## FIGURING.

Everybody's figgerin'; Countin' up the cost, Countin' up their winnings Or countin' what they lost

Countin' up the gas bill, Countin' up the rent; Countin' ip the ballots And the money that was spent. Measurin' up the water Put in stocks one day ;

Measurin' up the shrinkage When it leaked away. Figgerin' on the record That a horse can get; Measurin' up your trouble

If you made a bet. All our worry started On the double-quick When someone invented

This arithmetic

Threatens Cotton Crop.

Boll Weevil Pest a Peril to the Whole South. Report of Secretary Wilson Declares that it was the Farmers who Have Paid Foreign Bondholders.

- Washington Star

Considerable space in the seventh aunual report of the Secretary of Agriculture, which has just been submitted to the President, is devoted to the cotton boll weevil. Secretary Wilson says that the invasion of this insect has been a special menace to the cotton crop and has awakened widespread Andrew Carnegie, for constructing an artiapprehension as to the future of this crop. In addition to the excellent work of the campus. President Wilson, when questivision of entomology in combating this pest, the bureau of plant industry has durthe lake would be built in the near future, lection. Notwithstanding all that has been accomplished, however, the boll weevil is constantly spreading North and East, and it seems but a question of time when it will reach all the cotton growing States. The country is thus confronted with a very sect necessarily means a complete revo-

lution in present methods. The Secretary reports that after a personal visit to the South and a thorough canvass of the situation with representative men in Congress and with others he is of opinion that a cotton investigation fund should be appropriated for immediate use in connection with this problem. He believes that not less than \$500,000 should be appropriated and made immediately available to make this work comprehensive

and thoroughly effective. In another part of the report Secretary Wilson tells of insects that are beneficial. The distribution of colonies of ladybird enemies of the San Jose scale has been continued during the year, mainly in charge of the entomologists of the state experiment stations. During the early summer of 1903 26 colonies were distributed in 12 different States. Good work has been done by the parasitic enemy of the black scale originally imported by the division of en-tomology from Italy and later from South In the colonized district over 90 per cent. of the black scale has been de-

troyed by the parasite. Considerable space is devoted to the dission of the silk culture experiments, for was made by Congress. Expert workers from France were secured who are now operating the reels in the Department of Agriculture, and the raisers of co-coous were informed that their product would be purchased by the Department at current Enropean market rates.

PRODUCTION AND EXPORT. Secretary Wilson reviews at length the production and exports of American agri-cultural products. The increase in the farm products for the half censury ended 1901 was from \$147,000,000 to \$952,000,000,550 per cent. The exports of farm products for the closing decade of the ast century was over \$700,000,000, and for 1903 over \$878 000.000, an amount second

only to that of 1901. Although the consumption of cotton in this country is greater than that of any other in the world, yet, in addition to supplying the home market, the South exported last year over 3,500,000,000 of coton worth \$317,000,000.

Of grain and grain products the exports exceeded in value \$221,000,000, and in the supply of animals, meats and meat produots the 000,000. ts the value of exportation was \$211,

Discussing the balance of trade the Secretary shows that the favorable balance to the credit of this country is due entirely to the farmers. The balance in trade in favor of farm products during the last 14 years, no year excepted, aggregated \$4,806,000. 000. In products other than those of the farm, during the same period, the balance of trade was adverse to this country to the extent of \$865.000 000. Our farmers not only canceled this immense obligation, but placed \$3,940,000,000 to the credit of the nation when the books of international exchange were balauced. He concludes that "it is the farmers who have paid the foreign

bondholders." Reviewing the magnitude of agricultural production, after giving the figures of the most important crops; Mr. Wilson states that the value of all farm products, not fed to live stock, for 1903, considerably exceed their value in the census year, when

it was given as \$3,742,000,000. According to the department's inventory of farm animals for January 1st, 1903, the value of horses was over \$1,000,000 and of mules nearly \$200.000,000. The value of cattle of all kinds considerably exceeded \$1.300,000,000. of sheep \$168,000,000 and

of hogs \$365,000,000. It is of the utmost importance to the orchadist that he should have information regarding the characteristics of fruit varieties, their particular requirements as to soil and climate, their suitability for particular uses, such as shipment to distant markets, canning, drying, etc. Bartlett pears, Elberta peaches and several varieties of summer apples from Delaware have been landed in London in prime condition. A motable event of the year was the inauguration of direct shipment of American winter apples to Paris from this department. The russet varieties were found to have the preference.

-The apple orchard on the farm of John Wisehaupt, in Spruce Hill township, tilled by his son-in-law, Charles Book yielded a prolific crop. In addition to 100 bushels of early apples rottening, Mr. Wisehaupt made 1,523 gallons of cider, and picked 100 bushels of winter apples.
Assisted by his daughter, Mrs. Book, Mr.
Wisehaupt could pick from the ground a two-horse wagon bed full of apples in two

Winter Signs Galore.

Many Goosebone Prophets Predict Severe Weather. From Morristown N. J. comes the following predictions of an usually cold winter Joe Harris says that turkeys have double

strength breast bones, which is always a sign of cold weather. Ed. Ross says that coons have three sets

of hair this year. Jerry Dugan says that the evergreen trees have three times as much foliage as usual. Hiram Melroy reports extra sweethreads

in Spring pigs. Jim Anderson says all rabbits that have been killed this fall have six heavy front

Frank Gibbs says that flagstones sweat frost every morning. Hank Bunnell comes forward with the story that fresh-water fish have two sets of

scales. Sam Gardner has noticed that the shingles of most houses have grown a coat of hair, or fuzz, as it is sometimes called. Jim Blithe declares that turtles and snakes are hibernating at twice their usual

depth. Charley Hullender claims that squirrels have denuded the forest of nuts of all kinds. All of which, it is agreed, point to a return of good old-fashioned sleighing.

Carnegie to Make a Lake.

Has an Agent in Princeton Working on Plan to Give Tigers a Place for Rowing.

PRINCETON, N. J., Nov. 29 .- The report has reached Princeton that bids have been placed in Philadelphia, by agents of ficial lake on the marsh lands south of the ing the past year done considerable work but said that if the lake should be made it with a view to securing if possible early and resistant varieties by breeding and se-sity's money, but by private capital. Mr. Carnegie's agent was in town last

week, presumably to take up options secured last spring. The lake can easily be built by erecting a dam at the foot o the marsh lands near Kingston, and by flooding the lowland with water from the great problem, as the invasion of this in-sect necessarily means a complete revo-of water four miles in length and about a mile wide would thus be formed, which would make an ideal place for the "Tigers to develope crews similar to those of Yale

and Harvard. It is rumored that Mr. Carnegie is willing to spend at least \$285,000 on the lake, and it is thought it would not cost much more to build it, for the land which it would cover is practually worthless. The faculty feel that the money could be ex-pended to better advantage in building up other departments of study in the versity, but there is no doubt that the Lake would help on the college in many respects.

## Mourners Die in Fire.

Two lives were lost and a number of persons badly burned Saturday in a fire on First street, Brooklyn, where a wake was being held over the bodies of Mrs. Mary Gilligan and Arthur Dougherty, a boy who died of hydrophobia a few days ago.

overturned lamp is said to have ignited the window curtains and before any one could move, the flimsy draperies were in flames and the mourning relatives

and friends were in a panic.

Michael Stafford, 78 years old, and Chas. Burley, 23, were suffocated. John Gilligan, a son of the dead woman, was badly burned while assisting at the resone of his mother's body and Dominick Dougherty, father of the dead boy, was severely burned while saving two children. Several others were less seriously injured.

Watsontown Woman Horribly Mangled

Mrs. William Edwards, of Watsontown, met with a horrible death Thursday morning. She was struck by the east bound Pennsylvania flyer while crossing the tracks and thrown 60 feet forward on the tracks. The engineer could not stop his train in time to avoid hitting her the second time and she was caught and dragged about the same distance before the engine could be stopped. She was undoubtedly killed outright when struck the first time. The body was so frightfully mangled that it was two hours before it was identified as that of Mrs. Edwards and identification was only then made possible by scraps of clothing which clung to the mangled remains.

Mother's Error Killed Five. The family of Frank Miller, of Tiffin,

O., consisting of five persons, husband, wife and three children, was exterminated Friday through the forgetfulness of the wife, who Thursday night had mixed a quantity of strychnine with cornmeal for

the purpose of poisoning rats.

The poisoned meal was mixed with other meal Friday and used in preparing the The tragedy was not learned breakfast. until Friday afternoon, when a neighbor called at the house and then found the five persons beyond medical assistance, all dying within a few minutes.

-The Fauble Stores are showing more bath robes than all of Bellefonte's other stores, combined. The right kind of prices that will please.

AT THIS TIME OF YEAR. -The word catarrh means literally to flows down, and it has been observed that nasal catarrh has a downward course internally, and if neglected affects the lungs and brings on consumption. At this time of the year, this form of catarrh is greatly aggravated. The discovery of the constitutional nature of this disease led to the administration of a constitutional remedy for it, and the best of which we have any knowledge is Hood's Sarsaparilla—it radically and permanently

A dispatch from Lewistown, under date of December 1st, says: The third in-ceudiary fire within ten days occurred at an early hour that morning, destroying the car shed and five cars at the power house of the Lewistown and Reedsville electric company and entailing a loss of \$10,000. His Bride Died of Glanders.

Wedded Only a Week, With No Cure for Awful Disease. While driving to Bridgeton, Conn., to

make purchases for her wedding outfit, Miss Emma Reichell, 24 years old, contracted glanders from the horse she was driving and Friday night she died, a bride of but a week. It was believed at first that she was

only suffering from rheumatism and would soon recover. An expert bacteriologist diagnosed the case as one of farcy, which is contracted from glanders. When the young husband was informed that there was no cure for his afflicted wife his agony was heart-rending.

TT'S IMPOSSIBLE.

TO DISPROVE FACTS. IT IS DECIDEDLY EASY TO VERIFY BELLEFONTE OPINION.

Nothing by way of an introduction could be added to the experience and opinions given below, which could increase their value. Bellefonte people can safely be left to draw their own conclusions based on such convincing proof, as this citizen offers. What is there lacking in evidence like this to satisfy a dyed-in-the-wool doubting Thomas?

Walter Whippo, formerly of Water street leading horse shoer of Bellefonte says: "I have a good word to say for Doan's Kidney Pills. I was miserable with backache and lameness across my loins. I knew it was from my kidneys for I had suffered from it prior to that. Sometimes I could hardly straighten after bending forward which greatly interfered with my work. I learned about Doan's Kidney Pills procured them at F. Potts Green's drug store and began using them. I had drug store and began using them. I had taken other medicines and worn plasters but I never had anything act as promptly as Doan's Kidney Pills. I have been quite free from the trouble ever since."

ST. NICHOLAS FOR 1904.

IT WILL BE MORE INTERESTING, AND BETTER IN EVERY DETAIL.

ST. NICHOLAS is thirty years the best and best beloved of children's magazines! "I know of no magazine here or in England which will compare with it," says Rebecca Harding Davis. "The children of this generation are fortunate in having such a magazine," adds Lucy Larcom. "Nothing that has ever come into my household of children has been in equal degree the stimulus to their artistic and literary tastes," is George W.

And St. Nicholas for 1904 will be more entertaining, and better than ever before. B. L. Farjeon wrote before his death a delightful story called "A Comedy in Wax." It has adventure for the boys, fairy doings for the girls, and a pretty bit of a love story for their elders; and will run through several numbers. Then there will be other stories, short from Ruth McEnery Stuart, Berth Runkle, Cyrus Townsend Brady, Joaquin Miller. Gabrielle E. Jackson, Elliott Flower, Grace MacGowan Cooke, Frank R. Stockton, Albert Bigelow Paine, Julia Ralph, Laura E. Richards, Tudor Jenks, Lieutenant Schwatka Margaret Vandegrift, Howard Pyle, Charles F. Lummis, and scores of other well-known

writers. The list of verse writers and artists, some of the very best in the land, who have promised their work to St Nicholas in the next twelve months is a long one. Some of the interesting articles, all of which will be splendidly illustrated, will tell of Japanese athletics for American boys, some queer mail carriers, in-teresting signs of old London, children in the White House, the Emperor Hadrian's wall, day with Hudson Maxim, how some animals sleep, secret alphabets, diving for pearls, historic dwarfs, and many other fascinating subjects.

To-day is a good day to subscribe. No girl or boy should be without St. Nicholas. Only three dollars a year, and that small sum means limitless pleasure and profit for the young people in the home.

The Magazine is an illustration of what can be done in setting a standard and keeping it so far beyond rivalry in a special field that there is no second.—Salt Lake City Trib-

## THE CENTURY FOR 1904.

CAN YOU AFFORD NOT TO HAVE THE CEN-TURY THE COMING TWELVE MONTHS.

The Century for 1904 promises a wealth of reading and pictures that surpasses even the high standard achieved during 1903. Perhaps most notable of all the strong features of the volume will be Dr. S. Weir Mitchell's "The Youth of Washington," told in the form of an autobiography. It will be a daring and unique piece of historical work, written as if it were done by General Washington himself, sitting down in Mt. Vernon in his old age and recording, solely for his own eye, the story, of his youthful life. Then there will be a series of articles on

"Italian Villas and Their Gardens," written by Edith Wharton and illustrated, largely in color, by Maxfield Parrish. Ernest Thompson Seton has prepared "Fable and Woodmyth," brief papers in a new vein, the illustrations in the author's most fantastic and amusing style. Early numbers will bring John Burroughs's "Current Misconceptions in Natural History." Already have commenced the important Thackeray letters, telling the story of the great novelist's friendship with the Baxter family of New York, with facsimiles of manuscripts and drawings by the author. Ray Stannard Baker, whose articles on the Great Northwest and the Great Southwest have been leading and widely acceptable teatures of recent volumes, will continue his notes on these regions; and there will be valuable contributions by Jacob A. Riis, Dr. James M. Buckley, and scores of other notable writers.

Fiction of the volume will include Jack London's strong new novel "The Sea-Wolf," Maud Wilder Goodwin's clever "Four Roads to Paradise," and a wealth of short stories from Anne Douglas Sedgwick, J. J. Bell, Maurice F. Egan, Roy Rolfe Gilson, E. L. Sabin, S. Weir Mitchell, David Gray, Gouverneur Morris, Albert Bigelow Paine,-the list might be indefinitely lengthened.

The artists whose work will appear in the Century for 1904 include the best of the day. It is not a question for any cultivated thinking man or woman to-day, Can I afford to take the Century this year? The question is rather, Can I afford NOT to take the Century?
