Dynamite Bomb Kills Ex-Governor

Boise, Idaho, Jan. 1.-It has developed that the assassination Saturday night of former Governor Frank Steu penberg with a dynamite bomb was perpetrated by some one in person by pulling a wire that exploded the dynamite as the former governor was closing the rear gate of his home. It was at first thought that the bomb was arranged to explode automatically when the gate was opened. It also developed that two bombs were used, both reached in seventy-eight miles. being exploded simultaneously by

means of wire and waxed fish line, remnants of which were found later on the lawn.

The conviction grows that Steunen berg was murdered as a result of his activity in crushing the miners' strike riots at Coeur d'Alene in 1899. On this theory, one man was arrested, but his name is kept secret by the police, who say evidence against the prisoner is strong. Five other men have been Record. detained on suspicion.

When daylight dawned on the scene the victim's left as he entered, but the

force of the explosion caught him on the right side, showing that he turned partly around in closing the gate be fore the bombs exploded. This fact, with the finding of the wire and fish line, make the police certain that the mine was fired by a wire. The assas-

sin, it is though, knew Steunenberg's habit of stopping to close the gate, and waited until the former governor turned. It seems that the assassin knew Steunenberg's habits, since a strange

would have supposed that he would go in the front gate. Steunenberg was terribly wounded, the right arm being nearly torn off. All his right side was fearfully torn, the right leg being man-

gled and shattered. The features of the victim were not disfigured. Portions of clothing were scattered for fifty yards. The victim himslef was thrown 10 feet from the gate, where a small hole, 10 inches in depth, shows

the spot where the bombs lay. The gate is gone, not a splinter being

A remarkable railway, one of the wonders of Peru, is that which runs from Callao to the gold fields of Cerro de Paeco. Beginning in Callao. It ascends the narrow valley of the Rimao, rising nearly 5,000 feet in the first forty-six miles. Thence it goes through the intricate gorges of the Sierras till it tunnels the Andes at an altitude of 15,645 feet, the highest point in the world where a piston rod is moved by steam. This astonishing elevation is

Peru's Railway Wonder.

To Treat a Sprain.

The most successful treatment for a sprain is use of hot footbaths for fifen minutes three times a day. Follow each bath with massage for fifteen minutes, then apply snugly a rubber bandage from toes up to as high as ankle and have patient walk. Ballet dancers use this method with such success that they are seldom incapacitated for work longer than a week .-- Medical

When daylight dawned on the scene of the tragedy, it was found that the dynamite had been exploded by pull-ing a wire. The exploseive was placed against the latch post and on the in-side of the fence. That post was to Supply. Benefit Guaran funded. All druggists.
