END OF FARMER'S WEEK EXERCISES.-The second annual "Farmer's Week" exercises at The Pennsylvania State College came to a close on Wednesday afternoon and by evening the farmer students had all de parted for their respective homes. That it was a success in every particular is evident from the intense interest manifested in the various: lectures, discussions and, demonstrations by those in attendance and there is no doubt but that great good to the farmers and the communities they represent will be the result. Every farmer there went home with a wider and broader knowledge of the modern methods of advanced agriculture than he had before, and every man will prove a missioner in his home community for the dissemination of such knowledge.

As an evidence of the interest taken by the farmers of Pennsylvania in this week of special instruction to them the total registration of farmers this year aggregated just 465, as against 336 last year. The above number came from fifty-three out of a total of sixty-seven counties in the State, while only forty-five counties were represented last year. The attendance of Centre county farmers last year totalled 120, or a lawyer at the bar. In addition to his law little over one-third the total. This year 111 Centre county farmers were present, or not quite one fourth of the total enrollment, a fact which shows that the interest in these exercises and the desire for more knowledge about their chosen vocation is not only widespread over the State but John's Catholic church and of the Bellethat the farmers are willing and anxious to fonte Council Knights of Columbus.
