Bellefonte, Pa., February 22, 1907.

FARM NOTES.

-To give a better idea of what the soil should be for each individual plant, we give below what is considered the ideal soil for each of the common garden crops:

-Celery .- Celery requires a deep, 1ich, moist, mellow soil. Even if the ground is should have a liberal application of ma-

-Cauliflower.-This plant needs a reason ably rich soil which contains considerable moisture at all times of the year. Any good soil which will raise potatoes is very good for this plant. One of the most important things is that it should have an

-The raito of seed to straw varies greatly. On rich land, manured with nitrogenous fertilizers the growth of straw is great compared to that of grain, and the same in wet seasons, being the reverse when the season is dry. To prevent lodging it is recommended by some that an application of lime and salt be applied in the chafing dish; cook for a moment; add two their contents merge, and the sheets fall on the land intended for the grain

-Onions. - A rich, sandy soil, containing plenty of organic matter, is considered the best soil for onions. In fact, if the soil contains a great deal of organic matter and is free from weed seed, the onion will make a profitable growth without there being any sand present. The soil should be moist and well dasined. Many have grown heavy crops of this vegetable upon drained swamps and other muck soils.

-Lettuce.-Lettuce requires plenty of nitrogen. It makes a growth of stem and leaf and not of fruit, and the soil should be Hollandaise. danger of selecting one too rich in organic matter. It can not get along without plenty of moisture, and the part of the garden known not to contain an abundance of moisture at all times of the growing season should not be used as a lettuce bed.

-Beets .- The common red garden beet may be grown in a variety of soils. However, the best soil is what is generally called a sandy loam. Naturally rich soils which have received several dressings of fresh manure in recent years do not make the ideal place for the beet. The growth will be excessive and watery and the quality inferior. The soil should, however, be reasonably rich, and, as said before, contain a little sand.

-Horse-radish .- This plant will grow, with practically no attention, in any rich soil where there is an abundance of water. It will even thrive and multiply along the edge of a wet place or in the field where an old straw heap has rotted down. If you a bed rather rich, and then sink a board 18 inches wide in the ground around the edge

from spreading and becoming a weed pest. -Cucumbers.-The soil for cucumbers should be a rich, sandy loam, rather moist, but not wet. They will do well upon a soil composed of a considerable amount of and cover with the sauce. clay if there are a number of summer show ers to keep the ground amply moist. If, however, there are no summer showers, the olay soil will readily dry out and the plants will fail to bear and probably die for want of moisture. Any soil which will raise 40 bushels of corn per acre will produce a profitable crop of cucumbers. The principal thing to observe in the selection of soils for this plant is the power of the soil to retain moisture. The crop requires considerable moisture during the dry months, and if there is not enough in the soil at all times the production of fruit will be great-

ly reduced.

-Beaus. - Beaus may be grown or almost any kind of soil. The ideal soil should be warm and mellow, containing a little sand. The soil for beans should be mellow, but should not be too rich in nitrogen. Therefore, if the organic matter which makes up a part of the soil has come from rich manures it will not make an ideal seed bed for beans. If the organic matter came from decayed straw the groud may be the ideal place for the bean plant. Heavy clay soils do not make an ideal place for the bean because there will not be enough moisture during the dry weather and the ground has a tendency to bake during the hot weather. It should be rememberd that the bean does not draw heavily upon the ground, but that it needs a mellow place in which to live. Hence, any mellow soil with a reasonable amount of food plant and a sufficiency of moisture will produce a good crop of beaus.

-Asparagus --- Asparagus will grow in a variety of soils, from the rich in organic matter to that inclined to be poor and compact. However, when the plant is to be preferable. It warms up earlier in the year, and this starts the shoots earlier than if it were a cold, compact soil. The spears | serve. produced on such soil are brighter and more marketable than those produced on black and wet soils. Soils in which water stands after a rain or which is slow about drying off in the spring should not be used as an asparagus bed. It is important to have the spears on the market as soon as possible in the spring and this can not be done if the soil is wet or if the water re-mains over the bed for a considerable length of time. The soil should also be free from roots, stones or any other trash which will not readily decay or will in any way interfere with the growth of the

-Cabbage.-This plant requires a soil rich in potash and one containing an abundance of moisture. Soils which have been well manured, but which have been allowed to lose some of their organic matter by decay, make good fields for cabbage. In other words, soils which have not been manured with barnyard manure for a year or two are ideal for cabbage. If you wish to grow early cabbage, you should see to it that the soil is mellow and warm. A little manure should be applied for this purious forms. pose, or, if you have it, you should select a soil containing a little sand. If you wish to grow a late cabbage the soil should be heavier and more retentive of moisture. Here is where many of us fail in the production of cabbage. We set the plants in a heavy, compact soil, and then wonder why we do not have cabbage as our neighbors. Or we set the late plants in a mellow, warm soil, and wonder why the heads burst long before we are ready to store

FOR AND ABOUT WOMEN.

DAILY THOUGHT. Our anger and impatience often prove much nor schievous than the things about which we are angry and mpatient .- Marcus Aurelius.

Mrs. Rorer, the well-known expert in cooking, speaks on "The Chafing Dish and Its Possibilities."

"For the family of wealth," she said, "or the one of moderate means, or even the very poor family, a chafing dish is of great value. Fortunately the cheaper ones do just as good work as the more expensive ones, and now, as the price of alcohol is moist, mellow soil. Even if the ground is considered reasonably rich for corn, it should be made richer by the application of well-cutted barnyand manage. There is of well-rotted barnyard manure. There is not much danger of making the ground too rich, and if the plant is not very rich it maid a chafing dish plays an important maid a chafing dish plays an important part in the supper maid's day out. for the rich it keeps every entree hot from the beginning to the end of the meal." These recipes were given :

Welsh Rarebit .- There are many ways of making this very popular dish. The best and most digestible is the one free from stringiness, the one soft and not tough. abundance of moisture, and if this is not Grate a pound of American cheese. Put whence it issues as a minute filament, contained in the soil, the plant should be four tablespoonfuls of ale or beer into the irrigated during the dry, growing months. dish; let it heat; add the cheese, one-half teaspoonful salt, a dash of red pepper, a teaspoonful of Worcestershire, two eggs well beaten. Stir and beat until the whole mass is creamy. Serve at once on toast or crackers.

Chicken Creole.-Put two tablespoonfuls red peppers cut into strips, a half dozen okra and a half-cup of tomatoes. When hot add a pint of cooked chicken cut into dice; add a level teaspoonful of salt, a baifteaspoonful of paprica, and serve.

In the afternoon the lecture was on Eight New Ways of Serving Eggs for Supper or Luncheon," and Mrs. Rorer gave hese recipes : Eggs Hongroise-Poach the eggs, put

them on carefully boiled rice; cover with paprica sauce. Eggs Benedict.-Poached eggs on broiled ham on quick muffius; cover with sauce

Eggs Jefferson.-These are also called eggs Coquelicot. Drop raw eggs into cooked sweet peppers in a small timbale cup. Stand them in a pan of boiling water; cook in the oven until set; turn them out on buttered toast; pour around cream or tomato sance.

Eggs Prescourt .- Poached eggs on thin sliced chicken on toast; cover with sauce Bearnaise

Eggs Philadelphia .-- Add a balf-pint of minced chicken to a half-pint of cream sauce; pour it over slices of toast; put on each a poached egg; put a little cream sauce over the top; cover with grated cheese; brown in the oven.

Eggs Richmond-Poached eggs on rice, covered with creamed mushroom sauce. Garnish with a little browning or melted

Eggs Mexican. - Put two tablespoonfuls of butter in a saucepan; add one chopped onion; shake until the onion is softwish to grow it in the garden with the brown; add three or four sliced okra, halfother vegetables, it is a good idea to select | pint of tomatoes, three sweet chillies cut in strips. Let these stew slowly for a few minutes. Drop the waw eggs into a shirring of the bed. This will, hinder the plant dish that has been buttered; stand them in the oven until well set. Garnish with sauce and send to the table.

> Eggs Creole.-The same as eggs Mexican, except that the eggs are bard-boiled

> "Potatoes," says Mrs. Rorer, in lecturing on "Potato Cookery," "are starchy foods and consequently must go over the fire in boiling water, and they are more mealy and more tasty if salted when done. Do not salt the water for any underground vegetable; but salt the vegetable after it is done. They must be boiled until they are just done; then drain, or they will absorb the water. If the starch cells are ruptured the potatoes will absorb the water and become soggy, if not carefully watched. For warmed over potatoes use boiled potatoes, either hot or cold. Baked potatoes can be made into stuffed potatoes, but cannot be used for other warmed over dishes, as they are heavy and solid." These recipes were given :

> Hashed Browned Potatoes.-Chop cold boiled potatoes rather fine; add to each pint about a tablespoonful of milk or cream and a palatable seasoning of salt and pep-Put a tablespoonful of butter into a shallow pan; when hot, put in the potatoes and press them down, making them perfectly level. Stand them over the fire and cook slowly until nicely browned. Turn over to one side of the pan and then out on a plate like an omelet.

French Fried Potatoes-Cut the potatoes into any desired shape; put them into a frying basket and down into a kettle of moderately hot fat; as soon as they begin to brown, turn them out on a paper in the bottom of a baking pan. When ready to serve, put them back into the frying basket and down into hot fat. Drain and

Hashed in Cream.—Chop sufficient cold the fishes were found floating feebly hoiled potatoes to make a pint. Make a on their backs. "Jane," called the anxfor market, a light, sandy soil is half pint of cream sauce; mix it with the potatoes; stand over hot water, covered, for twenty minutes, and they are ready to

> Potatoes an Gratin .- Make hashed cream potatoes; turn them into a shallow baking dish; dust thickly with grated cheese. Brown in the oven.

Potatoes Suzette.-Bake good-sized potatoes until perfectly tender; cut off the top; scoop out the potato, leaving a goodsized wall; dust the inside with salt and pepper and put in a tiny bit of butter; break into each one raw egg, and quickly press the potato that has been scooped out through a sieve; add butter and a little milk and press through a pastry bag around the edge of the potato. Bake until the egg is set. Serve at once.

At the afternoon lecture Mrs. Rorer spoke on "The Chafing Dish," and gave these

recipes : Scallops Newburg .- Hard boil the yokes of three eggs; press them through a sieve; rub a tablespoonful of flour and one of but-ter together; add a half cup of milk and when boiling add the yokes of the eggs

Chicken a la Creole. -- Cut a cold boiled chicken into cubes of an inch. Put a tablespoonful of butter and a tablespoonful of grated onion in a chafing dish; add a half cup of tomato and three sweet peppers out into strips; and if you have them two or three okra. When this is hot, add the chicken, a teaspoonful of salt and a dash of red pepper. Cover the chaing dish. and when hot serve. Boiled rice may be put over the top to heat, or you may add to the fish when bot a teaspoonful or so.

SILK OF THE SPIDER.

The Delicate Machinery That Spins the Liquid Threads.

The spider is able to secrete at least three colors of silk stuff-the white, which forms the web, and the enswathement of captives and the egg cocoon; the brown mass that fills the cocoon interior and the flossy yellow between that and the inside of the sac. The glands end in minute ducts which empty into spinning spools regularly arranged along the sides and upon the tips of the six spinnerets, or "spinning mammals," or "spinning fingers," which are placed just beneath the apex of the abdomen. The spinnerets are movable and can be flung wide apart or pushed closely together, and the spinning spools can be managed in the same way. The silk glands are infolded in mus-

cular tissue, pressure upon which, at the will of the spider, forces the liquid silk through the duct into the spool, since it hardens upon contact with the air. One thread as seen in a web may be made up of a number of the filaments and is formed by putting the tips of the spools together as the liquid jets are forced out of the ducts. When the spinnerets are joined and a numor ribbons are formed which one sees in the enswathement of a captive or the making of Argiope's central shield. This delicate machinery the owner operates with utmost skill, bringing into play now one part and now another and again the whole with unfailing definess and a mastery complete.-Dr. H. C. McCook in Harper's.

## A QUEER HOUSE.

The Novel and Famous Fossil Bone Cabin In Wyoming.

"The queerest house in the world," said a zoologist, "is undoubtedly the famous bone cabin in Wyoming, near the Medicine Bow river. This cabin's foundations are built of fossil bones. "Bones of dinosaurs-jaws of the diplodocus, teeth of the brontosaurus, knuckles of the ichthyosaurus, vertebrae of the camarasaurus, chunks of the barosaurus, the cetiasaurus, the brachiosaurus, the stegiosaurus, the ornitholestes or bird catching dinosaur -all entered into this wonderful cabin's foundations, making it the most

"This hut was built by a Mexican sheep herder who had happened by chance on the grandest extinct animal bed in the world. This was a plot about fifty yards square, wherein lay in rich profusion the bones of all the animals of the reptilian age. The heaviest and the lightest, the largest and the smallest, the most tranquil and the most feroclous, lay side by side.

"The place was evidently once a river bar, and the dead bodies that floated down the stream were here arrested to lie for hundreds of thousands of years till a sheep herder came along and, rooting among bones as big as bowlders, set about the building of the world's queerest cabin."-New Orleans Times-Democrat.

Grip Facts.

The grip is not simply a bad cold, and this fact is worth knowing. It resembles a cold in some respects, and colds are often wrongly diagnosed by the victims as grip. The grip is a malady which has laws of its own. both as to origin and progress after development. According to the doctors, it must run its course-"there is no special remedy that can directly destroy the infection, no drug that can kill the bacillus or neutralize its tox-This also is worth knowing. The in." main thing is to nurse with care and give the system the best possible aid in its efforts to throw off the poison .-Baltimore American.

Not Thirsty.

Jane, the bright new maid, always anxious to please, had been intrusted with the care of a little aquarium, in which the goldfish had always thrived very well until Jane came on the scene. The first day she arrived she gave them fresh water, as instructed. and then left them to their own devices. But, alas, one morning the little fishes were found floating feebly ious mistress, regarding her pets with concern, "have you given the fish any fresh water lately?" "No, ma'am. Bless their little hearts, they haven't drunk the water I gave them last month yet!"

A Normal Disadvantage. "Why do reformers so often come to

grief?" "I have often asked the question," answered Senator Sorghum. "I think it must be because they take up politics as an incidental diversion instead of a regular business. It's the difference between the amateur and the professional."-Washington Star.

Shopping Politeness. "Never point, my dear," said the

mother gently. "But, mamma," objected the little girl, "suppose I don't know the name of the thing?"

"Then let the salesman show you all he has in stock until he comes to the article that is desired." - New York

An Inference. Father-Young Upperten is going to propose for your hand soon. Daughter -How do you know? Father-I hear he has been making inquiries as to my financial standing.—Illustrated Bits.

Wisdom provides things necessary, not superfluous.-Solon.

A SONG, NOT A SERMON.

But It Points a Moral From a Ordinary Incident.

It was a merry occasion. The fun was fast and furious. It was in a barroom; the place, Washington.

Inspiring bold John Barleycorn, What dangers thou canst make us scorn!

Wi' tippenny we fear nae evil; Wi' usquabae we'll face the devil! And so one of this party invited seven companions to join him in a drink of "red licker," and they sat-

Bousing at the nappy An' gettin' fou an' unco happy. The man planked down a dollar, crisp and fresh from the treasury. The account was squared; the score was paid. He was a family man and walked across the street to a meat stand and ordered two pounds of round steak. The grocer supplied him and asked 30 cents as the price. "What!" the man roared. "What! Fifteen cents a pound for round steak! It is a high-

way robbery!" And so we go through life prodigal in buying luxury and miserly in buying necessity. That man had no conception of his illogical action-spending a dollar for liquor that he and his comrades would have been the better without and kicking a hole in the ceiling on account of a purchase of beef to the charge of 30 cents that he could ill do without. Man can live without hooze but the man has yet to be invented who can get along without food.

This is no sermon. This newspaper never preaches. What we intended to say and all we intended to say was to call attention to the truth.

All the world's a stage And all the men and women merely play-

The very best of us have need of the charity of our brothers and sisters .-Washington Post.

## GOOD COLLATERAL.

Way Tom Fitch of Nevada Used to "Raise the Wind."

Tom Fitch of Nevada was a bright fellow and one of the best writers and stump speakers of the west, but he was thriftless and when he got hard up would resort to almost any means

to get a stake. One day he wrote a scathing speech denouncing Sharon, then president of the Bank of California and afterward United States senator from Nevada. curious and most costly edifice in In it he charged Sharon with almost every crime known to the Decalogue or the statutes. He put the manuscript in a large envelope and walked into the Bank of California.

"Here," he said to the cashier, handing the package through the window-"here are some securities which I offer as collateral on a loan. Please hand them to Mr. Sharon in person, and I will wait for his answer."

Mr. Sharon was in his private office. Breaking the seal of the envelope, he found the speech and read it through. together with a note from Fitch, informing him that unless he was paid \$5,000 he would deliver that speech in every town in the state. In a few minutes the cashier, on Mr. Sharon's order, reported that the collateral was all right and paid the happy Fitch the desired amount.

Three months afterward, having gone through the money in speculation and dissipation, Mr. Fitch made his appearance with another speech, this time of a very complimentary character, which he promised to deliver at every convenient opportunity for the same amount. This, too, proved good collateral, and the story would never have come to light if Fitch had not, in a moment of drunken frankness, told

Progressing. Miss Weston-And have you played much golf, Mr. Jones? Mr. Jones-Well, no; can't say I've played much, but I've walked round the links several times in golf clothes, and I'm beginning to understand the language.-II-

A simple leak has sunk some of the stoutest ships that ever sailed. When a ship springs a leak, it is no good to crowd on more sail and hope to escape. The first thing to do is to find the leak, and then to stop it. It is the leakage of health which ruins many a splendid woman. It's no good in such a case to take tonics and stimulants. The first thing to do is to locate the leak, the next thing is to stop it. There is a constant leakage of health in every woman who suffers from disease or derangement of the delicate womanly organs, such as unhealthy drains, inflammation, ulceration and female weakness. This leakage can be stopped by the use of Dr. Pierce's Favorite Prescription. Over half a million women have testified to the wonderful curative power of this medicine. Sick women can consult Dr. Pierce free. All correspondence confidential. Address

Dr. R. V. Pierce, Buffalo, N. Y.

LEARNED IT.

William Vallance, of 221 East Lamb street, Bellefonte, Pa., says, "People who read the Bellefonte papers have probably seen the testimonial given by me in 1897 recommending Doan's Kidney Pills. As stated therein I suffered a great deal some years ago with my back and kidneys. There were pains through the loins and in the upper part of my spine, a disagreeable feeling in the head and acute weakness of the back right over the kidneys. I read of many curres which Doan's Kidney Pills had made in Bellefonte and I got a box at F. Potts Green's drug store and began using them. They removed the lameness and banished the aching. They did so much good that I would not hesitate to recommend them, and can endorse them again with just as much confidence, for during the seven years since I made my first statement they have never failed to give me relief."
