

WEIGHT OF A HORSE.

Bad Guesses Made by Men Unskilled in Horseflesh.

Many people, even among those who frequently make use of horses, have little idea what an ordinary horse weighs and would have much difficulty to guess whether a given animal standing before them weighed 500 or 1,500 pounds.

Next come the fashionable "coach horses" of persons of luxury, which weigh from 500 to 580 kilograms, or from 1,000 to nearly 1,300 pounds.

AIDED HER RIVAL.

Romance of a London Society Leader and a Diamond Necklace. The jewelers of Bond street could if they liked tell many an amazing story.

cination is a fact and may serve to explain a mortal enmity which existed recently and probably still exists between two well known society leaders. To one of them a highly placed admirer mentioned his intention to purchase a diamond necklace.

AN AMERICAN HERO.

He Used His Own Body to Stop a Leak in a Ferryboat.

One morning in January, when the ice in the Hudson river ran unusually heavy, a Hoboken ferryboat slowly crunched her way through the floating floes until the thickness of the pack choked her paddles in midriver.

Within 200 yards of both boats and free of the heavy ice steamed the wrecking tug Reliance of the Off-shore Wrecking company, and on her deck forward stood Captain Scott.

his own boat and before the astonished pilot could catch his breath pushed the nose of the Reliance along the rail of the ferryboat and dropped upon the latter's deck like a cat.

With a threat to throw overboard any man who stirred he dropped into the engine room, met the engineer half-way up the ladder, compelled him to return, dragged the mattresses from the crew's bunks, stripped off blankets and snatched up clothes, overalls, cotton waste and rags of carpet, cramming them into the great rent left by the tug's cutwater.

It was useless. Little by little the water gained, bursting out first below, then on one side, only to be calked out again and only to rush in once more. Captain Scott stood a moment as if undecided, ran his eye searchingly over the engine room, saw that for his needs it was empty, then deliberately tore down the top wall calking he had so carefully built up and before the engineer could protest forced his own body into the gap, with his arm outside level with the drifting ice.

An hour later the disabled ferryboat with every soul on board, was towed into the Hoboken slip.

When they lifted the captain from the wreck he was unconscious and barely alive. The water had frozen his blood, and the floating ice had torn the flesh from his protruding arm from shoulder to wrist. When the color began to creep back to his cheeks he opened his eyes and said to the doctor who was winding the bandages: "Wuz any of them babies hurt?"

Hood's Sarsaparilla.
