

**PATRICK CLARK.**—At noon yesterday Patrick Clark, an affable, honest old gentleman who lived on Water street, passed away. He had reached the ripe old age of 86 years and for nearly half a century had been a resident of this place.

Having been born in Ireland he came to this country fifty-five years ago and ten years later located in this community where he lived an honorable, upright life. He was a bachelor and made his home with Mrs. MacDonough.

Interment will be made tomorrow morning after mass for the repose of his soul has been celebrated in St. John's Catholic church. The hour appointed is 9:30.

**MRS. THOMAS J. KISTER.**—Emma, wife of Thomas J. Kister, died at the home of her father, Thomas Edmunds, at Aaronsburg, on Wednesday morning, at the age of 39 years.

Wish her husband she had made her home at Odell, Ill., where she became ill and, longing for the home of her childhood, was brought back with the hope that she would get better.

Her husband and little son, her parents and five brothers and sisters survive her. Interment was made in the Reformed cemetery at Aaronsburg on Wednesday afternoon.

**George Kahl,** aged 79 years, died at his home at Greenburg, on Wednesday morning. Rev. Wetzel officiated at his funeral on Friday.

**HICKS PREDICTS COLD WEATHER FOR FEBRUARY.**—Rev. Irl R. Hicks, the weather prophet, predicts that there will be plenty of storms and snows this month. He says the weather will be as follows:

By the 1st, a marked change to warmer will be passing from west to east over the country, the barometer will be falling in the same order, and general storm conditions will be apparent. About the 2nd to the 4th general rains may be expected in the south, with winter lightning and thunder on and about the 4th. Behind the area of warmth, rain and low barometer, a genuine blizzard is apt to come out of the northwest, and follow the track of low barometric pressure far into the south and east. This is a time when one of the most general and destructive sleet storms of the winter may be counted on, and the culminating stages will be on and touching the 4th.

The second storm period will be central on the 6th and 8th. Owing to the pressure of the Mercury disturbing, the very low barometer and storm conditions prevailing at the previous, or first storm period, may not disappear at the normal time, but run into the reactionary period. In such event, violent storms of rain, sleet and snow will develop and run their course about the 6th, 7th and 8th. One of the most general and severe cold waves of the winter need not be a surprise, as a sequel to the storms and very low barometer at this time.

The usual change to warmer will set in to the west about the 11th, the barometer will fall as winds shift to easterly and southerly, cloudiness will gather in the low barometric area, and storms of rain, turning to snow at the last, will take their course eastward across the country during the 12th to 16th.

The fourth storm period is central on the 18th and 19th. This is one of the periods we put down as problematical. Should the low barometer and the higher temperature, which as a rule attend the new moon, not disappear about the 15th to 17th, the 18th and 19th will be culminating days of very decided storms. On and touching the 19th, winter lightning and thunder with storms bordering on the tropical in the South, will be quite probable and natural. Such storms should they appear to the south, will have a counterpart in the way of boreal storms and blizzards down out of the northwest, followed by very high barometer and a cold wave.

About the 22nd a change to warmer will appear to the west, falling barometer will attend the rising temperature, and from about the 24th to the 27th look for general rains first, followed by falling temperature and turning to snow.
