Bellefonte, Pa., March 15, 1907.

FARM NOTES.

-Fix up just the best you can when you go out driving. It makes the wife and children proud when they see "what a fine looking man father is."

-Keep your eye out for a sapling that will make a good harness hook. Often, when in the woods, you may come across one. Cut it and take it home to be nailed up in the right place in the stable.

-Poll evil is not hereditary, and is sometimes caused by no heavier a blow than a roughly when unbarnessed.

-Dogs that become addicted to sheep killing do so from pure viciousness. In a majority of cases the dogs do not eat any portion of the carcass, but will kill a dozen or more sheep for the delight of so doing.

-The springs are low now. Good time to dig them out and make them larger and better. Stone them up, too, and put a slight incentive will cause you to hold good cover over them. I know of some good calves that have been drowned in smooth, less jerky, graceful manner. open springs. -If there is no receptacle for wood ashes

it is of advantage to broadcast them around

the trees. Ashes contain both lime and potash, with a small proportion of phos-phoric acid, and they benefit all kinds of trees, showing excellent effects for several -As a sheep dip, the following is recom mended by a breeder: Add 40 pounds of

soft soap to ten gallons of boiling water. and, while boiling, add one pound of carbolic acid. This may then be thinned down with 100 gallons of cold water. This quantity is sufficient for dipping 75 sheep. -To preserve the wheels of vehicles, and also to prevent shrinking of any of the parts, put some boiling linseed oil into a can, or other vessel, and raise the wheel so

volve the wheel and let the felloes be well soaked for about three minutes, and the wheel will then be more durable. -This is a season when attention can be given to the colt, and if foaled last fall it er who has seen the foliage of her ordinary may be weaned before spring work begins. A colt soon learns to eat ground oats, and it will thrive and grow if such is allowed, in addition to the milk it receives from its

dam. Colts should be kept warm in win-

that the rim will pass through the oil. Re-

ter, but should be given an opportunity to -Alsike clover is a better fodder than the red, grows luxuriantly in several soils, requires but little attention after the first seeding, and continues to propagate itself. It ripens its seed in the first crop and is less liable to injury by midge than the red. It does not flourish, however, in a high and dry sandy soil nor in a thoroughly drained

-Every farmer should have a hive of bees on the farm, even if he attaches but little value to the honey. The bees are excellent foragers and carry pollen from one plant to another. In communities where no bees are kept there will be found or chards that do not bear, the cause being unknown, while a hive or two of bees in tions.

clay soil.

-Butter preservatives should never be used. Even salt is an adulterant, though custom and preference sanction its use; but butter color should haveno place in a creamery or on the farm, as it is used to deceive the customer. "Embalmed beef" is not the only product that goes into the market as a fit product, only to be condemned. Cheese, butter and milk are sometimes very inferior in quality.

-Horses are in greater demand than a year or two ago, despite the fact that electricity is displacing their use. The horse is indispensible on farms and in drawing loads in cities. The automobile and traction engines are too costly to take the place of one horse. Good horses are bringing fair prices, and the scarcity of heavy animals is sure to increase the demand for both roadsters and general farm purpose

-The difficulty in introducing the foreign wine grapes in America is due to several causes, among which is the fact that unless assisted by artificial means, the grapes will not ripen, nor can the vines endure the changes of our climate. Except in Cali-fornia, all our grapes are derived from the wild varieties. It is said that the Grasselle, a seeding from an imported grape, has been found to suit our climate well, it having originated in New Jersey, but it has not yet been tested

-Roses may be propagated in several ways, but some experience is required. An excellent method, which has been tested and found satisfactory, is to place a cut-ting in a bottle of water and suspend the bottle where it can get warmed by the sun, keeping water supplied as fast as it evaporates. When roots appear the cuttings may be transplanted to a small flower pot. Some good hybrid perpetuals have been raised on their own roots in that manner. Although, the plan is not always successful, yet it is easily tried and costs nothing.

-If horses get the grease young and at grass, it shows strong constitutional ten-dency, and needs energetic treatment. Give a five-dram aloetic ball to begin with. Clip the bair off close, and soak daily in a bucket of lotion (two gallons) made by dissolving half a pound each of sulphate of cop-per, sulphate of zinc, and sulphate of iron. Give half an onnce of niter and two ounces of sulphur in a mash twice a week if the animal is at work, or once in ten days if idle. Be easy on grain, and make it up in linseed or cake. Do not wash the legs, but brush out the mud when dry.

-The plants that serve as forage for honey bees are: For March, the willows, soft maple, elm, alder and dog-tooth vio lets. For April, the above and the June berry, crimson clover, dandelion, goose-berry, currant, apple, pear, peach, cherry, plum and rhododendron, though some years they may not bloom until May, much de pending, upon the section and climate pending upon the section and climate During May those mentioned will be reinforced by the holly, tulip tree, raspherry, persimmon, grape vine, blackberry, alsike, clover, strawherry and white clover. Along in the summer, beginning the latter part of May and the first part of June, the mag-nolia, cow pea, catalpa, daisy, alfalfa, milk weed, cucumber, melon, sweet clover, corn. buckwheat and numerous flowers keep up the supply until late in the season.

FOR AND ABOUT WOMEN.

DAILY THOUGHT.

So many gods, so many creeds, so many paths that wind and wind, When just the art of being kind is all this sad world needs."

The modern corset is built on the most approved bygienic principles. A woman's physical wellbeing is taken into consideration by the manufacturer. Even though Fashion may dictate "the hour glass" figure, as she is doing again just now, the woman who yields to those demands need not sacrifice her health in her wish to be in

That "hour-glass" figure, by the way, has a remarkable faculty for sneaking back into favor just when the critics feel it has been banned forever under the weight of their disapproval. Fortunately, however, weighty collar dropped on the poll when the belle of to day who aims to emulate passing it over the head, or pulled off "the nut-brown maiden with the slender." "the nut-brown maiden with the slender, slender waist" need not resort to the heroic methods of her grandmother.

> If you would hold your head well get into the habit of walking about with a book on top of it every night for ten minutes. Not a heavy one.

You will be amazed to find how that

For early flowers of snapdragon, the seed hould be sown under glass in February or March and transplanted in beds of warm, dry soil, moderately enriched. The snapdragon, like most perennials and biennials which bloom the first year, should be treated as an annual and sown every year. The

Now is the time to plan the garden for the coming spring. The new seed catalogues are all out and form most fascinating reading. It is well, however, not to be too much carried away by novelties, but to stick to old and reliable plants that have stood the test of years.

In thinking what to put in the garden, do not omit some of the Rubosa roses. The great advantage of these roses, besides their absolute hardiness, is that they seem to have absolutely no insect enemies. The comfort in this is evident to the rose growof various insect pests. Besides the large, fragrant blossoms and rich green foliage, the golden-red baws in autumn are very

Begonia semperflorens make good plants for partially shaded beds. They make a dense, sturdy growth, covered throughout the season with masses of beautiful blooms.

No white plant makes so charming a border as the Little Gem alyssum. It is charming for edgings, baskets, pots, rock work and for cutting. The seeds may be sown in the open early in the spring, or even late in the preceding autumn. It can also be started in pots in the house. For borders the seed should be sown thickly to form masses. Cutting back after the first flowers fade strengthens new growth.

Take cuttings of gardenia in February. These cuttings are from the tip only, and put in sand to strike. When rooted, transplant to a soil of leaf mould, rich loam, sand and charcoal. The plants must be kept very warm and should be planted out

February is a good month to make carnation cuttings.

A FIVE AND TEN-CENT FAIR .- A short time ago, in a suburb, urgent need arose of special funds for a partitular object. Both time and money were lacking to plan one of the larger bazaars of conventional order, requiring weeks of preparation and the women of the committee found themselves in what all recognized as a genuine dilem-

After sleeping upon the problem, the inventive member of the community had a plan to lay before the board which was re-

ceived with general approbation.

This was for a 5 and 10 cent fair, the idea being, of course, borrowed from that of the well known mercantile ventures which flourish in most large cities.

Within less than a week of its inception the plan was carried out, needless to say with great success. The attractiveness of the idea caught the general fancy and financial rewards were out of all propor-tions to the minimums of trouble involved in the preparation.

Printed circulars, mailed to all members of the church in whose interest the work was carried on, announced that all articles sold would be priced at five or ten cents or vended at "two for a nickel," "three for a dime," and this promise was faithfully carried out.

Nothing was accepted which could not be veuded at these popular prices. The children's booth displayed all kinds of games, grab-bag features and the like at five and ten cents.

The woman's booth was laden with in expensive bits of fancy work, completed or to be worked, bousehold appurtenances, work table belongings and paper novels.

The gentleman's table retailed excellent oigars and the thousand and one little

things appertaining to the masculine toilet which could be sold for a dime and a nickel. Desk necessaries were also in evidence.
As all the articles disposed of were donated by sympathetic dealers, each article

represented a clear gain of five cents or a One feature which made a decided hit was a "lunch counter" where the pretty girls of the congregation served dishes and beverages at 5 and 10 cents apiece.

PEANUT BRITTLE.

Clean a frying-pan until it has not a vesige of grease about it, and put into it a teacupful of sugar (no water or anything else.) Set on the stove, and stir until it turns golden brown and melts. Be careful that it does not get very dark brown, or it will scorch. Add to it a good pinch of soda and a heaping teaspoonful of butter. Stir another minute and pour into greased plates which have been lined with shelled and halved peanuts. Cool and serve.

Rough ponage is the first favorite among automobile materials. It is light in weigh and cleans readily, two very important considerations. Mohair, because it is dust shedding, is also popular. Silver grays and dun browns are popular tones. Toad Superstitions.

Superstitions as to toads having been early inculcated, it has been exceedingly difficult to get rid of them. One remnant of this ancient credulity still exists. It is in regard to the absolute imperishable character of the toad. There are well educated Americans who believe that a toad hops out alive from a slab of stone though he has been imprisoned there for several millions of years. We give in brief Dr. Buckland's experiments with toads in 1825. He took twelve toads and had the toads put in twelve cells cut in sandstone, and over these he put plates of glass. They were buried in a garden for over a year. When exhumed they were all dead. Then some were put in porous sandstone, and at the end of a year a few were found "greatly emaciated." When buried for another year, they all died. Toads were inclosed in wood, and they all died. The conclusion is that, deprived of atmosphere or without food, toads must die. If a toad as a tadpole could have entered a crevice in a rock, it might have grown, but would have died in time for want of air and food. This toad nonsense is so ineradicable that it is supposable it never can be dissipated.

Pellisson's Little Adventure.

Pellisson, the famous French historian, was frightfully ugly. One day as he was walking down the street a beautiful lady took him by the hand and conducted him into a house close by. Dazzled by the lady's charms and flattering himself that this adventure could not possibly entail any unpleasant consequences, he had not the strength to offer any resistance. His fair captor introduced him to the master of the house, saying:

"Line for line, exactly like this," whereupon she took her departure. Pellisson, on recovering from his astonishment, demanded an explanation. The master of the house, after sundry

apologies, confessed that he was a painter. "I have undertaken," he added, "to supply the lady with a picture of the 'Temptation In the Wilderness.' We have been debating for a couple of hours as to the mode of representing the tempter, and she ended by saying that she wished me to take you for a model."-Revue Anecdotique.

The Judge Sinned Too.

Wirt Gerrare, in his volume on "Greater Russia," says that in the czar's country one may not call another a fool. There is a Scriptural injunction against that, and it is consequently a legal offense too. Not long ago a "vint" player called his partner a fool for needlessly trumping their trick. The offended man brought his accuser before the court. The culprit pleaded provocation and, knowing that the judge was a passionate follower of the national game, explained the matter in detail. The judge became interested and got excited as the particulars of the play were given. "I took the trick with my queen, and, instead of throwing away, my partner played the king!" shouted the accuser. "The fool!" said the judge. Then he hastily dismissed the case.

The Berry He Was.

When Bishop Berry of the Methodist Episcopal church was a young preacher he once gave a lecture in a rural community. Wishing to be witty, he announced to his audience that he was a berry and called upon them to state what kind of berry. Nearly every berry known in the vicinity was guessed, and the speaker refused to share the qualities of any of those named. At last an old lady who was not sympathetic with the seeming levity of the a berry you are. You are a gooseberry and a very green one at that. Go on with the lecture." And the lecturer did quickly.-Christian Work.

Animal Shells.

It is a curious fact that the shells of certain animals, such as cephalopods, brachipods and some bivalves, are commonly marked by retrogres ive changes as age advances. "The old man returns to second childhood in mind and body," states a well known scientist at Washington, "and the shell of the cephalopod has in old age, however distinct and highly ornamental the adult, very close resemblance to its own young."

Started Early Enough. "I want to talk to you, Mary, about that young man of yours," said her father. "When did he say good night

to you last evening?" "At 10 o'clock," replied the fair girl. "What? Why, it was 1 o'clock at

least!" "Oh, that was when he finished say ing it!"-Philadelphia Ledger.

His Second Book. "Your first book, if it is a success. generally leads to the success of the

second," remarked a rising author. "Yes, indeed," said another. "It was the success of my first book that made my second. My second book," he added, "was a bank book."

Old Age and Rushing. You may join the mile a minute class, but no oil has been discovered yet that will keep all the cogs in condition. Good old age was never a sequel to a rush.-Manchester Union.

Modern Irish. As a professional student of lan-

guages I have no hesitation in saying that modern Irish is more difficult than ancient Greek.-Manchester Guardian.

If the poor cannot always get meat, the rich man cannot always digest it .-Giles.

A WEEK'S NEWS CONDENSED

Wednesray, March 6. Jesse White was killed and another man fatally wounded in a saloon fight at Nashville, Tenn.

Thomas McCamant, formerly auditor general of Pennsylvania, died of a complication of disease, aged 67 years. Despondent over the death of his

adopted daughter, Frank Shoal drowned himself in the bathtub at his home in Philadelphia. Richard O. Hoops, a student at Lake Forest University, Chicago, is under

Thursday, March 7. The Ionia county, Mich., poorhouse was destroyed by fire, the 60 inmates

\$5000 worth of jewelry having been

escaping uninjured. While at work in a sand tunnel in Philadelphia John Anthony was caught in a cave-in and smothered to death. Logan E. Bleckley, formerly chief

justice of the Georgia supreme court. died of Bright's disease, aged 70 years. The trainmen's strike on the Lehigh & New England railroad is off, the company acceding to the strikers' de-

As a result of a dust explosion in the Ethel coal mine on Dungers Run, near Logan, W. Va., Ed Grover, a miner, was killed and several others were injured.

Friday, March 8. The safe in the Farmers' bank at Masonville, Iowa, was blown by robbers, who secured \$4000.

The Minnesota legislature passed a bill appropriating \$10,000 to purchase a silver service for the battleship Minnesota.

"Bud" McCourt, who was injured in a hockey game at Cornwall, Ont., died of his injuries and his assailant has been arrested. Handling a revolver which she

didn't know was loaded, Mamie Cooper, of Chester, Pa., shot her brother in the lip, knocking out several teeth. The Delaware & Hudson Railroad company paid a fine of \$3314 to the United Straes court at Utica, N. Y., for violating the law requiring the use of airbrakes on trains.

Saturday, March 9. Arthur Davis, a negro, was hanged at Richmond, Va., for the murder of a Syrian peddler.

Within 48 hours Bertram T. Dix and Ernest J. Dix, brothers, died of heart disease in Philadelphia.

Professor Henry D. Todd, lieutenant commander U. S. N., retired, the last of the class of 1857, died at Annapolis, J. R. Ferguson, of Wheeling, W.

Va., was arrested at Washington, Pa., charged with writing insurance with out a license. Miss Sarah Merritt, of Pleasantville, N. J., died in a New York hospital

from injuries received in the train

wreck on February 16. Monday, March 11. The Independent Order of Foresters has chosen E. G. Stevenson, of Detroit, as supreme chief ranger, and he will

move to Toronto. Charged with getting \$21,000 under false pretenses, F. Karanoga, one of the richest Japanese in California, was arrested at San Francisco.

John Carr, a pensioner, aged 67 years, of Paterson, N. J., was struck by a train on the Cumberland Valley Railroad, near Carlisle, Pa., and died shortly afterward.

-The Pennsylvania railroad company is getting more liberal with its annual passes to employes and the new rule is that all firemen who have been in the company's employ for three years are to have an annual pass, good only on their respective division, says the Harrisburg Patriot. Firemen on the Philadelphia division can ride on the pass from Harrisburg to Philalecturer, arose and exclaimed in a delphia and intermediate points, and those squeaky voice: "I know what kind of on the Middle division can ride from Har risburg to Altoona and intermediate points. The passes are issued in the name of the firemen, but as soon as he is promoted to engineer the pass will be in the name of the fireman and his wife, if he be married. Annual passes have also been issued to all euginemen, regardless of service years' service was the old rule. This new pass rule was one of the differences settled between the grievance committee and the management of the railroad company some time ago.

Best Route to the Northwest.

In going to St. Paul, Minneapolis or the Northwest see that your ticket west of Chicago reads via The Pioneer Limited on the Chicago, Milwaukee & St. Paul Railway-the route over which your letters go. Standard and compartment sleepers with longer, higher and wider berths. Leaves Union Station, Chicago, 6.30 p. m. daily; arrives St. Paul next morning at 7.25 and Minneapolis at 8.00 o'clock.

JOHN R. POTT, District Passenger Agent, Room D, Park Building, Pittsburg.

Medical.

RUPTIONS.

Dry, moist, scaly tettor, all forms of eczema or salt rheum, pimples and other on tane by eruptions proceed from humors, either inherited, or acquired through defec-

tive digestion and assimilation. To treat these eruptions with drying medicines is dangerous. The thing to do is to take

HOOD'S SARSAPARILLA AND PILLS

Which thoroughly cleanse the blood, expelling all humors and building up the system. They cure. Hood's Sareaparilla permanently cured J.

G. Haines, Franks, Ill., of eczema, from which he had suffered for some time; and Miss Alvina Wolter, Box 212, Algona, Wis., of pimples on her face and back and chafed skin on her body, by which she had been greatly troubled. There are more testimonials in favor of Hood's than can be pub-lished.

A Woman's Word

is worth much to women. "I suffered for fifteen years with falling of internal organs and nervousness," writes Mrs. Vincent Bohall, of Franklin, Johnson Co., Indiana. "One year ago I began taking your 'Favor ite Prescription' and 'Golden Medical Dis covery.' I took six bottles of each, and now I am well. I owe my life to Dr. Pierce." Dr. Pierce's Favorite Prescription is the most wonderful remedy for woman's ills, known to science. It makes weak women strong and sick women well.

-One day the office boy went to the editor of the Soaring Eagle and said : "There is a tramp at the door, and he says he has had nothing to eat for six days." arrest, charged with robbery, over "Fetch him in" said the editor. "If we can find out how he does it we can run this paper for another week !"

— When you dispute with a fool he is certain to be similarly employed.

Medical.

TIME IS THE TEST.

THE TESTIMONY OF BELLEFONTE PEO PLE STANDS THE TEST.

PLE STANDS THE TEST.

The test of time is what tells the tale. The public soon find out when misrepresentations are made, and merit alone will stand the test of time.

Bellefonte people appreciate merit, and many months ago local citizens publicly endorsed Doan's Kidney Pills; they do so till. Would a citizen make the statement which follows unless convinced that the article was just as represented? ment which follows unless convinced that the article was just as represented: A cure that lasts is the kind that every sufferer from kidney ills is looking for.

A cure that lasts is the kind that every sufferer from kidney ills is looking for. James Rine, carpenter, of 239 High street, Bellefonte, Pa., says, "Doan's Kidney, Pills cured me in 1879 and the statement I made for publication at that time recommending this remedy was a true statement and stands good today. I therefore have no hesitation in recommending Doan's Kidney Pills again. I was so weak before I took the first dose that I could not put on my shoes and was hardly able to drag myself around. There were severe pains all through my back and down into my limbs. During all the years since Doan's Kidney Pills cured me I have not been troubled in this way. I have recommended Doan's Kidney Pills to a good many people and have sent many sufferers to F. Potts Green's drug store for their first box. In no case has the result been other than satisfactory."

For sale by all dealers. Price 50 cents. Foster-Milburn Co., Buffalo, New York, sole agents for United States. Remember the name-Doan's-and take no other. 52:11-2 m. c. o. w.
