature if it is to be kept site the refreshment room and briefly intact, while photographing the soft, wa-

tery mass will prove no easy task.

Many persons erroneously charge the teredo with the damage done by limnoriæ, minute insects that swarm upon the surface of immersed timbers and eat in toward the heart. Every piece of piling is beset with enemies within and without, and it is always a question which will cause the ultimate destruction of the timber.

The teredos bore into the lower end of the pile in such numbers that at length it breaks off and floats away; the limnora makes its attacks at about half-tide mark and if given sufficient time, will eat the timber completely in two. Where the bottom is foul and muddy, the teredo completes its work first; but on a firm, sandy bottom, the linoriæ win the day. The teredo does not work with the same rapidity in all waters. They are worse in Alaska than in Southern California, and at various points on Puget Sound, but a few miles distant from each other they work with varying degrees of voraciousness, much depending upon the character of the bottom. A whaif left to itself soon becomes a tottering ruin. They are carefully watched, and as quickly as piles are destroyed they are replaced by a pile driver, which drives new timbers into the bottom with an immense hammer operated by steam power.

Loggers are careful to construct their booms in places where streams mingle with the salt water in order that their logs may not be injured before reaching the sawmill. The Robertson Log-Raft Company recently removed its plant from Puget Sound to the Columbia river in order to escape the teredo, which rendered one third of its timbers worthless before a raft of sufficient size could be got together for

How to protect timbers from their insidious foes has been under consideration for years. In 1868 Dr. Avenarius, a German chemist of note. made a preparation from creosote which was fairly effective, but it did not meet the general favor on account of its inflammability, evaporation and destructiveness to wood fibre.

A few years later Dr. Avenarius invented a coal tar distillation which proved of great merit, and most of the preservatives now in use are compounded largely in ac cordance with his formula. Copper or yellow metal sheathing is also efficacious.

The creesote process consists in a forci ble injection into the fibre of the wood of dead oil of coal tar as obtained in the mandead oil of coal tar as obtained in the man-

Copper sheathing consists in a coating of copper or yellow metal (sometimes called Muntz metal) similar to sheathing on the

It is well understood that there ar e numberless materials which will keep the teredo from destroying wood, provided they can be made to stay in the wood; but the solving action of salt water is so great that it will destroy the great percent age of them. In Southern California a considerable quantity of eucalyptus piling is used. This wood withstands the action of the teredo for from three to seven years, but the growth is limited in quantity and size, and is not of sufficient importance to out any figure commercially.

The government demands the use o pest-proof timber in all its wharves and harbor works, and railroads and other private enterprises are following the example The writer recently made a careful examination of a dock built of prepared timber, which had been built for several years, and could not find a trace of a teredo. In the fender-piles, however, which were unprotected, teredos and limoriae were holding high carnival. - Scientific American.

Have Gone to Mexico.

Governor Stone and a small party of state officials and their wives left Harrisburg Tuesday in a special car for a trip to Mexico. They will visit New Orleans, San Antonia, Texas, City of Mexico, Los Angeles and San Francisco, and will be gone about three weeks. The party will he composed of Governor and Mrs. Stone, Secretary of the Commonwealth and Mrs Griest, Banking Commissioner and Mrs. Reeder, Public Buildings Superintendent and Mrs. Eyre, Executive Clerk Rodgers and James M. Auter, messenger in the executive department.

A Use For His Book.

It is said that when in India Winston Spencer Churchill, Lord Randolph Churchill's son, presented a copy of his first book to General Tucker, who previous to his South African command was all powerful at Secunderbad.

"Do you like it?" young Churchill in quired of the general. "Haven't read it. Is it meant to read?"

"Why, yes. "Wish you'd told me so before. I keep it hanging up in my dressing room and tear off a page every morning to wipe my razor on."

Too Dense. "But." hissed the heavy villain, "supse our plot should leak out." His miserable accomplice shivered at

the thought. "But it can't," cried the low comedian, emerging at that moment from behind a stage tree, "because from now on the plot thickens, you know." - Philadelphia

Mr. A. B. Steel, of the Armory savs: "I have never had a bad back since I used Doan's Kidney Pills in 1896 I procured them at that time from F. Potts Green's drug store and used them, but I have never had any occasion to use them since. I was so bad with lumbago or soreness across my kidneys that I had to lay off work. I was hurt at a barn raising some years ago by a heavy timber swinging and striking nee in the back. After that whenever I took cold it always affected my kidneys. This was the case for many years but Doan's Kidney Pills finished all that suffering. I can speak as highly of this valuable preparation now as I did then."

SHERIFF'S SALES.

By virtue of a writ of Levari Facias issued out of the Court of Common Pleas of Centre Co., Pa., and to me directed, there will be exposed to pub-lic sale, at the Court House, in the borough of Bellefonte, Pa.,

SATURDAY, DECEMBER 21st, 1901, at 10:30 o'clock a. m., the following described

real estate:
All those certain messuages, tenements, mining and mineral rights situate in Centre county,
Pennsylvania, bounded and described as follows: TRACT NO. 1. Situate in Spring township, Centre county aforesaid, bounded on the east by lands of Robert Valentine et al; on the south by lands of Charles McCafferty, John Musser et al; on the west by lands of John Musser, the heirs of Reuben Valentine et al; and on the north by lands of Wm. F. Reynolds and sundry town lots in Belliente horsuch. in Bellefonte borough, composed of parts of five tracts warranted in the names of Wm. Moore, Thomas Ball, Wm. Sharon Jr., James Harris and Hugh Turner, and more specifically described, according to a survey made thereof by J. M. Bell, Civil Engineer, on June 25th, A. D. 1886; as follows: Beginning at stones, northwesterly corner of said tract; thence along land now or formerly of James Harris' heirs, and crossing the Centre & Kishocoquillas turnpike, south thirty-five degrees, east, twenty and one-half perches to a stake; thence crossing the creek and the Bellefonte, Nittany & Lemont railroad south forty and one-half degrees, west, thirty-five perches to a stake thence south thirty-five degrees east, twenty-two and one-half perches to a stone; thence south thirteen degrees west, thirty-six and four-tenth perches to a stone near a white pine; south sixty-three degrees east, eleven perches to stones; thence south thirteen and one-half degrees west thirty perches to stones; thence south thirteen and one-half degrees east, eleven perches to a white pine; thence south fifty-two and one half perches to a white pine; thence south thirty had one-half degrees east, thence south fifty-two and one-half degrees east, thence south thirty-nine degrees east, thence south thirty-nine degrees east, thence, recrossing the Bellefonte, Nittany & Lemont railroad, north fifty-five degrees east, tour and two-tenths perches to a stake; thence south thirty-nine degrees east, thirty-four and two-tenths perches to a stake; thence, recrossing the turnpike road, north forty-one and one-half degrees east, four and two-tenth perches to a stake; thence, recrossing the turnpike road, north forty-one and one-half degrees east, two hundred and thirty-six perches to a stake thence, recrossing the turnpike road, north forty-one and one-half degrees east, two hundred and thirty-six perches to a stake thence, recrossing the turnpike road, north forty-one and one-half degrees east, two hundred and thirty-six perches to a stake on the easterly bank of in Bellefonte borough, composed of parts of five tracts warranted in the names of Wm. Moore, degrees east, two hundred and thirty-six perches to a stake in the middle of the old Lewistown pike; thence south sixty-four and three-fourth degrees west, one hundred and fifty-nine and nine-tenth perches to a stake; thence north fifteen and one-half degrees west, one hundred and forty and seven-tenth perches to stones; thence along lands of Friends' Cemetery the three following courses and distances, to wit south, seventy-six and one-half degrees west, thirty-six and three-tenths perches to a stake; south, eighty-four and one-fourth degrees west; fourteen and seven-tenths perches to a stake; and north thirteen and one-half degrees west; thirteen perches to a stake; and horth thirteen and one-half degrees west, thirteen perches to a stake; and thence leaving the Cemetery lot, south seventy-six and one-half degrees west, seventy-five and four-tenths perches to the place of beginning; containing one hundred and seventy-two acres (172 A) and eighty-two (82 pr.) perches; having thereon erected a large, modern, improved, hot-blast coke farnace, together with all engines and machinery necessary to operate the same, with brick engine and casting houses, boiler house, oil, ware and stork houses, a large frame foundry and machine shop, a large frame rolling and puddling mill, with six puddling furnaces equipped, a large two-story stone mansion house, stables, stone office building, twelve frame tenement houses, eight small stone tenement houses, one stone ware house and a number of small stables.

TRACT NO. 2. All that certain messuage, tenement and treet of land situate in Spring

small stables.

TRACT NO. 2. All that certain messuage, tenement and tract of land, situate in Spring township, Centre county aforesaid, beginning at a marked corner in the southerly line of the James Harris survey; hence south forrly-four and one-half degrees east to a corner of lands formerly of George Valentine; thence by same north seventy-seven and one-half degrees west, one hundred and twenty perches, more or less, to the line of the Samuel Miles survey; thence, by Nathaniel Johnston and James Harris surveys, to the place of beginning. containing thirty-one acres, more or less, and having thereon erected a frame engine house, with washers and machinery for washing iron ore and two double and two single frame tenement houses, and known as the Nigh Bank of the late Centre Iron Company property.

erty.

TRACT NO. 3. All that certain messuage tenement and tract of land situate in Spring township, bounded on the south and west by lands of George Valentine and on the north and east by lands for verly of Reuben Valentine, more specifically described by metes and bounds as follows: Beginning at a post situate north eighty six degrees and thirty minutes west, twenty three and one half perches from the northwesterly corner of lands now or formerly of Mary V. Hale; thence along lands now or formerly of George Valentine north sixteen degrees west, thirty six and onealong lands now or formerly of George Valentine north sixteen degrees west, thirty six and one-half perches to a post: hence still along the same and crossing the road leading from the Fishing Creek road to Curtin's Works, south seventy four degrees west, twenty three and one half perches to a post; thence along lands now or formerly of sail Valentine and re-crossing said road leading from the Fishing Creek road to Curtin's Works, south sixteen degrees east, thirty six and one half perches to a post, thence along lands now or formerly of said Valentine, north seventy four degrees east, twenty three and one half perches to the place of beginning; containing five acres more or less, and having thereon erected a frame engine house and ore washing machinery and also a hoisting engine house, with one frame dwelling house, known as the Gatesburg Bank of the late Centre Iron Company properly.

PURPART NO. 4. Also all the machinery and

PURPART NO. 4. Also all the machinery and improvements erected in and upon a certain tract of land situate in Spring township, Centre county, containing thirty nine acres and one hundred and thirty nine perches, bounded on the north and west by lands of Reuben Valentine's heirs and on the south and east by lands of Dr. E. W. Hale, consisting of the ore washing plant of the late Centre Iron Company known as Taylor Bank, and having thereon erected a frame engine house, a hoisting engine house and one double frame tenement house. ment house.

PURPART NO. 5. Also all the machinery, engine houses, wells and ore washing plant connected with the Logan Bank of the late Centre Iron Company property, situate in Spring township, Centre county, on the property of Reuben Valentine, bounded on the north, south, east and west by lands of said Reuben Valentine; containing five acres, more or less. ive acres, more or less.

Centre county, on the property of Reuben Valentine, bounded on the north, south, east and west by lands of said Reuben Valentine; containing five acres, more or less.

PURPART NO. 6. Also all the iron ore, and mine, within, upon or underlying forty seven tracts or parcels of Jand situate in the townships of Spring, Benner, Walker, College, Boggs and Union in Centre county. Pennsylvania, composed in whole or part of the tracts warranted in the following names: One thereof in the name of John Michael Haln, containing 180 acres; one other thereof in the name of James Harris, containing 312 acres and 140 perches; one other thereof in the name of James Harris, containing 139 acres and 120 perches; one other thereof in the name of James Harris, containing 139 acres and 120 perches; one other thereof in the name of Ann Patton, containing 407 acres and 40 perches, two others thereof in the name of Ann Patton, containing 407 acres and 40 perches, two others thereof in the name of Robert Means, containing 205 acres; one other thereof in the name of Most Miles and James Harris, containing respectively 260 acres; one other thereof in the name of John McComing, containing 423 acres and 37 perches; one other thereof in the name of John McComing, containing 432 acres and 37 perches; one other thereof in the name of John McComing, containing 413 acres and 23 perches; one other thereof in the name of John McComing, containing 413 acres and 103 perches; one other thereof in the name of John McKissick or McKisson, containing 187 acres and 100 perches; one other thereof in the name of John McKissick or McKisson, containing 187 acres and 100 perches; one other thereof in the name of John McKissick or McKisson, containing 183 acres; one other thereof in the name of John McKissick or McKisson, containing 183 acres; one other thereof in the name of John McKissick or McKisson, containing 183 acres; one other thereof in the name of John Johnson, containing 183 acres and 29 perches; one other thereof in the name of John Johnson, containi
