So they "pool their issues," each gets what he wants and the people pay the piper.

And the result is misery, suffering and death to the victims of this unboly compact. There is not wool enough raised in the country to properly clothe the children a few hours before she died. of the wage earners and the tariff tax enhances the price of what there is to such an extent that only the rich can wear woolens and the children of the poor are exposed to the ravages of tuberculosis and other pulmonary diseases. The climate of this country is severe but in the early period of our history pulmonary maladies were not prevalent in the ratio of today for the reason that then proper clothing protected men, women and children. Now only the opulent can afford woolen clothing while others shiver and suffer in tuberculosisbreeding shoddy or cotton made of rags from Continental Europe.

The State Constabulary

The State Federation of Labor which held its annual session in Harrisburg last week strongly condemned the so-called state constabulary both in the speeches of those in attendance and the resolutions adopted by the body. These constables, the federa tionists declared, are used by industrial corporations to intimidate workingmen and suppress strikes. Because of that, they add, the constables work a subversion of the personal liberty of the citizen and are inimical to the interests of the public. From the view point of organized labor that is probably a valid objection. It is certainly so if they interfere with the legal rights of workingmen as the president of the organization alleges.

There is, however, a graver objection to the state constabulary than any that was expressed in the convention of the Federation of Labor at Harrisburg last week. It is that such a force in a free State is obnoxious to the fundamental principles of local self government. The constables can do no more to restrain strikers or intimidate workingmen than the state militia which is always available to prevent the destruction of property or assaults upon the persons of employers. To our mind it makes little or no difference to the strikers whether constables or gnardsmen are sum. moned to suppress strikes. But the oreation of a force of the character of the state constabulary with power to exercise police authority in communities in which they are aliens, is a serious matter.

The original purpose of the state constabulary was to supply comfortable births for men who might be used as political agents throughout the State. The plans were not fulfilled for the reason that about the time the force was created the political revolution of 1905 made the bosses afraid and the force was converted into a rather decent hody of constables. Their existence is a menace, however, their presence in a community an insult and all citizens should join in the demand for the repeal of the law. This can be achieved if the workingmen of the State will withdraw their support from the political machine but thus direction.
