A Winning Trick.

He Lest Ail His Bets and Made Money by Doing 80

The captain of one rather old and China before he received a full cargo of tea and would have probably to return in ballast, began, to every one's astonishment, to say that, owing to the gines, he hoped to make a racing passage back to England. Then, still more to the astonishment of the captains of the fast steamers and the world at large, he commenced to back himself to

make the fastest passage home. In such very considerable sums of money did he wager that people began to think there was something in it, and the merchants sent their tea almost entirely to his ship, arguing that as the captain stood to lose £500 the repairs to his steamer's engines had probably put of a picture." him in a position to bet almost on a

certainty. Of course the steamer, whose great est speed was eight knots an hour, arrived in England weeks after the others, and the captain lost £250, but in- as much. We shall make a very small stead of having to lie in China waiting his chance of cargo coming in from the interior, a probable delay of weeks, he had cleared in a few days after his painter. "Dead, do you mean?" "Yes, bets became known to the public with a full ship, thus recouping to his own- ed the funeral." ers, who of course paid his betting losses, a considerable number of thousands of pounds profit.-Blackwood's Magazine.

They Use Morphine. "Snakes of many poisonous varieties can be handled without danger if the handling is done properly," says a dealer in animals. "Most people imagine that snake charmers handle only nonpoisonous snakes, or snakes with the poison sacs removed, but such is not always the case. I have seen snake charmers fearlessly handle reptiles of the deadliest variety without apparent danger to themselves, the snakes in fact making no attempt to bite. A snake does not bite unless angered, and snake charmers are careful in their handling to soothe the animal instead of alarming it. They generally begin their manipulation by stroking Doves live ten years and the little singand avoid all sudden movement in handling the snake. Most snake charmers I have come in contact with were morphine fiends, and by the absorption of this poison they were impervious to the poison of any but the most deadly variety of snakes."

Two Gifts to the Orchestra.

On one occasion, when Von Bulow had to conduct an orchestral conce. at which a piece written by an arist cratic amateur was to be performed, the composer requested permission to direct a rehearsal and on obtaining it opened a parcel containing seventy ch he handed to the members of the band, asking them to mark his intentions in their parts, as he would give them by word of mouth.

Hans von Bulow noted this matter of detail and left the hall. Presently he returned, also with a parcel, and on resuming his place at the desk gravely handed out seventy pieces of india rubber, with which the players were to erase the directions which the composer had given them.

Mushroom Tests.

There are two sure ways of telling the difference between wholesome mushrooms and the poisonous fungi which so closely resemble them. If they are to be boiled, put an onion with them, and if the onion remains white there is nothing to fear. If it turns committed matrimony. black, throw away the contents of the dish, for poison lurks there. A common test is to sprinkle a little salt on the pink underpart, and if it turns black you have real mushrooms. If the pink changes to yellow, you have a danger signal before. If precautions like these . were taken with all mushrooms, fresh or canned, there would be less sickness in the world.

The Cocoa Plantation.

A traveler in South America, where the cocoa tree is largely cultivated, speaks of the great care with which the young plants have to be protected from the sun, which, if very strong, is fatal to them. To secure this protection the planters shield them by banana trees and plantain trees, the broad leaves of which give them the needed shade. And even when they are fully grown they need protection. which is given by trees known as "immortels," or, as the planters call them, "the mother of the cocoa." Thus the whole cocoa plantation has a sort of canopy.

Turkey's Sacred Spot. The Chirkau Scherif, or hall of the Holy Garment, is the most sacred place in Turkey, for it shelters the mantle of the prophet Mohammed, his staff, his saber, his standard and, among other relics, two hairs from his venerable beard, which are inclosed in a casket of gold.

A Forced Sale Frith's Purchase of His Own Portrait Painted by

Here is the astonishing history of one of Frith's own portraits painted by himself. The celebrated R. A. had en-

tirely forgotten its existence until a friend entered his studio one morning and asserted that a capital picture of himself was on view in a small shop in Great Portland street. "It's not a slow steamer of years ago, finding that bit like what you are now," observed he would have to be a long time in the friend, "but it may have resembled you some years ago. Go and look at

He determined to buy it, though he had not the faintest recollection of having painted it. "Ah, a portrait!" said Frith to the woman in charge of the shop after he had .pretended to examine several other works. 'Whose likeness is that?" "That," said the lady, "is a portrait of the celebrated artist, Frith, painted by himself." "Why, he must be an elderly man," put in the artist. The woman remarked that he was young once. "Humph!" quoth the genial W. P. F. "Not much

> To this the woman demurred and asked £20 for the canvas. It was Frith's turn to appear surprised. "Well," replied the shopkeeper without moving a muscle, "it cost us nearly profit. You see, it is very valuable because the artist is deceased!" "Deceased!" exclaimed the astonished sir; died of drink. My husband attend-

> > Ages of Birds.

Among birds the swan lives to be the oldest, in extreme cases reaching 200 years. The falcon has been known to live 162 years. An eagle died in 1819 which had been caught 104 years before and was then quite old. A white headed vulture, which was caught in 1706, died in the aviary at Schonbrun, near Vienna, in 1824. Parrots live more than a century. Water birds have a long life, exceeding that of several generations of men. Ravens also live over

a hundred years. In captivity magpies live from twenty to twenty-five years, and still longer in freedom. The common hen attains the age of from fifteen to twenty years. ing birds from eight to seventeen years. The nightingale's life is the shortest, ten years being the longest, and next comes the blackbird, which never lives longer than fifteen years.

A Tough Steak.

"On the other side of the Rio Grande," said a traveler, "meat is cheap, but the best cuts of Mexican beef are tougher than rhinoceros hide. When I first went to Mexico, I ordered a tenderloin at a hotel in Durango, but I couldn't cut it to save my neck. I told the waiter it wouldn't do, and he removed it.

"Presently, however, he returned, accompanied by the proprietor of the hotel, and laid the platter on the table. 'What's the matter with the steak?' asked the hotel man in Spanish. 'Tough,' said I. 'Why, I can hardly stick a fork into it-much less a knife.' "Mine host flapped it over with the flat of the knife and eved it dubiously. the house. At any rate, I can't take it back. It's bent."

His home was in Baltimore, and having but two dimes, he knew not how he was to reach home. Dr. Peebles made him a loan

After he left there, he visited the Klondike and Arizona gold fields, and making a rich find, determined to show his appreciation for Dr. Peebles, by the handsome gift.

Longevity in Perrine Family.

A remarkable case of longevity is shown by five members of the P-rrine family, brothers and cousins, who reside near Franklin, Pa. Their ages range as follows: Jesse, of Oil City, is 88; Isaac, 83; Harrison, 86; Bennett, 86 and Jackson. 80. Each man has been married once, and their wives are all living. Jesse has been married 66 years, Isaac. 65, Harrison 65, Bennett 63, and Jackson 57. they all live within a radius of fifteen miles of each other.

Great Britain is only half as big as Sumatra, and dnoble the size of Newfoundland. It stands fifth in point of size in the list of the world's islands. England, without Wales, is almost identical in point of size with Roumania. It is less than one quarter as hig as France or Germany. The whole British isles occupy only the one sixteenth hundreth part of the surface of the globe.

You will agree with us that to change existence into life, or to make life more abounding, is not a small mission. It is accomplished by the bestowal of the greatest of blessings-health and strength. It is the mission of Hood's Sarsaparilla and is so well fulfilled by this great medicine that in thousands and thousands of homes the name, Hood's Sarsaparilla, is always spoken with gratitude.

We are glad to say so much that is so fully deserved.

Mrs. Mary Lease, of Wichita, Kan., who recently secured a divorce from her husband, denies that she is to be married to a professor of an Asiatic cult in this city. "I shall never again marry," she says. 'When my youngest child, Ben Hur, is of age in five years, I shall retire from public life. I entered public life at the time he was born. Mr. Lease says: I have nothing to say about the charges brought against me by my wife. I am not sorry that she is not my wife any longer, and I wish her good luck. Ambition was the cause of our separation. I am not ambitious."
