MAKING PORCELAIN.

The Most Exciting and Romantic Trade in the World.

The maker of porcelain and pottery has decidedly the most exciting and romantic trade in the world.

The great factories of Sevres and Dresden were founded by Bernard Drellsen. This man invented white enamel, but it took him sixteen years to make the invention—sixteen years of hunger, misery and persecution, which culminated in the episode, used in H. A. Jones' play of "The Middleman," wherein Pallas maintained his furnace fire by burning all the furniture in his house and finally opened the furnace door to find within the glaze which he had sought throughout the best years of his life.

Bottger invented hard porcelain. He was an alchemist, and one day, chancing to discover that his powdered wig was unusually heavy, he inquired the cause and found that the weight was due to the kaolin with which the wig was powdered. This kaolin was the substance for lack of which Bottger's investigations had for years failed.

When Elers opened a porcelain factory at Burslem he employed none but the most stupid and illiterate workmen, so that his secret processes might not become known. But Samuel Astbury resolved to learn the Elers method, and affecting ignorance and stupidity, he got a place in the factory, mastered all of Elers' secrets and eventually opened a plant of his own, wherein he duplicated in every detail the work of Elers-Exchange.

MANY, MANY DOCTORS.

A Sixteenth Century Wager That Might Be Won Today.

The story is told in Joubert's "Popular Errors Concerning Medicine," published at Bordeaux, France, in 1574, that one Gonnelle, a jester at the court of the Duke of Ferrara, insisted one upon a time that the trade which had the most followers was that of doctors. To prove his assertion he left his home one morning to go to the palace with his nightcap on and his jaws wrapped up. The first person he met stopped him with the question, "What is the matter with you, Gonnelle?" "A terrible toothache," "Oh, is that all? I'll tell you what will cure it." And every person he met had some advice to give him.

When the jester reached the dukes chamber, the same question and answer were repeated. "Ah," said the prince, "I know of something that will take the pain right away." Gonnelle instantly threw up his kerchief, saying, "And you, too, monseigneur, are a doctor? I have only passed through our street in coming from my house to you and have counted more than 200 of them. I believe I could find 10,000 in the city." Whether the story is true or false, it could be told again in our days, and Gonnelle would win his wager without dispute.

The Stars Were Once Human Eyes. The most remarkable belief or superstition concerning the human eye is one that is current in Australia. Among the natives of that country it is the general belief that the left eye of every chief becomes a star the moment the chief in question is done with it. The sun, they say, is the eye of the "greater god" and the moon the eye of the "lesser god." All the stars were once the left optics of human beings of high rank. Shungie, a celebrated chief, once ate the eye of a valiant chief, thinking thereby to increase the brilliancy of his own "eye star." But the eye burned through Shungie's belly and killed him, whereupon his own left eye became joined to the one he had eaten, and the two may now be seen as a beautiful double star lying just to the east of the Southern Cross.

Liquid Corn.

An easterner was prospecting in the north Georgia mountains when he came on a native apparently clinging to the side of a steep hill tilling corn. The prospector stopped for a chat, and the mountaineer, nothing loath for a rest in the shade from his fatiguing toil, was agreeable.

"Say, friend, how in the world do you get the corn down off that hillside after it is ready for harvest?" asked the stranger.

"In jugs," was the laconic and probably truthful reply.—Atlanta Georgian.

Colleges & Schools.

IF YOU WISH TO BECOME.

- A Chemist.
- An Engineer.
- An Electrician.
- A Scientific Farmer.
- A Teacher.
- A Lawyer.
- A Physician.
- A Journalist.

Let it, if you wish to secure a training that will fit you well for any honorable pursuit in life.

THE PENNSYLVANIA STATE COLLEGE

OFFERS EXCEPTIONAL ADVANTAGES.

TUITION IS FREE IN ALL COURSES.

Making effect in Sept. 1906, the General Courses have been extensively modified, so as to furnish a much more varied range of electives, after the Freshman year, than heretofore, including History; the English, French, German, Spanish, Latin and Greek Languages and Literatures; Psychology; Ethics, Pedagogics, and Political Science. These courses are especially adapted to the wants of those who seek either the most thorough training for the Profession of Teaching, or a general College Education. The courses in Chemistry, Civil, Electrical, Mechanical and Mining Engineering are among the very best in the United States. Graduates have no difficulty in securing and holding positions.

YOUNG WOMEN are admitted to all courses on the same terms as Young Men.

THE FALL SESSION opens September 15th, 1906. For specimen examination papers or for catalogue giving full information respecting courses of study, expenses, etc., and showing positions held by graduates, address

LACE BARK TREES.

The Beautiful and Serviceable Dress Materials They Yield.

There are in all about half a dozen lace bark trees in the world, so called because the inner bark yields a natural lace in ready made sheet form, which can be made up in serviceable articles of apparel. Only four of these curious species of trees are of much practical value. Tourists who have stopped at Hawaii or Samoa may recall the lace bark clothing of the natives—clothing of a neat brown color when new, of remarkable strength and of a fragrant odor, like freshly cured tobacco leaf. The native tapa cloth, as it is called, is made from the bark of the Brunonia papirifera, but it is not usually included among the real lace bark trees. In its natural state the real lace bark is of a delicate cream white tint. It is probably a kind of fibrous pith. When the outer bark is removed it can be unfolded and unwound in one seamless piece, having a surface of a little more than a square yard. Washing and sun bleaching give it a dazzling white appearance. The fabric is airy light. It is used in the West Indies for mantillas, cravats, collars, window curtains—in a word, for every purpose that ordinary lace is used. In making up shawls, veils and the like it is customary to piece two sheets of lace bark together. Delicate and apparently weak as it is in single mesh, a bit of lace bark if rolled into a thin string will all but resist human strength to break it.—New York World.

UNCONGENIAL FLOWERS.

Mignonette and Roses, For Instance, Will Not Mix.

The florist frowned as he took up an order for a table decoration. "That will never do," he muttered. After calling up the customer and suggesting a change, he told his new clerk a few things.

"You must never take an order that calls for a mixture of mignonette and roses," he said. "A centerpiece of those two flowers wouldn't last half through the luncheon. They simply wilt one another. I don't know why, but they can't get along together."

"It is true of many flowers. Pansies, for instance, last twice as long if they are not combined with any other flower, and the same may be said of violets. Jonquils and daffodils, on the other hand, seem to get a new lease of life if you combine considerable green with them. Carnations will go all to pieces if you combine them with roses, although the roses do not seem to be affected."

"It is more striking in combinations of green with flowers. If you try to use an entirely different type of foliage from what the flower is used to, it won't last so long. So I never put feathery foliage with lilies of the valley, for you know its natural foliage is a thick leaf. I never use thick leaves with carnations, for their foliage is of the feathery type. It isn't as though the flowers fought, but they seem to grieve at being misunderstood."—New York Press.

A Lure For Cock Robin.

Two coins clinked together give so good an imitation of the robin's metallic note that this device has long been employed in England to attract the welcome "harbinger of spring." Formerly male robins were snared by the clinking of two copper pennies near a dummy bird. The dummy was perched on a twig smeared with bird lime, and cock robin, attracted by the sound and suspecting a rival, flew at him with blood in his eye. This is in violation of the bird laws in the United States, and no one who lives where robins make their home in confidence is likely to give the odd trick so unpleasant a finale. The clinking coppers serve a much more agreeable purpose as a means of rendering cock robin sociable.

The Inns of Old England.

Efforts were continually being made in England to keep down the number of inns. In the reign of Edward I. there were only three in the whole of London. Even in 1532 no more than forty were legally permitted in the metropolis, now spreading out its boundaries on every side. York might have eight, Norwich, Exeter and Cambridge four, Bristol six and Oxford three. These regulations must have been set at naught in a very wholesale manner, for half a century later there were 400 "houses of call" in that part of London known as the City and no fewer than twenty-four clustered round Covent Garden. In mediaeval Oxford it was ruled that no "victualer" was eligible for the office of mayor, and this term included an innkeeper.

Fauble's Great Clothing House.

Let Us Help You Get Ready For the BIG 4th

All sorts of Men's Furnishings and some few really swell SUITS for Men and young Men at greatly reduced prices. You will find it worth while at the FAUBLE'S Stores.

FAUBLE'S

POINTED PARAGRAPHS.

Ignorance may not be bliss, but it is often contentment.

Everybody has trouble of some kind. What is the nature of yours?

The average wish is about as valuable as the check of a bankrupt.

People are confronted every day with little problems and do not know what to do with them.

Some men's idea of perseverance is to see how long they can cherish ill feeling for some real or fancied grievance.

No matter how busy a man is he thinks he isn't wasting time if he takes an hour to prove he was right in a most trifling question.

After you have worked hard and saved your money it makes you mad to be approached by a man who has spent his and is invited to go into a scheme that is solely for his benefit.—Aitchison Globe.

Queer Drummers.

"There's a story," said a drummer, "about a commercial traveler whose line was tunnels and post holes for fences. Him I never met. I did meet once, though, a drummer selling iron churches and suspension bridges. Another time I met a drummer who said his line was pupils. What did he mean by pupils? He meant, I found, glass eyes for stuffed animals, for dolls and for human beings. One of this man's favorite amusements was to open his sample case and ask the people present to pick out the eye that best matched their own. The people made awful mistakes in this, for nobody, it seems, knows the color of his own eyes."—Cincinnati Enquirer.

What Father Does.

Mothers may talk, work, struggle to make their sons models by which to shape a new heaven and a new earth. But the boy's world is in the man who is his father, and the boy believes that whatever may be right on Sundays or at prayer times the things that are really good, that really count in life, are what father does. Moreover, it is what father does which defines the means with which the boy shall work, the sphere wherein his efforts shall be shaped. In a word, what father does is the beginning as it is the end of the boy's achievements.—Harper's Bazar.

Preocious Fox.

Charles James Fox is probably the only man who ever made a maiden speech in the commons while still a youth in his teens. He was nineteen when he took his seat for Midhurst, and within a few months he had made three excellent speeches. And yet even at this early age Fox used frequently to sit up all night drinking and gambling.

An Explanation Wanted.

"I'd like to know," began the thoughtful boarder. "Would like to know what?" asked the boarder who knew it all. "I'd like to know how 'matches are made in heaven' when they keep all the brimstone in the other place."—Chicago News.

Bringing It Home.

Bob—"Don't you think that love is a species of insanity? Ethel—Sometimes. Who has been falling in love with you?"—Smart Set.
