#### HER NEW VOCABULARY.

She possessed a mind discerning. That was stored and crammed with learning And her thoughts, forever burning, She could suitably express. All her sentences were rounded. And her words imposing sounded: I was really quite astounded As I listened, I confess

It was rather an infliction, All this verbal unrestriction, But her elegance of diction, Each precise and polished phrase. And the beautiful selection Of the words and their connection And her most correct inflection-

They were quite beyond all praise. But I saw her very lately And she did not talk ornately All that language suave and stately She no longer kept on tap. She was saying, "Bessums diddums Where de bad old pin got hiddums, In his muzzer's p'cious kiddums,' To the baby in her lap.

# Overcome by Homesickness.

Jingo's Trainer Believes This Caused the end the Elephant-Immense Body.

Jingo, said to be the biggest elephant in the world, bound for New York on the White Star line steamer Georgic, died at sea last Thursday morning and his body was thrown overboard. The Georgic arrived from Liverpool on Wednesday.

The elephant had been practically raised

at the Zoo near London. He went there as a baby from Africa when he was 3 years old, and spent 22 years of his life there with English children laughing and crowding around his big chain-girdled feet. Jingo was their friend, dearer than the chimpanzee or the monkeys, and his mate Scullyfulla, was there too. When Frank Scullyfulla, was there too. C. Bostock, the animal exhibitor, bought him to bring to America, there was a how

in England. Expert animals dealers who knew the amiable temper of Jingo predicted that he would certainly die in the rigors of a March trans-Atlantic passage. The passage was one of the finest in the recollection of her master, Captain Nichols. Jingo did not die of seasickness or exposure. Thomas W. Lawence, a Kentucky trainer, who with three men started over with the big elephant, says he just pined away and died. He couldn't bear being away from home with strange faces about him and the absence of Scullyfulla and the school chil-

dren. Jingo was fed on a gallon of whisky soaked in specially prepared biscuit each day from the time that he left London. But even this stimulant failed to pull him together, and was destined to die when half way over, as the schools of sharks and porpoises which followed the ship for several days forecasted.

For the journey across the Atlantic a red painted box 15x13x9 feet was built and put on the starboard side of the Georgic. The animal started from the Zoo outside London in this box at 2 a. m. March 4th, but was held up in the railroad yards and did not leave London for Liverpool until 8.30 o'clock of the same might. A car had to be constructed by the London & North-

western railway to carry him. Under the agreement the rail way company was to receive \$500 for transporting the elephant, and the car was not to be moved faster than 15 miles an hour. The elephant was insured for \$25,000 for the railroad journey, and \$50,000 for the ocean trip.

When Jingo arrived at Liverpool it took a whole day to get him aboard the Georgic. The traveling saloon of Jingo was put together by braces and rods. The box was not much wider than he, but as an elephant does not lie down to sleep his attendants had no fear on that score.

day out from the Mersey. Lawrence coaxed him with special treats from the galley, but he shook his trunk in an indifferent sort of way and referent sort of arousferent sort of way and refused to eat until the afternoon of the second day, when he partook of two buckets of biscuit soaked in whisky. He pined away gradually, making and soap, for a few by oil or oil and amitself and the growing of the seedling. no violent fuss as he grew worse. The monia, and for still fewer by brush air and huge beast moaned and groaned so softly as to be heard only a few feet away.

About 5:30 o'clock of the morning of March 12th, some of the crew came tumbling aft to the quarters of Lawrence and sang out; "Your elephant is down!"

Lawrence ran to the box and saw that Jingo had fallen until his foreknees rested on the boards of his prison. Not a sound

came from bim. The entire crew of both watches called, and with manila slings fastened under the animal's forepart the donkey engines lifted him to his feet he stood erect of his own free will for more than half an hour, when he flopped down again. Meantime Lawrence was pouring bottleful after bottleful of whisky and brandy down his throat, but he died about an hour after

he was boisted up. He was buried on the afternoon of that day when there was a double funeral, a young ostrich baving died of a broken leg the day before. Trainer Lawrence wanted to have Jingo's skin brought to port to be stuffed, but the master of the Georgic refused. The animal was buried at 2:30 on Thursday afternoon about 1,700 miles from

The burial was an impressive sight. The captain of the ship stood in the gangway to superintend the job, and the elephant struck the ocean with a splash that sent the water 30 feet in the air, although the ship stopped to let the giant body make the big hole in the sea. The sharks and dolphins that had followed the ship for days fairly tore the carcass to pieces, and the cries of the sea gulls as they dodged between the sharks and other denizens of the deep could be heard for miles.

Lawrence says that the elephant sank for more than 20 feet after striking the water and remained below fully two minutes. When the body arose the sharks had already attacked it.

For ten miles in the wake of the ship after this the people of the Georgic saw the elephant's body floating but toward the last it disappeared now and again, showing that the number of fish and sharks was increasing and gradually pulling the body down.

Masonic Cathedral at Williamsport.

the anniversary of the Ancient Accepted Scottish Rite of the Valley of Williamsport. Six hundred Masons were entertained and the largest class ever received into the ond degree at one time in the

history of Masonry were given the secret of the chapter and consistory.

The Williamsport Consistory has had the largest growth of any in the United States. it was organized January 30th and 31st, 1900. Since that time 600 members have received the various degrees, and the class which received the ceremonial work of the order at the celebration reached the number of 250 or more. It is now the third largest consistory in the country, Philadelphia and New York being the only two cities which surpass it. The Howard Memorial Cathedral, which

was dedicated to the purposes of the Stottish Rite bodies, is the gift of the late William Heward. Two years ago he an-nounced to his masonic friends that he ed to give \$40,000 for the erection of a cathedral, and made over the title to a property adjoining the Masonic Temple. His death occurred a few months after this but in his will he made provision for the matter. A magnificent building has been reared and it now stands as a lasting memorial to him and his devotion to the to the Temple Club the Piper residence, and between this building and the temple the cathedral was erected. The masonic building forms a compact group in the heart

of the city The Cathedral will be devoted exclusively to the uses of the Scottish Rite Masons and is the second largest cathedral of the kind in the State. The interior decorations are exceedingly beautiful and the furnishings elaborate and costly. The auditorium is in theater form with stage and drop curtain, and all the electrical devices known 600. A handsome pipe organ adds to the subscriptions from the large membership of the local body of Ancient and Accepted ers' meeting.

Scottish Rite of the Valley of Williamsport. The entrance to the Cathedral proper Hall," and will contain a statue of Mr. Howard. The big banqueting room on the third floor of the Cathedral building will

seat 800 guests. The Howard Temple Club will occupy the residence in the angle between the Cathedral entrance and the auditorium, which has been thoroughly renovated and will make an ideal and cozy club home.

The Bath Proper. Various Ways For Keeping the Shin in a Healthy

Condition. So it appears that we, in civilization skin in contact with sunlight and moving air, to have it brace itself to shocks of cold, to get vigorous exercise looking toward restored blood circulation—this by some sort of rubbing or friction-and incidently

we want to entirely remove such accumulated excretions as are in and on it. We say in; for a good deal is thrown out by the civilized skin. It has to be literally scrubbed out-as if the skin were a piece of soiled linen, says the Washington "Times." With some persons, heat is of considerable aid, and the Turkish bath accomplishes what nothing else does. There are often stout sedentary persons, for whom exercise to the point of full perspiration is not easy. But plenty of us can do perfectly with warm or cool water.

The Turkish bath does not, in fact, agree with all. Some few are actually worse off for water in any form, but do well on oil mer is estimated by the Electrical World at baths, or just sun and air, along with vig-orous rubbing the flesh brush, followed by downward stroking with the palms of the hand. The skin is a compound organ. The whole of it more than equals in bulk the liver. Its needs are correspondingly compound, and so, too, are the objects of a

## Hurrah for Dad

The editor of the Stevens county (Kausas) Reveile has got tired of bearing mother praised and dad neglected, and has scratch ed a few lines of glowing tribute to dad. "We happened in a home the other night," Mother !' On the other side of the room trict. was another brief, 'God Bless Our Home.'

"Now what's the matter with 'God bless our dad!' He gets up early, lights the fire, grabs his dinner pail and wipes off the dew of the dawn with his boots, while many a mother is sleeping. He makes the weekly handout for the butcher, grocer, milkman and baker and his little pile is badly worn before he has been home an hour. He stands off the bailiff and keeps

the rent paid up.
"If there is a noise during the night, dad is kicked in the back and made to go down stairs, find the burglar and kill him. Mother darns the socks but dad bought the socks in the first place, and the yarn and needle afterward. Mother does up the right, but, what is home without a father? Ten chances to one it is a boarding house; father is under the slab and the landlady is a widow. Dad, here's to you. You've got your faults—you may have lots of 'em—but you're all right and we'll miss you when you're gone."

——It is announced that the Pennsylva-nia will spend \$7,000,000 for a four-track line from Radebaugh to Millwood, on the Pittsburg division, to be used for freight. Leaving the main line at Radebaugh the new road will strike directly for the county home and thence north to Seton Hall. It will then go in the direction of Greens-burg, passing within a mile of the city and rejoin the main line at Latrobe. The work will be completed during the present year, if possible. This will give the Pennsyl-vania eight main line tracks for a distance of seventeen miles.

Masons.

The Masonic fraternity, of Williamsport, entertained hundreds of distinguished guests on Wednesday during the dedication of the William Howard Memorial Cathedral. At the same time and continuing until March 28th they celebrated Cathedral. At the same time and continuing until March 28th they celebrated by Green's Pharmacy.

Curtous Condensations.

The average watch represents but 12 hours of human labor. The electric motor is fast displacing the

leather belt in factories. The German Government operates 15,200

telephone central stations. Our principal exports to Korea are electrical appliances and idols. How incongruous !

To be able to pronounce"hereditability" is a sure sign of sobernese, says a Cardiff (Wales) doctor.

The saloon is now prohibited in but four States—Maine, New Hampshire, Kausas and North Dakota. One of the most complete electrical

power plants recently installed is that of the Osake military arsenal of Japan. Marseilles, the great market for olive oil, imported in December 2,909 tons of cottonseed oil. Nearly all of it was from the

United States. The heartbeat in animals continues for ome time after death. In France the heart of a criminal beat for 30 hours after he had been decapitated.

"There is no bridge between the spiritmasonic cause. At the same time that he ual and material world," says Sir William announced his intention to provide funds Crookers, President of the British Associafor the building of the cathedral he gave tion, "and I don't see-how there can be." A new process for extracting oil from olives by a centrifugal machine, such as is used in sugar refineries, will effect an enormous saving to the olive growers of Cali-

fornia.

Dr. Whitman of the University of Chicago, one of the Carnegie Institution's advisers, recommends a biological farm for the study of heredity, variation and evolu-

The directors in German companies get no salaries unless the annual dividend exto modern stagecraft and will seat about ceeds 4 per cent, and the limit they may receive is \$6,000 a year. The law forbids attractiveness of this assembly room. The organ and the furnishings were supplied by printed for stockholders prior to a stockhold

A French doctor has invented a harmless bullet, which ought to be very useful to will be known as the "Howard Memorial French duelists. It is made of a chalky compound, and when it strikes a person it merely marks the spot without doing the least mischief. With a mask over the face men can practice revolver shooting at each other just as they now practice fencing.

Molten wood is a new invention. By means of high distillation and high pressurer the escape of devloping gases is prevented, thereby reducing the wood to a molten condition. When cool the mass assumes the character of coal. This new body is hard, but can be shaped and nicely polished. it is impervious to water and acid.

Dr. Dupree has found from investigations made in Louisiana that the egg of need currying as well as ablution. We need for a little while at least to have the they are laid, especially if deposited in the conponds which subsequently dry up. He con-cludes that the extermination of mosquitoes by oil or by otherwise treating ponds during March and April is useless, as the hatching is going on all the time.

A bar magnet arranged in connection with the handle of the razor is the newest device for keeping that useful instrument sharp for a long time. As you pass the razor over your face the magnet draws the edge, and so prevents it from becoming blunt so soon as it otherwise would do; when at rest the edge lies along the magnet, so that the cutting part is always under magnetic influence

The electrical fan is increasing in popularity as a purveyor of comfort, both at home and in the equatorial regions, so that 150,000. Not only does it serve to mitigate the heat of summer, but in a great many instances it answers the purpose of sanita tion and ventilation so economically and efficiently that few other appliances can

compare with it. There are many historic trees in the country, and it is believed by the Department of Agriculture that interest in tree planting can be stimulated by distributing a limited number of these trees under prop-er direction. The seedlings, when grown, will be sent to schools in various parts of skin is a dumping ground, covered in by civilized usage and calling for a special cleaning up—for most of us by warm water the historic events connected with the tree

That the bubonic plague is carried from port to port by rats in ships is an established fact. A French investigator now finds that the disease is communicated from rat to rat by fleas, and that promisenous intercourse between healthy and infected rats or their cadavers never transmits the plague, while fleas conveyed the disease in eight tests out of nine. So medical officers he says, 'and saw the legend worked in letters of red, 'What is Home Without a health and comfort of the rats in their dis-

#### Pretty Girl's Death Charged to Foul Play.

Relatives of Belle Sutter Believe She Was Murdered Instead of a Victim of Despondency.

The body of Miss Belle Sutter, the young woman who drowned herself in Stump creek, near Punxsutawney Friday night, has been taken in charge by her relatives, most of whom live in Indiana county. Saturday night the report was current that there were suspicious of foul play on account of marks on the girl's neck, which suggested that strangulation might have and needle afterward. Mother does up the fruit. Well, dad bought it all, and jars and sugar cost like the mischief. Dad buys chickens for Sunday dinner, carves them himself and draws the neck from the ruins of the ruins again revived by the dead start reverving also is served. What is chickens for Sunday dinner, carves them himself and draws the neck from the ruins after everyone else is served. 'What is home without a mother!' Yes, that is all have taken place at Cavode Sunday afternoon, was postponed, and that District At-torney James V. Murray will be asked to probe the matter more thoroughly.

The Big Run authorities are convinced

that the young girl encompassed her own destruction; of proof of this they offer the letter written by the dead girl before she left the home of her friend, Mrs. James Yohe, of Big Run, which was addressed to Silas Rimer, telling him of her intention to drown herself, where to find her, and that he could see her for the last time at her funeral, which she designated should be Sunday afternoon at 2 o'clock. This letter was found by Mr. Rimer pinned fast to her coat. The fact that Miss Sutter burned all her letters and photographs before leaving the McLeavy residence to go to Big Run last Friday further corroborates the theory of self-destruction, but in the minds of the dead girl's relatives the marks on either side of her throat constitute evidences of greater weight. The dead girl's brothers and sisters, three boys and three girls, living among relatives in Indiana county, are old enough to demand a further investigation of their sister's death.

Origin of Roquefort Cheese.

About the famous Roquefors cheese the following legend is told: A shepherd lad, having more luncheon than he could eat, laid a large portion of his bread and cheese upon a natural shelf in one of the caverus near by. He forgot all about it until sev eral months later, when he found the cheese, instead of being dried up or rotten, was rich, moist, creamy, and streaked with greenish-blue veins. He shared his piece of cheese with others, and the villagers were quick to recognize the improved texture and quality. Henceforth all their cheese were taken to these caves to ripen. The caves are now owned by a company, who employ 600 women to tend the cheese.

-A number of officials of the New York Central railroad visited Oak Grove a day or two ago and witnessed a test of the two immense electric lifting cranes that have been installed in the shops. One of the cranes has a capacity of lifting 75 tons, the other 35 tons. One of the largest freight locomotives was run into the shop and fastened to the huge 75 ton crane by system of heavy chains, owing to the absence of the complete apparatus which is generally employed for such purpose. The locomotive weighed about 71 tons. It was easily and gracefully lifted from the track. The 20 ton crane was given a similar test with a heavily loaded tender. Both machines were pronounced perfection.

MORE RIOTS. - Disturbances of strikers are not nearly as grave as an individual dis order of the system. Overwork, loss of sleep, nervous tension will be followed by utter collapse, unless a reliable remedy is immediately employed. There's nothing so efficient to cure disorders of the Liver or Kidneys as Electric Bitters. It's a wonderful tonic, and effective nervine and the greatest of all around medicine for run down systems. It dispels Nervousness, Rheumatism and Neuralgia and expels Malaria germs. Only 50c., and satisfaction guaranteed by Green's Pharmacy.

EVERY WALK IN LIFE.

BELLEFONTE CITIZENS APPRECIATE "THE

LITTLE CONQUEROR."

Every class of citizens has sick kidneys. The busy business man rushing through life on the run fails to realize the constant strain he daily puts upon the kidneys. The mechanic forced to assume unnatural positions, stooping and straining at his work, does not know that his backache is simply kidney ache. The clerk on his feet continually, leaning over a counter or desk; railroaders, conductors, engineers, street-car men subject to constant jarring all have backache from the kidneys. Women at their household duties boys and girls at play overtax their kidneys and girls at play overtax their kidneys and o. 'Tis a fortunate thing the kidney warn you when in trouble; that they life on the run fails to realize th

neys and give them more work that they can do. 'Tis a fortunate thing the kidney warn you when in trouble; that they cry out for help. Don't neglect the warning. Don't neglect a bad back; a lame, weak or aching back if neglected means future trouble, kidney trouble, urinary trouble. Doan's Kidney Pills cure every form of kidney ill. Cure a bad back and make sick kidneys well. Doan's Kidney Pills are endorsed by people you know. Read what a Bellefonte citizen says:

B. H. Shaffer, a Howard street tinsmith says: "I was much troubled with backache and a lameness just over my hips and when I took cold there was always a difficulty with the secretions. The lameness in my loins was very inconvenient for I could not move quickly without having sharp, winges through me and if bending forward I could hardly straighten. I learned about Doan's Kidney Pills procured them from F. Potts Green's drug store and took them. They banished the pain and lameness."

Doan's Kidney Pills for sale by all dealers. Price 50 cents. Mailed by Foster-Milburn Co., Buffalo, N. Y., sole agents for the U. S. Remember the name—Doan's—and take no substitute. 48-13
