for tuberculosis, which was opened recently in Bellefonte, will play an important

part in stamping out consumption in this district.

The dispensary is open Tuesdays and Fridays from 1.30 to 3 30 p. m., at the offices of Dr. Geo. F. Harris, who is the State Department of Health's efficient medical inspector for this county. Dr. Harris has been tireless in his work to get the dispensary under way and so far has had three patients for treatment.

The dispensary furnishes free medical treatment and advice to the victims of taberoulosis among the poor of Centre county. Where necessary, indigent patients are supplied with fresh eggs and milk daily. The dispensary officials, however, will guard against being imposed upon to furnish provisions to other members of the

family. Patients are also supplied with paper spatum cups and tissue paper pap-The opening of the Centre county dis-

pensary is in line with the work the State Health Commissioner is doing throughout the entire State, over forty such disp/nsaries having already been opened in as many counties. There are many victims of tuberculosis who are not able to go to the State sanatoria, in many cases because they are the wave-earners of their families, and these people must be taken care of. They especially need instruction as to the precautions they must take in their homes and in the work shop so that they may not spread the disease. To give such instruction and follow it up and see that the precautionary measures are carried out is the great object of the dispensary work. For this reason it will be a mighty factor in stamping out tuberculosis in this section. Patients visiting the dispensary are careby Geo. B.
