> STATE COLLEGE STUDENT SECRETLY MARRIED. - Tuesday's Philadelphia papers contained the announcement of the secret marriage of Rembrandt Hall Mc-Naul, a student at State College and son of E. S. McNaul, president of the Oswego Bridge company and Miss Lilian Sefton Rocap, of Philadelphia. The marriage took place on December 27th and was the culmination of a love romance begun when McNaul was a student at the Brown Preparatory school and Miss Rocap was a pupil in the Girls Normal school, which resulted in the announcement of their enragement last September. The father of the young bridegroom objected to an early marriage as he desired his son to complete his course in civil engineering at State College.

During the Christmas holidays they natrally met and on December 27th were secretly married, both deciding not to tell their parents until after McNaul's graduation next June. Separated from his wife McNaul purposely failed to pass the midwinter examination and a mislaid letter to his bride disclosed their secret. On Monday the bride and bridegroom confessed everything and of course parental forgiveness and the usual blessing followed and now they are planning for a honeymoon trip to Palm Beach.

In this connection it might be said that young McNaul is not the first State College student to marry before his graduation. In the class of 1906 there were a half dozen or more students who married during their Senior year, but the fact was kept quiet and they all, with possibly one exception, finished their studies and graduated last at the recent election, Harry Keller, of the

A full and entirely practical saw mill is placed upon the stage and appropriate scenery is used to make a superior stage picture. The Life Guards are two regiments of cavalry forming part of the British house hold troops. They are gallant soldiers, and every loyal British heart is proud of them. Not only the King's household, but yours, ours, everybody's should have its life guards. The need of them is especially great when the greatest foes of life, diseases, find allies in the very elements as colds, influenza, catarrh, the grip, and pneumonia do in the stormy month of March. The best way that we know of to guard against these diseases is to strengthen the system with Hood's Sarsaparilla the greatest of all life guards. It removes the conditions in which these disease make their most successful attack, gives vigor and tone to all the vital organs and functions, and imparts a genial warmth to the blood.
