Roosevelt's Absurd Order.

The President is sometimes amusing though rarely instructive. He has been amusing the world again by issuing an order against pernicious activity in politics. That is to say he has declared that employees of the Federal government must not participate in local political movements, party conventions, or become members of political committees. The obvious purpose of this order was to restore himself in the confidence of the Civil Service reformers. He has somehow got the notion that this class of voters will cut some figure in the coming election.

Mr. ROOSEVELT doesn't appear to notice how absurd such on order must seem to intelligent observers in view of the fact

OLD SOLDIERS MEET. -The forty-third annual reunion of the survivors of Company E, 45th regiment, P. V. I., was held last Friday at the home of Lieut. A. W. Harper, in Philipsburg. Comrade Harper proved a very agreeable host. All the morning he was kept very busy receiving the charge of the enemy and, though he fought valiantly he was finally overpowered and compelled to surrender body, home and all. But even in captivity he proved himself such a pleasant entertainer that the opposing forces eventually withdrew after completely demolishing a most sumptuous repast, leaving comrade Harper in full possession of the battlefield.

The actual warfare began promptly at 12:30 when the old veterans sat down to a table filled to overflowing with the very kind of ammunition a soldier likes. Following an invocation by J. G. Heberling comrade W. H. Musser took command and directed the charge. When everybody was on the verge of exhaustion the charge ceased and the entire body fell back on the drum corps which revived the wearied soldiers with some inspiring martial music. Concluding to bivouac on the battlefield for the time being Capt. C. T. Fryberger, in a very cheerful address of welcome, ordered the lighting of a campfire and good sized logs of memories of the days of '61 to 65 were heaped on the blazing fire by comrades W. H. Musser, J. G. Heberling, John R. Lemon and J. R. Pheasant.

In a very neat speech Capt. W. H. Fry, on behalf of the survivors of the company, presented to Lieut. Harper a beautiful silver headed cane, appropriately inscribed. Capt. Fryl erger accepted the gift for Lieut Harper. A group photograph of those present was taken, after which it was voted John R. Lemon, in Gatesburg. W. H. Fry, J. G. Heberling and John R. Lemon were appointed a committee to draft memorial resolutions on the deaths of comrades

Company E went to the front in 1861 one hundred men strong. Two years later it was recruited to 190 men. At the reunion last Friday just fourteen old comrades were present, as follows : A. W. Harper, J. R. Lemon, J. C. Heberling, Wm. Ellenberger, J. R. Pheasant, Jacob Barto, W. H. Musser, Joseph Meyers, I. M. Min-Dennis, T. A. Jackson and W. H. Fry. A number of comrades' wives were also present, as were some other guests.

Among the engagements in which the Company took part during its four and one-half years service were James Island, Fort Pedaski, South Mountain, Antietam, Fredericksburg, Jackson, Jamestown, Vicksburg, Cumberland, Beaver Springs, Campbell Station, Knoxville, Wilderness, Spottsylvania, Petersburg and Lee's surender.

#### Domestic Science as Part of a College Course.

In the last issue of the WATCH-MAN was published an outline of the new course for women at The Pennsylvania State College. Domestic Science is offered as one of the Junior year subjects and that anything so practical should now be ranked with classics and the languages ought to over-rule the objections usually mestic life. Not only in the home but as preparation for teaching is this a most valuable course, for although in the East it has been introduced into but few of the public schools, it is a feature of schools West and has been so successful there that there will soon be a demand for it in all schools and for the women who can teach it.

PHILIPSBURG'S BIG PROSPECTS .- In a

recent issue the Philipsburg Journal says : We have it on good authority that one of the leading mining corporations in this country is now negotiating for the purchase of 5000 acres of coal lands in the vicinity of Philipsburg, involving the largest transaction that has ever taken place in this part of the State. We are in position to give out much more than we dare at this time, but suffice to say that if the deal offered that college training unfits for do- goes through it will mean the development of the greatest body of coal ever secured by any one company in the Clearfield bituminous coal region.

> The corporation has no superior in this country in mining circles, and it is gratifying to know that if negotiations are closed the company will put in several plants near the town, which will mean great things for Philipsburg.

ostications for September :

From about September 5th to 17th, to an annual period in which the earth passes a maximum or electrical disturbances. As early as the 7th look for growing warmth and falling barometer and other dreaded indications of approaching storms. About the 7th to the 10th wide reaching and severe storms of rain, thunder and wind will travel over most of the country. This is a time when dangerous equinoctial gales and hurricanes are more than probable in all the gulf and South Atlantic coast regions. Very warm weather will precede and attend these storms, and tornadic developments may be expected over very many inland sections. At the winding up of these disturbances, a rushing high barometer and cold, northwesterly gales will come out of the northwest attended with frost in northerly sections. In every probability some of the most general and violent storms of the month will transpire within forty-eight hours of noon on the 24th. This is a time when danger from high tides and equinoctial hurricanes should be apprehended along all seas and coasts most exposed to such visitations. The last stages of these disturbances from the northwest will bring touches of early snow with high barometer, cold winds and frosty nights.

September will come to its close growing decidedly warmer, the barometer will be falling in the western states, with areas of cloudiness and rain gathering and moving eastward. By the 30th well defined storms will be noted in the west, which will advance eastward over the country during the 1st and 2nd days of Oct.

Experts from State College and the State Veterinary department have examined the cattle. but so far have been baffled in finding a remedy or even a name for the disease. The State College experts define it as a mountain disease and very fatal.
