short, if you wish to secure a training that will fit you well for any honorable pursuit in life.

THE PENNSYLVANIA

STATE COLLEGE

OFFERS EXCEPTIONAL ADVANTAGES.

tuition is free in all courses.

MAKING EFFECT IN SEPT. 1906, the General Courses have been extensively modified, so as to furnish a much more varied range of electives, after the Freshman year, than heretofore, including History; the English, French, German, Spanish, Latin and Greek Languages and Literatures; Psychology, Ethics, Pedagogics, and Political Science. These courses are especially adapted to the wants of those who seek either the most thorough training for the Profession of Teaching, or a general College Education.

The courses in Chemistry, Civil, Electrical, Mechanical and Mining Engineering are among the very best in the United States. Graduates have no difficulty in securing and holding positions.

YOUNG WOMEN are admitted to all courses on the same terms as Young Men.

THE FALL SESSION opens September 15th, 1906.

For specimen examination papers or for catalogue giving full information respecting courses of study, expenses, etc., and showing positions held by graduates, address

THE REGISTRAR,
State College, Centre County, Pa.

F. H. THOMAS, Supt.

are immediately to be shipped to New York and thence by way of the W. G. Grace & Co., line of steamers on an 8,000 mile voyage direct to Punta Arenas. As the earth scooped out of the placer paying banks is worth at a minimum 50 cents a cubic yard in gold, and it costs 10 cents a yard to get it out, these three dredges will dig out gold worth \$2,400 every day, a total of about \$875,000 a year. The shovels are operated on rails and the dirt taken into the town of Punta Arenas a matter of 15 minutes' walk. The city is on the Straits of Magellan and shipment easy.

Charles H. Sharp, civil engineer of the Denver & Northwestern railroad, the Tramway's electric line of Golden and Leyden, was the man selected by Mr. Bush to go to the South American gold fields as an assistant engineer. Mr. Sharp will be absent for three years from Denver. He will take his family with him on the long trip and will have all his expenses paid. For working the machines Mr. Bush has hired a dozen craftsmen and engineers, all expert men, at salaries of \$125 to \$160 a month on two year contracts. These men also will have all their expenses paid on the trip and their salaries begin when they sail from New York.

"That extreme southern portion of Tierra del Fuego is a great country," said Mr. Bush yesterday. "I heard about the resources of its gold producing section while up in Alaska and determined to go there and take a chance. I had lost more than \$8,000 in three years in Alaska, getting off cheaply at that. I thought, and so started for that country, more than two months' sail away from Alaska by steamer. I have been there four years now, have cleaned up \$60,000 clear the past year and will get more than a million more out of my holdings. I worked three years straight prospecting and taking up claims. I could secure. I went to the country 'broke' and now the company which I formed at Santiago, Chile, has 20,000 of gold bearing land, 330 acres of which we are working now with great success.

NO WILD CAT MINING ALLOWED IN CHILE "After I had found the right properties I went out to get capital to form a corporation and in six days I raised £100,000 or \$500,000 cash in United States money. I had to have the money in the bank and a receipt for it before I could get a corporation charter from the Chilean government, for they are very strict about such matters there. There's not much chance for a wild-cat mining concern there for you have to have your money all paid in before you can form a company. The people are speculative in their tendencies, however, and are always willing to take a chance in any business that looks good to them.

"Tierra del Fuego is one of the greatest sheep raising countries in the world. The Tierra del Fuego Exploration society has one ranch with 1,000,000 sheep on it, the largest sheep farm on the globe. Cattle are of course raised, but only for home consumption. Livings are very cheap there, beef bringing only five cents per pound and other meats like prices. In my town, Punta Arenas, there are close to 15,000 people, but there are only five of us Americans and each of us has cleaned up a fortune. Any bright American young man can go there and make lots of money. We would be glad to see American capital and push come in. A young man with \$10,000 capital there can do as well as he could with \$150,000 or \$200,000 here.

"It is a pleasant country to live in, although amusements are limited. The temperature, the lowest I have ever known it,

has gone down to four degrees above zero. The ground in winter months, July, August and September, is never frozen over an inch or two on the surface. The highest temperature ever reached is 76 degrees Fahrenheit in the summer.

GREAT CHANCE FOR CAPITAL OF AMERICANS.

"There will be five dredges in operation in Tierra del Fuego next year, four of them belonging to us. I consider it one of the coming mining regions of the Western hemisphere. There is plenty of copper there and also gold-bearing quartz, but all the prospecting I have done so far has been with a view to placer mining. Mining or civil engineers can do well in that country and I advise them going there.

"The buildings in Tierra are principally galvanized iron. That is wooden frames are erected and the siding and roofs are of corrugated iron. The interiors are sheathed and then papered. In the way of buildings, plasterers, lathers and painters would do very well in the country. Punta Arenas is a free port for all import goods and Americans ought to go after the trade there. Why, fellows who started there 10 years ago without a cent are now worth \$200,000. Lots of Europeans have done that and they didn't half try. There is now 100 per cent. profit in almost every line of goods that are in demand. I would especially recommend American hardware as a line which would be greatly in demand. It is far better than the German line of goods and would sell like hot cakes.

"Money is very easy and there is lots of it in circulation. Money brings interest of from 10 to 30 per cent. per year and the banks will loan on the best security for 12 per cent."

With Mr. and Mrs. Bush is a niece, Miss Martha Hanley, of Medford, Oregon, who will spend the next two years in Tierra del Fuego. Mr. Bush married three years ago, his fiancée going from San Francisco to Punta Arenas, a 47 days' sail, for the wedding ceremony.

The First Breadmaker.

I wonder if you know how people first learned to make bread? I will tell you, because it is a very funny story, says a writer in the London News.

Long, long ago in Athens there lived a Magistrate, who among his slaves had a cook who used to make little cakes of flour and water for his master's table. For in those days no one had thought of fermented bread, as we know it, and had to put up with rather heavy cakes.

One day the cook in question put some dough in an earthen bowl and forgot all about it until he found it some days after quite sour. The slave was going to throw it away, for he dreaded his master seeing this proof of waste, when he should appear but the Magistrate himself, so his cook just turned the sour dough into some flour and water he was kneading up for cakes. But oh, what cakes they were! quite different to anything that had been baked before, for the dough had fermented and become yeast, so that the bread rose up most beautifully, and everyone who tasted it, cried, "This is something like bread!"

Of course, the poor slave was pleased enough, and confessed what he had done. But after this every one wanted sour dough to mix with their fresh flour and water, and so they opened bakers' shops.

Some New Facts About Animals' Eyes

For some years past the eminent British ophthalmologist, Dr. Lindsay Johnson, has been investigating the eyes of animals, and has made some valuable discoveries of great interest to zoology and our knowledge of the evolution of various animals. One of the most remarkable of these researches is a confirmation of Darwin's theory that man is closely related to the primates. From his investigations Dr. Johnson has found that the eyes of all the apes, including man, are practically identical. Each has the highly complex system of veins and arteries, and the direct or parallel vision. According to this authority, the dog has two ancestors, one round-eyed and the other oval-eyed. The first is the hyena, and later the bear through the racoon. All animals exposed to chase by enemies, such as the hare, rabbit, and squirrel, can see all around, and all the rodents squint. The lower an animal in the scale, the further is its eye from parallel vision. According to this authority also, the corpus nigra, or black body of pigment, in the eye of the horse, which has proved such a source of speculation to the naturalist, veterinarian, zoologist, reveals through the ophthalmoscope a new means of tracing the ancestry and relationship of the horse. The eye certain is precisely the same as that which is found in all tropical animals, such as the onaga, camel, antelope, etc., and fulfills one important function—the protection of the eye from sunlight.

Dr. Johnson's researches, according to Prof. Ray Lankester, the celebrated zoologist, will necessitate a reclassification in one section of zoology.

Medical.

VIN-TENA for Depressed Feeling, Exhausted Vitality, Nervous Debility and Diseases requiring a Tonic Strengthening Medicine.

It cures quickly by making Pure Red Blood and replenishing the Blood Supply. Benefit Guaranteed or money refunded. All druggists.

Medical.

SPRING HUMORS

Come to most people and cause many troubles, pimples, boils and other eruptions, besides loss of appetite, that tired feeling, fits of biliousness, indigestion and headache.

The sooner one gets rid of them the better, and the way to get rid of them and to build up the system that has suffered from them is to take Hood's Sarsaparilla and Pills, which form in combination the Spring Medicine par excellence, of unequalled strength in purifying the blood, as shown by unequalled, radical and permanent cures of

Salt Rheum
Boils, Pimples
Psoriasis
Rheumatism
Dyspepsia, etc.

HOOD'S SARSAPARILLA AND PILLS

No substitutes act like them. Insist on having Hood's.
