A FIGHT FOR PURE MILK.—Alice Katharine Fallows has prepared for the August Century a summary of New York City's fight for pure milk. The conditions found by inspectors and reformers when the war against death- and disease-breeding milk was begun three years ago are sickening and almost incredible. Now no housewife in New York has any excuse for buying contaminated milk. Certified milk is as pure as science and skill can make it; but its price puts it beyond the reach of many families, fifteen cents a quart being asked—and cheerfully paid by those who afford it—for one farm's output. But "inspected" milk may be had for the price of ordinary bottled milk. The table, "Inspected by the Milk Commission of the Metropolitan Society of the County of New York," guarantees that, at the farm supplying the milk, yards and barns are in sanitary condition, cows properly cared for, bottles and cans clean; that the milk is cooled at once and transported quickly, and that it has not more than a certain number of bacteria; that the farm is visited by an inspector, and that the Milk Commission regards the milk as pure and healthful. Miss Fallows's article will be illustrated by Miss Charlotte H. Harding.

A new novel "The Crimson Dice," by George Nox McCain, is announced to make its appearance the latter part of this month. The publisher (J. Murray Jordan, Philadelphia) expresses the opinion that the novel will create a sensation. The plot is unlike anything that has appeared in recent years, and because of its freshness in this respect, "The Crimson Dice" is expected to make a stir in the world of fiction. Oddly enough there is not a line about politics or politicians in the book, although Col. McCain is one of the best political writers in the country.
