FARM NOTES.

—A light, sandy soil is always best for a poultry yard. A heavy clay soil is always damp and, unless care is taken, will cause roup, while a sandy soil, being dry, will promote warmth.

-In working around bees do not open hives early or late in the day, or on rainy days. Select nice weather, for at such times the old bees, which are the field force, are out in search of nectar, and fewer bees are in the hive. Some think the best time to take honey off the hive is at night, when the bees are asleep, but do not try

-In answer to an inquiry Rural New Yorker says: Large trees can be moved by cutting back the tops quite severely and taking up as much of the roots as is possible. A large ball of earth should be left fastened to the roots by digging under, prying it up and sliding under a stone boat. This can then be drawn to the new location and slid into place. If the ground is allowed to freeze before digging out the ball, it can be moved with greater safety from crumbling.

-The young dairy heifer ought to be as well fed and cared for as the milk cow, because her future usefulness depends upon her condition prior to her first pregnancy. She does not need food, either for milk production or for fat, but ought to be kept in strong growing condition by food that makes bone and muscular tissue and gives vigor of constitution. The heifer should have a more active life than the cow kept height to will be a strong growing condition by food that a makes bone and muscular tissue and gives vigor of constitution. The heifer should have a more active life than the cow kept height to will be a strong growing condition by food that a makes bone and muscular tissue and gives with the condition of the condition for milk, but requires just as much care in feeding and just as sufficient shelter from inclement weather.

Breeder's Gazette recommending rennet the head. tablets we tried them and found them very thing I have found for calves is blood meal. We have never lost a calf from scours since using it. We usually give from two table-spoonfuls to half a teacupful at a dose in boiled milk three times a day, according to

-Never have plants of the same kind, or same family, follow on the same land. Beans should not follow peas nor melons come after pumpkins. A plant that produces above the ground, such as cabbage, should be followed by root crops, such as potatoes, beets, turnips or carrots. Clover, how-ever, being entirely distinct from grain, may be followed by wheat, oats or corn, and potatoes or turnips may follow grain. The seed of clover is really a small bean, hence it is of no advantage to follow clover with beans or peas all being legumes. There are no "fixed" rules, as the fertility of the soil and the climate are to be considered. Some farmers by the liberal use of manure and fertilizer, grow the same crops on the same land every year, but it is not safe to do so except under favorable

it is not without its good qualifies. Its zinc under the stoves. Its most practical juicy fruit, though rather deficient in flavor, use, however, is in the bathroom and lava-

prickly pear, the proper way being to impale the fruit on a fork or stick while you cut it open and remove the skin, and woe a cloth dipped in gasoline is used. It betide the fingers of the unwary "new chum" who plucks the treacherous fruit. In dry weather at the cape these spiteful fully." little stings do not even wait for the newly arrived victim, but fly about, light as thistledown, ready to settle on any one who has not learned by experience to give the prickly pear bushes a wide berth.

-So much has been written concerning scale insects and fungi on trees that a few lines only are now contemplated to bespeak attention to the subject from those should be interested. From one end of the country to the other trees are becoming full of scale and other insects, and this evil, together with that of fungi, requires constant attention. It is not alone from nurseries that the evils are spread. Private orchards are infested in almost or quite every state, and from these trees wirds carry the insects on their feet from one the to another. Almost all nurseries are fairly clean of insects, some of them entirely so. The inspection laws of most states compel yearly examinations of the trees, and, besides this, the nurseryman's interests call for clean stock. Every one having fruit trees or bushes should be prepared to meet the foe. The best thing to do at the present time is to write to the advertisers of sprayers for their pamphlets concerning the subject. Very many that I have seen give formulas for making the various compounds the time when spraying should be performed, the proper apparatus for the purpose and general information on the subject of great value.-Practical Farmer.

-One advantage which barley may be credited with over the other cereals is that it is much less liable to be injured by the rust fungus. Nearly all the varieties that are now on the market mature some time during the first ten days in July, so that the crop escapes to some extent the severely hot weather. Ripening as it does at this early date is of considerable advantage to the grower during the harvesting period. Where winter wheat is grown barley is generally ready to harvest soon after this crop, while spring wheat and oats come in a little later. But the fact that it matures at a convenient time would not alone recommend it for general culture. It must give a good yield of grain, otherwise farmers in general will have little use for it. In this and let stand a little while before serving. respect we think that barley fully fills the requirements. Where ordinary care is taken in preparing the seed bed and the soil is at all in good health there is little difficulty in getting a yield of 40 bushels per acre. In fact we have seen a 50 and 55 bushel yield time and again. As the grain usually weighs from 45 to 50 pounds per bushel it will be seen that the yield in pounds per acre is very large. It certainly would require a heavy crop of oats to produce the same amount of food. It is true that the grain is scarcely so palatable as oats and that it is not relished so much by farm animals; at the same time if properly combined with other foods it will give good results .- Live Stock Indicator.

An Amateur.

"What's an amateur, Bobby?" asked little Elsie of her six-year-old brother.

FOR AND ABOUT WOMEN.

There seems to be an endless variety in the new styles of the summer blouse. White is first choice in any material, from sheerest chiffon and gauze to the heavy linens and vestings. Next to white, the choice is for linen colors, with gray tones, like crash. A gray canvas linen is very smart, with Mexican drawn work.

One of the smartest blouses seen is of the old fashioned pure Irish linen, with drawn work down the front box pleat and on the sleeves, collar and cuffs. Many new ideas are shown in neck wear

for the new blouses. Tabs are seen every-where. But the latest are very broad. Tiny cotton braids in color are being used on them, also Mexican drawn work. But the really smart thing to wear with your plain shirt waist is the stiff linen collar. But it is quite a glorified linen col-lar, all embroidered in dots, flowers, and sometimes has hemstitching and drawn work on it. A very plain blouse can be quite transformed with one of these stylish bits of neck wear.

Don't threaten your children with horrible stories of bogies and black men who will come to take them away if they are will come to take them away if they are bad. I have frequently heard mothers say: "If you are not good I'll sell you to the rag man." Or, "Here comes the policeman. If you are a naughty boy he'll put you in the lock-up." To frighten children by threatening to "give them to the policeman" is singularly cruel, partly because children so often meet one partly because children so often meet one, partly because in the case of a child being lost it is frequently taken in charge by the big, blueuniformed officer whom the child has learn-

A feature of the small spring hat is the height to which it is raised in the front. Bandeau, matching the under trimming of the brim, raises it as effectually as a well--We have had a great deal of trouble with scours or oalf cholera, which usually occurs the second or third day. We have the back. A stylish finish is a rosette of tried a great many different ineffective velvet on either side, close to the hair, with remedies, but reading an article in the flat, pointed ends, which also fit close to

If feathers are used they fall backward good, especially for young lambs, writes
Theodore Degenhardt. I have saved them
when they were almost dead. The best

over the hair, starting near the middle of
the hat. The end of the quill is rarely
covered with ribbons or ornaments. The feather fad is to have the rough end stuck through the brim or the crown. If ca-bochons or buckles are used they must not

boiled milk three times a day, according to the peculiarities of the case, but stop when it begins to check.

For early spring wear the royal blue feather bids fair to be most popular. A feather shading from white to royal blue is also shown.

There never was a greater variety of shapes than this year, and, by selecting upto-date trimming, almost any shape used last year can be converted into a confection for 1903. The distinguishing feature will be the lace, the flowers or the band stretched across the crown from brim to brim. The shape is less important.

"After I have washed my white gloves and ribbons in gasoline," says a thrifty young housewife, "I do not throw it out, says a thrifty but pour it into a quart fruit jar, then screw the cover down tight. It is then ready for numberless other uses, such as dampening a cloth with it and wiping of my gasoline stove and my tea kettle. It removes the grease and dust better than soap and water. When there are no fires in the house I slightly dampen a cloth with -Mischievous though the prickly pear is, gasoline and wipe over my carpets, and the is delightfully cool and refreshing in the dry. The spatter marks of hard water are dry heat of the summer, and a kind of treacle is made of it.

The spatter marks of hard water are difficult to get off without a liberal use of hot water. Ive. soap and labor. I have cacle is made of it.

Great caution is needed in peeling the rickly pear, the proper way being to imbale the fruit on a fork or stick while you spotless condition with almost no labor if COME IN AND TRY IT. should answer as well with a zinc bath-tub, I know, for it polishes zinc beauti-

> Maple Cream.—Add to one pint rich milk one-half pint of water, one-half cup-ful grated maple sugar and one well-beaten egg. Put in double boiler, and when scalding hot stir in three tablespoonfuls of corn starch, dissolved in a little cold milk. Stir constantly for five or ten minutes; then pour in molds. When cold turn out on individual plates and serve with cream,

> which may be sweetened with maple sugar Farina may be cooked with milk, molded into croquets, fried in deep fat and served with soft maple sugar, which melts with the heat of the croquets, while a plain rice pudding served with hot maple syrup sauce comes a new and approved creation.

> Our bodices still blouse, but it is avieved with a difference, neatly distinguish in, the new spring model from that of other pi vious seasons. The blouse must not bag no be too full. The blouse must not dip too h. No longer is it permitted to drop over he belt line. On the sides of the immediat front the blouse is drawn smoothly and lmost tight. What fullness is allowed, a d this is scant measure, is kept entirely to e middle, and held in place with invisible stitches. The huge peched front is no longer "grande mode.

> Lemon Ginger Sherbet. Vipe eight lemons thoroughly with a clean, oft cloth, and from two of them shave off every thin yellow peel, which contains the voring oil, but be careful that you do no et any of the white, bitter part of the rind. Then cut all the lemons in half and press out the injury extrain it. Put four curs of out the juice; strain it. Put four cups of granulated sugar in a saucepan with two quarts of boiling water and boil until clear, skimming off the scum as it forms; then add the lemon juice and strain all through a piece of cheesecloth. Beat the white of an egg until light and foamy. but not stiff, and pour the strained syrup over this; mix well and turn into a freezer. Turn until the mixture is stiff, then stir in a quarter

> Carpet Cleanser-One pound castile soap. Half pound refined borax. Half pound salts of tartar. Four quarts boiling water. White of one egg. Dissolve in water on stove, and when cold add salts of tartar and the white of the egg, beaten light. This should be used on the carpet with a small scrubbing brush, cleansing a small space at a time, and then drying with a clean cloth wrung out in clean water. In the cleaning of red and deep colored car-pets do not make too wet. If the mixture seems too thick it may be thinned with warm water. All carpets must be swept clean before applying the cleanser.

Most of the new shirt waists hats are black, or burnt straw trimmed with black. Turbans, toques and flat hats, simply but tastefully trimmed with a fold of velvet, "An amateur," replied Bobby, who was was beyond his years, "is anything that isn't mature."—Chicago News.

maybe a brush aigrette or a bunch of small flowers—perhaps nothing more than a bow of soft ribbon. Will Vote on a Bond Issue.

The Jersey Shore council has decided to hold an election May 16th, at which time the matter of issuing bonds, in order to do considerable street paving and the laying of sewers, will be considered and finally dealt with. A number of contracts are being considered and when the work is started it will be pushed along at a rapid rate. The paving and sewering on Allegheny street will extend the entire distance to the junction.

A GREAT SENSATION .- There was a big sensation in Leesville, Ind., when W. H. Brown, of that place, who was expected to die, had his life saved by Dr. King's New Discovery for Consumption. He writes: "I endured insufferable agonies from Asthma, but your New Discovery gave me immediate relief and soon thereafter effected a complete cure." Similar cures of consumption, pneumonia, bronchitis and grip are numerous. It's the peerless remedy for all throat and lung troubles. Price 50c, and \$1.00. Guaranteed by F. Potts Green, druggist. Trial bottles free.
