EDITOR OF THE DEMOCRATIC WATCHMAN : Dear Sir : By looking at your list of subscribers you will notice my name appears among the rest. A good newsy paper like interest by a native of Centre county in this distant State, Lassure vou.

Since coming to California many letters of inquiry have been sent me, asking about the advantages of the State, the climate, conditions etc. Thinking that what would be of interest to a few, might be of interest to your many readers, I was prompted to write this

letter. One who has never visited this State, and made a study of its resources and natural ad-

vantages, can not appreciate what the State holds in store for mankind. The geographical position it occupies is enough to insure its growth at a very rapid G. F. Hoy, our enterprising merchant, is rate. But its growth will be augmented by many other natural advantages, which no

other State in the union possesses. Southern California is blessed with a cli-

mate, not found anywhere else on the globe. Not perfect, but it may safely be asserted that it approaches as near perfection as can be found. On rare occasions during the rainy season this section of the State is visited with light frosts, but never sufficient to damage mature semi-tropical trees. Some belts are subjected to heavier frosts than others. Occasionally young trees are much damaged, while in other localities all vegetables, such as we grow in our eastern gardens, grow all through the winter.

While it rains here it is very disagreeable, but the sun shines so brightly after the rain is over we feel compensated for all inconvenience caused by the rain.

Because of the delightful climate the city of Los Angeles is distinctly a city of flowers. The rare beauty of the ground surrounding the attractive homes is a constant theme of admiration to the eastern visitor. The mild climate permits the most delicate plants and trees to flourish in open air. At this time of the year may be seen hedges of calla lilies and geranium bushes, while the heliotrope, jasmine and rose bushes cover the sides of houses, each apparently trying to outdo the other in brightness and richness of color and all making the air heavy with their delicious perfume. To complete the surroundings of the home, is a beautiful well kept lawn, shaded with the stately palms, with the pepper, encolyphis and grenilla trees along the curb to add grace to beauty. This part of the State has something more

substantial than a delightful climate to offer those intending to make this their permanent home. The soil in these valleys is very fertile, being adopted to the growth of many semi-tropical fruits. The orange is one of the chief exports from here. The orange crop is one which pays the rancher well for his time and money spent. It, however, requires constant care and attention to make orange culture profitable.

The English walnut ranch is one of the most profitable; the nuts always command a David Chambers. good price. The walnut ranch does not require so much attention as an orange ranch, and pays more on the money invested. One ranch of 30 acres last year yielded a net in-48-7-31 come of \$3,000. The property is valued at \$15.000. come total general

There are sections where wheat, corn and rlev are raised. Alfalfa is grown exten sively in the same localities. While there are sections where hundreds of acres are devoted to the raising of celery which is shipped east grown extensively and disposed of in eastern markets realizing handsome profits. This is practically an undeveloped country. There are many opportunities here for the man who has money. One seeking a profita-ble investment would do well to come to this State. This is the land of sunshine, promise and opportunity. and opportunity. One cannot understand the climatic conditions or the natural advantages, or appreciate the beautiful scenery until he has visited the
