The Latest Presidential Message.

NO. 14.

From the Johnstown Democrat. The long-promised presidential message appears as a mere statement of political and ethical reforms which have been urged, not merely by Mr. Roosevelt, but by his opponents in his own party and the opposi-tion party. It is fine to learn that child labor should be prohibited throughout the nation. Of course it should, but can congress prohibit it or will it do so ? When Senator Beveridge suggested that it might

be prohibited under the constitution provision that congress might regulate inter-state commerce, he had no word of encour-agement from Mr. Roosevelt.

The president's promised radical message also urges action concerning injunctions in labor disputes. This is a fine sounding suggestion. But the people who have suffered from the abuse of the power of in-junction are very apt to think that the president also urges-or pretends to urge-the nomination for the presidencey of one William H. Taft who, as a United States judge, was the most notorious proponent of the anti-labor injunction.

The president goes on to say that nothing should be done to legalize a black list or a boycott that would be illegal at common law. This is a beautiful phrase, but it means nothing. The black list, or those who attempt to enforce it, do not eeek any legalization. The difference between the black list and the boycott is that the former is necessarily done scoretly. Nobody ever saw in any publication maintained by manufacturers a list of working men who were to be denied employment in future, cess which is impending. It would be a grave mistake, however, to leave the performance of this important with other concerns than any particularly involved in a labor quarrel, is that there should be publicity given to it. The re-cent decision in the supreme court denying to the American Federation of Labor the right to say that "we advise our friends not to buy of such and such firms" is a mere incident in the effort of labor to secure its own rights. Such advice is not illegal. It is difficult to understand why the Standard Oil Trust or the Tohacco Trust can advertise arging everybody to buy its wares and why on the other hand the people who suffer from the trusts have not a right to urge through the public print their followers to refuse to buy those wares. If the man having things to sell
