Bellefonte, Pa., January 10, 1902.

Cupola of St. Peter's.

The greatest of the architectural enterprises Michael Angelo was called upon to take up was the completing of St. Peter's, and he devoted himself through pure obedience to this task, refusing all compensation, offering his unpaid services in that way both to his master and to the service of reli-

He had to struggle against the opposing ideas of the architects in charge of the monument, who held by later plans than those of the first deviser, and their enmity and misapprehension of what was best aimed at a continual thwarting of all his intentions. He managed, however, to bring back the building to its original plan, that of his greatest enemy, Bramante, upon dust in it. whom he has left this noble judgment. "It cannot be denied," said he, "that Bramante laid the first plan of St. Peter's clear and simple, and all who have departed from his scheme have

departed from the truth." We have not the great cathedral as it the creation of his genius. But the one thing that Michael Angelo left to his successors in the work is the cupola, whose outline remains as an unparalleled idea, as important a landmark in architecture as his other records of achievement in painting and sculpture. It is the mark of Rome and the expression of Rome's grandeur.-John La Farge in McClure's.

The Pelican Smiled.

There is a sly old pelican in Central park which has an almost human way of noticing what goes on about him without seeming to do so. The other day two herons in the same cage with him fought over a fish. One had made the catch, but the other had undertaken to wrest the morsel from its rightful possessor.

They squabbled over it like two boys who have hold of the same baseball bat. The scuffle brought them into the neighborhood of the old pelican, who stood, apparently asleep, with his big bill tucked away under a wing. Then the heron dropped its fish, and the bat-

tle went on. No sooner had it been dropped than the great bill came out from underneath the wing and the fish went into the pelican's pouch. Then the head disappeared again. The pelican was

plainly asleep. When one heron gave up the fight and flew away, the other looked about for the prize. It was nowhere to be seen. The keeper of the bird cages solemnly asserts that he saw a twinkle in the eye which the pelican opened to give a glance at the retreating heron.-

One of the wars of the roses, the fiercest and deadliest of them all, was fought on a field where, curiously enough, a rose peculiar to the spot plant now, and the reason is explained by Mr. Leadman in his account of Yorkshire battles. After describing the terrible battle at Towton on Palm Sunday, 1461, he says: "I cannot conclude this story of Towton field without an allusion to the little dwarf bushes peculiar to the 'Field of the White Rose and the Red.'

"They are said to have been plentiful at the commencement of this century, but the visitors have taken them away in such numbers that they have become rare. Such vandalism is simply shameful, for the plants are said to be unique and unable to exist in any other soil. The little roses are white, with a red spot on the center of each of their petals, and as they grow old the under surface becomes a dull red color."-Lendon News.

No animals whatever are found in the dry parts of caves. Dampness or a certain degree of moisture seems to be essential to their existence. Under the stones one finds white, eyeless worms, and in the damp soil all around about are to be discovered blind beetles in little holes which they excavate and bugs of the thousand leg sort. These thousand leg bugs, which in the upper world devour fragments of dead leaves and other vegetable debris, sustain life in the caverns by feeding upon decayed wood, fungous growths and bats' dung. Kneeling in a beaten path one can see numbers of them gathered about hardened drips of tallow from tourists' candles. There are plenty of crickets alse.

A Varnishing Tip.

When varnishing wood, the work must be done in a warm room at a temperature of at least 75 degrees F. At a lower temperature the moisture in the air will give a milky and cloudy appearance to the varnish. On the other hand, at the higher temperature the moisture is not precipitated until the alcohol of the varnish has sufficiently evaporated to leave a thin smooth film of shellac. The durability and gloss are dependent on this.

Mystery Doth Ways. Pauline-Just think of the awful things we know about people whom we don't know!

Emeline-Yes. Isn't it wonderful! And just think what the people whom we don't know may know about us!-Detroit Free Press.

Stimulating Contributions Mrs. Von Blumer-The minister preached the most touching sermon I ever heard.

Von Blumer-How much did aise?-Judge.

Cloud Formations.

What Causes Them to Assume Such Variety in Shape.

A good idea of the correct reason for varying cloud shapes may be obtained by watching the steam from a railway engine under different conditions. As it issues from the funnel it is transparent water vapor. On a moist, cloudy day it will hang in thick, fleecy masses in the track of the train. In dry, bright weather it will rise in light, thin wreaths, which quickly disappear, and again when the engine is standing in a station the steam will collect in

masses above it. These are practically the conditions of cloud formation. The shapes vary according to height above the earth, to the temperature of the particular air current in which they are floating, to the force and direction of the wind at the various altitudes and also in some measure to the electrical condition of the atmosphere and the amount of

As a rule, the higher the clouds the lighter they are and the more widely spread. The so called mares' tails and mackerel sky are good examples of this. Some of the former are over five miles high and are believed to be composed of minute particles of ice. The Michael wished it, nor can we see in clouds in a mackerel sky are generally about three miles high.

The heavy cumulus clouds which so often look like vast mountain ranges are only found in the lower and moist: er layers of atmosphere. Their lower surfaces are from half to three-quarters of a mile above the earth, while their higher points may range from two to three miles in elevation. Still lower than these come the heavy flat masses of nimbus or rain clouds which are seldom more than half a mile above

Sports of the Crusaders.

In their amusements Christians and infidels mingled very readily. During the truces the two frequently engaged in jousts and proved one another's skill in horsemanship, in the use of the lance, in the wielding of the sword and in the hurling of the spear. All, even the knights of the religious orders, entered with zest into these friendly rivalries. Both Christian and infidel were extremely fond of hunting and falconry. A long section in the assizes is devoted to the laws concerning the latter subject. Ousama in his autobiography devoted many pages to accounts of hunting experiences and to the art of falconry. The crusading leaders took their hunting dogs and falcons with them as a matter of course when they set out on the holy war.

As the close proximity of the enemy exposed both parties to constant attack, hunting agreements were made by which each might hunt in security THE PEOPLE KNEW HIM. on disputed territory. Gifts of dogs and hawks were interchanged, and friendships were sometimes formed because of the mutual interest in breeding hunting animals. - International Magazine.

His Particular Muse.

He had been calling on a young lady and had been talking against time for grows or used to grow. It is a rare several hours, not noticing that she was, to say the least, slightly wearied. "Do you know," he said, after completing a monologue of several thousand words and thinking a little flattery would be appreciated, "while talking tonight I have felt as if I were inspired by one of the muses. And which one do you think it is?"

He looked searchingly into her beautiful face. The modest blush for which he was watching proved to be a wide yawn, which grew wider as she answered:

"I guess the muse that inspires you tonight must be Euterpe." He didn't really know anything about

mythology, so he couldn't tell just what

she meant. But when he got home he took down his encyclopedia, and there in cold type, staring him in the face, he saw:

"Euterpe-the muse who presided over wind instruments."

A Pretty Big Tiger.

Old Dickey S., a very wealthy but very illiterate East India merchant in London, took a pair of compasses and set about examining a large map of India, the margin of which was illustrated with drawings of the wild and domestic animals of the country. Suddenly Dickey dropped the com-

pass in amazement. "It can't be! It ain't in the horder of nature that it should be! Impossible! Ridiculous!" "Why, Dickey, what's the matter?"

"Wot's the matter? Vy, this Bengal tiger is ninety miles long!" Dickey had measured the tiger by the scale of the map. HARD MARKAGE.

Electric Centipeds.

Least attractive among the insects which give light are the so called "electric centipeds" - black crawlers with many legs, which have been likened to serpents' skeletons in miniature. They move in a snakelike fashion, forward or backward, leaving behind them a bright track of phosphoric light. However, they are most accustomed to appear in the daytime, when the illumination they afford is

Unfortunate Error. "What do vou mean by this, sir?" demanded the angry advertiser. "What's the matter?" inquired the publisher of the Bangtown Bugle.

"This advertisement of 'our delicious canned ments from the best Chicago houses,' you've made it read 'horses.' " -Philadelphia Press.

Doubled as Alimony. "Oh, yes, daughter's fully twice as happy as she was with her husband." "How so?"

"Why, he used to give her an allowance of only \$10, and now he has to pay her \$20."-Cleveland Plain Dealer. 45-14-1vr.

A CASE OF IT.

MANY MORE LIKE IT IN BELLEFONTE.

The following case is but one of many similar occurring daily in Bellefonte. It is an easy matter to verify its correctness. surely you cannot ask for better proof than such conclusive evidence.

Mr. G. H. Bradt of 121 Penn street, gurdener, says: "I had a lame back and pains over my kidneys. I was at times so lame it was most painful to straighten so lame it was most painful to straighten up after sitting or stooping and any lifting or turning suddenly hurt me exceedingly. I read about Doan's Kidney Pills, saw some Bellefonte people who had been cured by using them and I procured a box from F. Potts Green's drug store. They removed the trouble."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, N. Y., sole agents for the U. S.
Remember the name—Doan's—and take no substitute.

(BENSON'S PLASTER IS PAIN'S MASTER.) George Washington made and sold flour, and every barrel of flour in the market branded "G. Washington, Mount Vernon," sold without delay. No question was ever raised as to quality or weight.

Benson's Porous Plaster sells on its reputation everywhere. All the buyer wants to be certain of is that the plaster offered him really is Benson's, and not a worthless imitation of it or substitute for A plaster is the best form of external

remedy, and Benson's is the best plaster; 5,000 physicians and druggists, and a multitude of people no man can number, have settled that. "You can'trust it,"

Coughe, colds, lame back, lumbago, muscular stiffness and rheumatism, troubles of the liver and kidneys, influenza or grip, pneumonia, and all other diseases open to external treatment, are at once relieved and cured by Bensons's Plaster. Do not assume that Belladonna, Capsi-

cum or Strengthening plasters are "just as good as" Benson's. They are vastly inferior .- No other plaster is as good as Benson's. In competition with the best-known

plasters of Europe and America, Benson's have received fifty-five highest awards. For sale by all druggists or we will prepay postage on any number ordered in the United States, on receipt of 25c. each. 46-45 Seabury & Johnson, Mfg. Chemists, N. Y.
