MONSEL-JONES .- Not for some time has a wedding announcement caused so ure of the potato crop, and continued depres much surprise as when it was made known sion of business. No doubt the "grand old that Miss Katherine Jones and Harry H. party" will attribute these misfortunes to Monsel, both of this place had been married almost three months ago. To add a little of the romantic to their marriage the young couple slipped off to Olean, N. Y., where on May 24th they were quietly married by Rev. James W. Ashton, rector of the St. Stephen's Episcopal church of that place. Since that time they have been making their home in Bellefonte, and generally to the appearance of his residence. while it was rumored on several occasions that the wedding had taken place the facts never leaked out until an announcement was made Friday.

The bride is a daughter of the late Wm. Jones of Bellefonte, and for a number of years has been employed as collector for the Bellefonte Electric company, a position which she filled satisfactorily to employer and patrons. The groom for some time has been in the employ of the Bellefonte Lumber Co. and is a well known promising young man.

HARPER-PHILIPS .- George W. Harper, of Harrisburg, and Miss Lota Elliott Philips, a trained nurse of Philipsburg, were quietly married at the home of Mr. and Mrs. Thomas Davidson, in the latter place at 9.30 o'clock Tuesday morning. The ceremony was performed by Rev. W. G. Falton, of the United Brethren church. Mr. and Mrs. Harper are now away on a wedding trip through Ohio, at the termination of which they will go to housekeeping in Harrisburg.

MABUS-MALLORY .- A quiet wedding was celebrated at the parsonage of the United Evangelical church last night when Blaine Mabus and Miss Nancy Mallory were united in marriage by the pastor, Rev. J. F. Hower. The bride is a daughter of Mr. and Mrs. George Mallory while the bridegroom is a clerk in the office of P. B. Crider & Son. The young couple left on the early train yesterday morning for a wedding trip to Atlantic City.

SCHREFFLER-LYLE. - A quiet little wedding was celebrated at the home of Mr. and Mrs. George J. Houtz, of Houserville, last Friday evening, when Charles R. Schreffler, of Axe Mann, and Miss Mae G. Lyle, were united in marriage by elder A. D. Wirts. The young couple will make their home at Axe Mann.

WEAVER-Cox .- Chauncey L. Weaver and Miss Matilda A. Cox, both of Blanchard, were married on Monday evening by Rev. W. H. Lane, pastor of the Church of Christ, at Lockport.

MARRIAGE LICENSES .- The following marriage licenses were issued the past week by Register Earl C. Tuten.

Chas. R. Schreffler, of Axe Mann, and May G. Lyle, of State College.

S. C. Brungart, of Rebersburg, Lettie B. McCool, of Tusseyville. Thomas Mendrio and Mabel Viehdorfer,

both of Snow Shoe.

Chas. E. Emenhizer and Edith Prince,

both of Cartin. John M. Kachik and Mary A. Brown,

both of Clarence. Clarence G. Evans, of Harrisburg, and

Carolyne B. Bowes, of Howard.

-Just sixteen minutes from the time Harold Lingle left his garage Wednesday afternoon in his Franklin car he had called at Dr. Geo. F. Harris' office, taken in Harry Curtin, at Curtin's Works. It was an emergency call, for while sitting at the dinner table Mr. Curtin was seized with a peculiar affection that rendered him entirely speechless. It was at first feared he had suffered a slight paralytic stroke but the jaunt to New York State with fourteen fine trouble passed off within an hour or so and except for a rather restless night be is fairly well today.

-On Thursday of Last week Frank Barnes, of Pleasant Gap, son of Robert Barnes, night watchman at the Brockerhoff house, contracted what was at first believed to be a case of tetanus, or lockjaw, so that he could not open his jaws until Monday when the physicians located and lanced an abscess on the inside of the lower jaw which gave the young man relief and he is now getting along all right.

----Thirty-five members of the Logan fire company with the Coleville band of twenty-five pieces went to Philipsburg yesterday afternoon by way of the Central Pennsylvania and New York Central the Central Pennsylvania District Firemen's association. They will participate in the parade to-day but are not entered in any of the contests.

Some sections of the State report the failthe prevailing opinion that Mr. Bryan will be the next President. Mr. Roosevelt's proxy might just as well withdraw.

J. C. Condo has added another very great improvement to his property by removing two huge trees that stood close to his portico, continually closing the spouting and preventing the escape of water. Their removal not only avoids that nuisance, but adds The cement coping in front, surmounted with a very handsome iron railing now shows off to advantage. Mr. Condo has also improved the salesroom of the carriage works giving more space for the greater display of vehicles. Notwithstanding the great depression of business prevailing for the last six months the works have been running on very nearly full time, and during the spring and summer did a very satisfac-tory business.

Wheat which Yields 100 to 20 Bushels per Acre.

Farmers everywhere will be interested in the story which comes from Spokane, Wash., that a farmer in Idaho has discovered a wheat which yields anywhere from one to two hundred bushels per acre. The story was first published in the Saturday Evening Post and on Tuesday was confirmed in a special dispatch to the Philadelphia North American. The facts are

worth reading and are as follows : Discovery of the new wheat came about through one of the "accidents" which make the story of the world's progress in every field as interesting as fiction. The Saturday Evening Post's article says the magic kernels were found in Alaska by the Idaho farmer while prospecting for gold. The North American's report says that they the country. Such a harvest, if universal, were sent from that country by a friend of the farmer. But the important fact is weeks visit to Pittsburg, and all here hope that they have been planted, and the yield barvested and replanted twice, so that the production of 100 to 200 bushels per acre is

a proved fact. Abraham Adams is the farmer. He expects to clear \$1,000,000 this year from his 700-acre farm in Adaho Juliaetta, Idaho. He estimates his crop at 70,000 to 75,000 hushels and is selling it for seed at \$20 a bushel. His son-in-law, O. K. Hobe, a wholesale lumber dealer of Minneapolis, is

interested with him. Mr. Adams was a lumberman, but six years ago took up farming, and with fair crops of "club" and "blue-stem" wheat made a moderate success. In 1903 he-or

a friend of his, according to one reportwent to Alaska, lured by the tales of hidden gold. The prospector explored the lonely land for hundreds of miles. Finally he reached a sheltered district near the coast where timber was heavy and the low-

lands were covered with lush grasses. One day while tramping he came across patch of yellowing green which reminded him queerly of growing wheat. He went closer and found it was wheat. More from curiosity than anything else, he hunted for a head to send home to the "States." Birds had eaten most of the grain, but at last he came across a perfect head and plucked it. Its size and apparently perfect form amazed him. The head was nearly four inches long and heavily bearded. The kernels numbered three or four times as

many as those of ordinary wheat, and each was nearly as large as a coffee bean. It was in the fall of 1904 that Adam planted the big seeds from Alaska in the back yard of his Idabo ranch. The next spring he gathered a sheaf of big heads which yielded seven pounds of grain. Seven

pounds of grain from one head sown. Moreover, the kernels, four times as large as those of the best wheat he had grown hitherto, were firm and cream white. Adams was fairly startled, but he said nothing. He thought it would be a good idea to try the new seed for spring wheat, and in the spring of 1906 he sowed sever pounds of the big kernels.

From those seven pounds he barvested in the autumn 1545 pounds of grain. The ratio of yield-the new wheat being much heavier than the ordinary varieties—was 222 bushels to the acre. Thirty bushels an acre is considered a good crop of "club" or

'blue stem.' In the fall of 1906 Adams sowed his 1545 pounds of the new seed alongside of plant-ings of the ordinary varieties, and gave them the same attention. Unripened heads plucked on the same day showed an as-tonishing difference. The head of Alaska wheat was nearly five times as large as the other, with proportionately large kernels. From the 1545 pounds of seed Adams barested 53,000 pounds of grain.

Moreover, he found that the new variety was far stiffer and stronger in the straw than the ordinary kind. A hailstorm which beat down the "club" wheat hardly damaged the Alaska field.

The next step was to discover the economic value of the wheat, and Adams submitted samples to the Idaho experimental station. I. Shirley Jones, the chemist in charge, examined the samples and made

this report : "The kernels from the fall-sown wheat were plump and sound, and doubtless will grade No. 1. Judging from the chemical and physical condition of this sample it will probably take rank with the best grade of 'blue stem' for flour.

"The sample grown from spring-sown wheat showed by chemical analysis a somewhat higher protein content (this being an indication of its probable strength for bread-making purposes.)
"I am inclined to think that the wheat

that you have here is the equal, if not the superlor, of our 'blue stem' ing purposes. I should like to make a mill test whenever you can send me a sufficient quantity for that purpose. Mr. Adams has also tested his wheat by

ending samples to be planted by friends in different parts of the country. In Alabama the seed from a single head was planted last December, and, as in Idaho, the yield News of the wonderful new wheat has interested the Department of Agriculture

in Washington, and W. M. Jardine, agronomist on dry land and cereals, will visit the Adams ranch to inspect the product. It is difficult to grasp what a yield of 200 would have made the wheat production of the United States last year 5,000,000,000 bushels. At only 50 cents per bushel this would have added \$2,500,000,000 to the

wealth of the American farmer. Old Home Week at Renovo.

For the Old Home Week Celebration at Renovo, Pa., August 31 to September 6, the Pennsylvania Railroad will sell excursion tickets to Renovo, August 31 to Septembor 5, good to return until September 7 inclusive, from Brookville, Kane, Eldred, Troy, South Danville, Shamokin, Herndon, Selinsgrove, Huntingdon, Altoona, Osceola Mills, Bellefonte, Lewisburg and stations intermediate to Renovo, at reduced rates (minimum rate 25c.) It is said by those who know that while nothing is more uncertain than one person's life, yet there is nothing MORE CERTAIN, than the average length of the years of a thousand people.

We might say it is the same with window glass. You can never tell when any one light may be broken, but you can tell almost surely how many will be broken out of a thousand. There are many broken in poor quality lots, and fewer in high grade glass,

And just the same also as with the length of life of a man, or a thousand men, the average can be lengthened by care and skill-when applied to glass-in the selection of material and science in the making

We handle only the best American Hand Blown Tank Glass.
