INDOORS AT NIGHT.

Keen and cold is the Wintry blast As the sleet and snow go driving past. There's a strife in the old trees racked and bent,

The clouds hang low o'er the firmament But the household gathers safe and warm, Folded close from the breezing storm; The lamp is lighted, the hearth is bright, And the dear ones are cozy indoors night.

And when shutters are closed and curtains drawn,

And the toiling hours of the day are gone Sweet words are spoken, good nights are said To the wee ones tucked in the little bed (God's grace watch over each curly head!) Then with book and talk and the dear old

We have loved since the days when we were

We will fill the hours with love's delight. Cozy and happy indoors at night. -Margaret E. Sangster, in the Christian Intelli-

Records Held by the Earth.

Budget of Facts About the Planet on Which We Live-Mercury is the Heaviest of the Planets.

If you put down the figure 6, and add after it twenty-one naughts, you have the approximate weight in tons of the world we live in. In proportion to size, there is only one planet that is heavier than the earth—that is little Mercury, says the Chicago "Tribune." Taking the density of the earth at 1, that of Mercury is 1.26. No other member of the solar system, not even the sun itself, can compare with our globe in weight. Jupiter, the largest of all the planets, is 1,400 times as big as the earth, but only about 300 times as heavy.

Mercury holds the two records for being the heaviest, bulk for bulk, of all the planets, and of being the nearest to the sun. But in all other respects the earth beats it. Mercury is only three times as big as the moon. It has little or no atmosphere, and, therefore, equally little water. Worse than all, it seems fairly certain that it no longer revolves on its axis like our planet, but resembles the moon

in turning one face aways toward the sun. The nearest of all the planets to our-selves, is not, as is usually imagined, Mars, but Venus. We can see the atmosphere of Venus during its occasional transits across the sun's disk. Venus also resembles the earth nearly in size and weight.

Yet Venus must be a poor place to live in compared with our world. Its axis are tilted in a most surprising fashion, with more than 1,000 years old; two vases pre results that can hardly be pleasant for her sented to her by the Mikado of Japan, the inhabitants. The arctic regions must be considerable in extent, and there a blazing day of half a year must be succeeded by a night of unparalleled cold of the same ble tour of General Grant around the length. In her tropical regions cold and world. heat must also succeed one another with startling suddenness. Her temperate zones must suffer from similarly severe changes, making a climate which no human being could withstand.

Mars is nearly 50,000,000 miles farther from the sun than ourselves, yet is so much less hidden by clouds that we can tell a great deal more about that planet's shape and make than about any other members of the solar system. And the more we learn the more certain we feel that our next neighbor on the outside cannot compare with the earth. Here out of 100 square are land. Mars water is so scarce that it is probably hoarded with the greatest care. Martians who want to travel cannot take ship. They must journey overland. Nor is it likely that air ships can be used, as the Martian atmosphere is extremely thin. In fact, a human being on Mars would probably suffocate unless he was provided with oxygen cylinders like those balloonists use.

BURGLARS WOULD THRIVE IN MARS. Another disadvantage of Mars from a human point of view must be the darkness of the nights. True, Mais, has two moons to our one, but they are both so absurdly small that they cannot be of much use to illuminate the Martian nights. Neither Mercury or Venus has any moons at all. The changes in the Martian climate are

much more severe than in our own. The south polar ice-cap of Mars at the end of May has been noticed to be as much as 1,200 miles across. By the following December 10 it had shrunk to nothing. The year of Mars being 687 days long allows yearly changes of climate on a greater scale than our own.

As for the other planets of our system, it is almost certain that no creature belonging to this earth could live on them at all. Jupiter is so covered with ever changing bands of clouds that we know practically nothing about that star's surface. Its atmosphere must be many hundreds of thousands of miles deep, so that the inhabitants if any, can never see the sun. In any case Jupiter is so far away from the sun that that body appears only one-quarter as big as it does to us, and gives only one-twenty-fifth as much light and heat. Another objection to Jupiter is the storms it suffers from. Wind on the earth blows sometimes at ninety miles an hour, and levels every thing before it. But on Jupiter a 200 mile breeze is a common occurrence and blows for weeks at a time, as we can see by the movement of the clouds.

JUPITER HAS FOUR MOONS.

Some astronomers have noticed a deep copper red hue appear through the torn masses of the Jovian clouds, and argue from this that Jupiter is still in the same condition which this earth passed through 300,000,000 years ago a mass of incandescent material, covered with a envelope of watery vapor. But no one knows for certo a wound. The poison will be drawn and fell exhausted by the roadside. His forth into the onion, which will first turn faithful dog stood guard, and by continumoons. It has four. One appears to the people of Jupiter bigger than our moon, the next two are about half as large, and wthe fourth is quite small. But, as they shine only with reflected sunlight, all four together could only gives one-sixteenth as much light as our own moon. As a matter of fact, they are all visible at the same time. The last and, from a human point of view, the chief disadvantage of a resident in Jupiter, is that a ten-stone man transported to that planet would find that be weighed something over twenty-five stone, and would, therefore, be unable to

do much more than crawl. Great are the earth's advantages over Jupiter, Saturn suffers still more in comparison. It is practically certain that Saturn is destitute of animal life. It is no less than 745 times as big as this earth, and yet weighs only ninety times as much. It is, iudeed, only three-fifths as heavy as its bulk of water. Any one moving to Saturn, therefore, from this earth would be unable to keep afloat, even were he the best of swimmers. Saturn must, indeed, be in a liquid condition, for astronomers pillow.

watching this planet have often noticed that it constantly changes shape. One side of it will bulge out as much as 400 to 500 miles. We on this earth get just ninty times as much heat and light as Saturn has from the sun, and all Saturn's moons eight in number, cannot make up for the deficiency, for their combined light is but onesixtieth that of our satellite

As for Uranus and Neptune, they are so far away that our knowledge of them is limited. Uranus must, indeed, be a dreary place. Its year is eighty-four of our years. Its axis slopes much, and its winters, at least forty-two years long, must be appalling. At the height of its summer the sun looks but 1-390th as big as it appears to us. Neptune is so far from the centre of the universe that to it the sun appears merely as a star does to us.

Taking all things in consideration, our earth, in spite of some disadvantages, seems quite the most desirable property among the various units of the solar system.

Mrs. Grant's Will Filed.

Estate Valued at About \$235,000-Distinguished

The will of Mrs. Julia Dent Grant, the widow of Gen. U. S. Grant, was on Friday offered to the probate court in Washington for record. It was executed May 9, 1887, and names as trustee the person to be selected by the three surviving sons, or a majority of the survivors. Gen. Frederick D. Grant, the eldest son, delivered the docu-

ment to the register of wills. First reciting the fact that the survivors are Gen. F. D. Grant, Ulysses S. Grant Jr., Jessie R. Grant, sons, and Mrs. Ellen W. Sartoris (Mrs. Algernon Sartoris), the only daughter, the petition proceeds to state that the estate consists of the family residence at 2111 Massachusetts avenue, upon which a value of \$40,000 is placed; money amounting to \$10,065.36, stocks, bonds and other securities of a value of \$180,000 and household effects valued at \$4,000. The three sons designated General Grant as exec-

The will directs that the entire estate be be applied to the support of the family of den. Frederick D. Grant and the education ed to take effect January 1st, 1903. Gen. Frederick D. Grant and the education of his children, the second to the executor in trust for the support of the family of Ulysses S. Grant, the third under similar conditions to Jesse R. Grant, and the fourth for the sole use of Mrs. Sartoris, and

at her death to her children in equal parts. General Grant is directed to present to the national government such articles of national and historic interest as he may find among her effects according to his judgment.

The Metropolitan Museum of Art, in New York city, is to receive the following valuable objects of art : The ancient gold lacquered cabinet presented to Mrs. Grant by the Empress of Japan and said to be gold toilet set presented to her by the King of Siam and other articles given by rulers of the world on the occasion of the memora-

The witnesses to the will were Anthony Drexel, George W. Childs, F. A. Castle, M. D., and Matilda Carr. Appended to the will is a sworn statement from J. Pierpont Morgan identifying the handwriting of Mr. Childs and Mr. Drexel, both of whom are

Irrigation and Deforestation.

Of the 23,394 square miles of primeval forest not long ago existing in the State of Washington nearly one-third has been destroyed, and the major part of the nortion jor part of the portion destroyed by fire. That report was made before the recent forest fires, which have swept off some thousands of miles more, What has thus been done and is being done in Washington has been and is being done in nearly every State. Probably no other country in the world was ever so rapidly, so recklessly and so disastrously deforested as the United States.

Now, here is the grimly ironical signifivast sums of public money are about to be spent for that purpose, teckless and criminal men are making other lands arid at a still more rapid rate. The so-called lumherman, who wastes ten times as much as he markets, and the man whom we shall not venture to characterize who wantonly sets fire to forests, are doing more harm in ter land. It is a better and a wiser thing to protect watered land from becoming arid. Millons of acres of the best farming land in America, hitherto amply supplied with moisture, are now menaced with December 24th. drouth because of reckless timber cutting and forest fires. Turn the water on desert lands by all means. But let us not cut off the water supply of the fertile regions. down of the Queen Dyeing company, employing 200 hands, and the Clyde Print works, employing 650. -New York Tribune.

The Onion is Everything.

Cures Insomnia, Draws out Poison and is a Fine

"The onion," said a grocer, "is undoubt-edly the earth's best product. It is a medi-cine, it is a food and it is a narcotic. "I used to be troubled with insomnia. My doctor, an 'osteop, said: Eat a law onion with a slice of bread every night before retiring.' I did so. I peeled the onion, I put salt on it, and I devoured it with delight, for it was good. I never had insomnia thereafter. Decidedly and indubitably, a raw onion taken each night will cure the most obstinate and long-stand-

ing cases of this disorder. 'The onion will also draw the poison out of a snake bite. If you are ever bitten by a snake, cut an onion in half and apply it the cold on the outskirts of Tamaqua, Pa., to a wound. The poison will be drawn and fell exhausted by the roadside. His green, then yellow and then black. In the same way, too, for the bite of a cat or a dog the application of an onion is a good

thing.
"Onions as a food are most nutritious. The lentil comes first of all in this respect, than pea and then the onion.

"As a seasoning the onion is as universal and as necessary almost as salt. Soups, sauces, fillings, ragouts-hardly a dish of the unsweetened sort would be palatable but for the humble onion.

"If the onion cost about a dollar the world would appreciate it; poems would be written in its praise. Because it costs less than a cent its virtues remain unsung.

Wit of a Woman.

A woman cured her husband of staying out late at night by going to the door when he came home and whispering through the

keyhole, "Is that you, Willie? Her husband's name is John, and he stays home every night now, and sleeps with one eye open and a revolver under his

Lorenz Earned Just \$30,000

Doctor Denies Stories of Having Made a Big

Dr. Adolf Lorenz, who returned to New ing his visit to this country. in an inter-view Thursday night, said:

the best Salve on earth for piles, too. 25c, at Green's Pharmacy.

"There is one thing I want to say, and that is in regard to finances. I see it reported that I have made in this country \$160,000. Now, as a matter of fact, I got one fee of \$30,000 in Chicago, and in the four months I have been here I have earned just \$30,000. My practice at home in four months is worth that.

"True. I have seen a number of private patients in each of the cities I visited, but as you Americans say, in no instance have they more 'than paid the freight.' The physicians of the various cities have profited by my visit. They are my colleagues, and I am glad they did, but you see I remained only two, three, four or perhaps five days in one place. During that time I was working in the hospitals, in the clinies. The private patients began to come in, and they were operated upon by the local surgeons who had witnessed my clinics. But I am gald I came. The trip has been the crowning success of my life. My trip here has been successful ethically,

but not materially." Dr. Lorenz spoke gratefully of the hos pitality he had received at the hands of the Americans.

Liquor Tax For Soda Water.

Druggists Who Sell Distilled Spirits Must Pau Commissioner Yerkes, of the internal revenue bureau, has given a decision in which he rules that druggists and others who sell soda water claret drinks, soda, or similar beverages to which distilled spirits, wine or any compounds thereof are added in any quantity, however small, are required to pay special tax as retail liquor dealers under the internal revenue laws.

Under the old ruling druggists and others were allowed to add to soda water and other soft drinks an inappreciable quanapportioned in four equal parts, the first to tity of distilled spirits or wines for flavor-

The commissioner also has decided that producers of sweet wines, who are not distillers, may withdraw wine spirits (grape brandy) from special honded warehouse free of tax to fortify their wines.

A Costly Piano.

Roxbury (Mass.) Factory is Building an Instrument Which is to Cost \$10,000.

On the order of a Philadelphia store for customer, believed to be Charles M. Schwab, the steel magnate, a Roxbury (Mass.) factory is building what will be probably the most elaborate and expensive piano constructed in this country in the last 50 years.

The price will be \$10,000. The instrument is a marvelous middle-sized grand, of Louis XVI. design. The case is gilded and decorated ornately with foliage after the Watteau pattern.

Just when the piano will be ready for delivery is not known, but it is understood that when Mr. Schwab returns from his health-seeking trip abroad it will be reposing in the parlors of the wonderful new mansion he is having erected in New York

Richest Tribe in The World. Osage Indians Own \$8,600,000, Besides 1,400,000 Acres of Land.

The 1,800 people composing the Osage tribe of Indians, of whom 847 are full bloods, are the richest people per capita in the world, the tribal possessions including \$8,584,498 to their credit in the treasury of the United States, besides 1,400,000 acres of land in Oklahoma. These facts were brought out in the annual report to the Indian bureau by the agent. The summary of the finances of the tribe shows that the total receipts amounted to \$579.866. including \$145,026 for leased pastures, \$425,005 interest on invested tribal funds, cance of the situation. While a national irrigation congress is being held to promote the irrigation of arid lands, and while cost \$83,791, and the other disbursements of the agency and schools during the year cost \$83,791, and the other disbursements were but \$397.

20,000 Pupils Out of School.

Coal Scarcity Causes Closing of Public Institutions in Providence.

The school board of Providence, R. I. on Tuesday ordered closed, beginning that one year than all the irrigation promoters day, all the public schools which cannot can undo in ten. It is a good thing to wa-About 100 buildings come within the scope of the order and 20,000 pupils will have a vacation until January 15th, in place of the usual one week's vacation, beginning

CERTAIN RESULTS.

"NOTHING CAN BE SURER" IS THE

TESTIMONY OF BELLEFONTE CITIZENS.

The stage of uncertainty is over in Bellefonte. There can now be had plenty of positive proof in the testimonoy of a citizen. Evidence of this nature should convince the most skeptical doubter in this vicinity. Read the following.

Mr. Curtis Johnson of 583 Bishop Street, freight truckman, says: "I had backache and, lameness across my loins for a year or more. At times the lameness a year or more. At times the lameness was so acute I could lift nothing and if I stooped it was impossible for me to straighten. When driving there was steady aching over my kidneys the whole time and I had a dull, tired feeling which took and I had a dull tired feeling which took and I had a dull tired feeling which took and I had a dull tired feeling which took and I had a dull tired feeling which took and I had a dull tired feeling which took and I had a dull tired feeling which took and I had a dull tired feeling which took and I had a dull tired feeling which took and I had a dull tired feeling which took and I had a dull tired feeling which took and I had a dull tired feeling which took and I had a dull tired feeling which took and I had a dull tired feeling which took and I had a dull tired feeling which took and I had a dull tired feeling which the latest tired tired feeling which the latest tired tired tired tired tired tired tired tired tired tire and I had a dull, tired feeling which took away all my ambition. I procured Doan's Kidney Pills from F. Potts Green's drug store and they soon cured me from the whole combination of troubles and they did it quickly and thoroughly. "My wife was also suffering from a tired grinding backache and she used Doan's Kidney Pills and they invigorated her generally. She now speaks of them as highly as I do. We never came across any remedy which surpassed Doan's Kidney Pills."

For sale by all dealers. Price 50 cents a box. Foster-Millburn Co., Buffalo, N. Y., sole agents for the United States.
