#### Selfish but not Candid. Senator PENROSE, chairman of the Re-

publican State committee, has addressed a

circular to all the manufacturers of the

State urging them to contribute to the Re-

publican campaign fund. The reason he

assigns for this intrusion into their affairs

is that funds are needed to save a number

of Congress districts from the Democrats.

The preservation of the tariff is involved,

he assures them, and for that reason they

ought to create a campaign fund adequate

to effect a complete debauchery of the

ballot, and a reversal of the present condi-

tion of public sentiment in Pennsylvania.

If things continue as at present, Senator

PENROSE declares, inferentially, the Demo-

crats will carry eight or ten districts, which

The public, especially the Democratic

people, ought to be grateful to Senator

PENROSE for this insight into the political

situation as it appears to him. Of course

he is not altogether candid with his cor-

respondents and he only lets them know

half the danger that menaces the tariff

pensioners, though it may be assumed that

he exaggerates the necessity for money.

The assessment upon federal, state and

municipal officers will provide vastly more

money than can possibly be expended in

legitimate campaign expenses. It is said

that Philadelphia alone will contribute

\$150,000 and Pittsburg half as much more.

Bloody Battle Now Raging.

MUKDEN, Oct. 11.-11 p. m. - A bloody battle is now raging about six miles north of Yentai railroad station. The Japanese on Sunday fell back along the whole front and the Russian advance guards crossed the Schili river, about half way between Muk-den and Liao Yang, and came within three miles of Yentai, but yesterday the Japanese received strong reinforcements of infan-try and artillery and not only held their position but even assumed the offensive. The fighting lasted the entire day and night. The Japanese directed their artillery fire with great skill and searched the Russians fell back north of the Schili river, and engaged the Japanese two miles south of it. A terrific artillery engagement is proceeding along the entire front. The result of the battle is still undecided.

MUKDEN, Oct. 11.-7:45 p. m.-A Russian correspondent telegraphs as fol-lows: "I have seen a number of the wounded who have been sent back from the front. It is impossible at present to enter into the details of the operations on foot, but the men interviewed are infinitely better spirited than were those who were wounded when we were retreating. Everyone is confident and the men are anxious to finish the war in order to get back home. None of them, however, has any idea of going home except as victors. We have enough troops and the one determination of officers and men is to wipe out the Japanese.

MUKDEN, Oct. 12.-2:40 p. m.-Stubborn fighting is still in progress this being the third day of the engagement. It is impossible at this time to say what bas Roosevelt's Administration. Doubtless Mr. Cortelyou is satisfied with the Trust's been accomplished.

Hospital trains are continually arriving from the south. The wounded are being sent further north. A dressing station has been established on the railway platform here, where nurses and surgeons give prompt attention to the most urgent cases efore the train proceeds.

Science at State College Supported By the Federal Government.

The bureau of animal industry of the U. S. Department of Agriculture has assigned one thousand dollars of the recent congressional appropriation for experiments in animal breeding and feeding to the co-operative investments with the respiration calorimeter now in progress at The Pennsyl-vania Station. Plans have been made for an investigation upon the influence of age and individuality upon the metabolism of cattle and two full-blood yearling steers, one an Aberdeen Angus and one a Jersey, have been purchased for use in the investigation

Careful records will be kept of the food consumed and the rate of growth of these animals. In addition, occasional digestion experiments will be made with them to

determine the assimilability of the food and the actual production of lean meat; while each winter there will be made, with the aid of the respiration calorimeter, scientifically accurate determinations of the actual gains of lean meat and fat respectively. It is expected to continue the experiment until the animals are mature. In this way, it is hoped to secure more exact knowledge as to the actual points of difference in the feeding qualities of the dairy beef types of cattle, while at the same time valuable data will be obtained as to the nature and economy of the growth made at different ages.

#### Bees Clear a Battlefield.

Over 100,000 honey bees were killed during the fire at the Eureka Paper Mills, in Bridgeport, the other day. As soon as the smoke had rolled away and the charred remnants of their homes had cooled the little insects, human-like, set to work cleaning up. Apparently, an ambulance corps was formed, numbering several hundred bees. These began getting out of the way their dead comrades, many of them killed by stung firemen, and the way they worked suggested the work that must be going on daily on the Russo-Jap battle-fields. Each bee tackled a dead one and struggled away with it, and as the field was strewn with thousands, they have been employed the past few days.
