

FARM NOTES.

Working in filth about the dairy is only a habit. When a man says he has a hard time drying up a cow, you may know he has a good one.

Feed new corn fodder as soon as it will do to use. In the green state it has more feeding value than after it becomes ripper.

The reports from the cranberry crops of South Jersey show that there is a big yield this year, and the growers fear that the prices will be very low.

The pear orchard will do best when allowed to grow up in good soil and hardy growth in soil makes pear trees more resistant to disease.

Feed liberally at this season, so that the cows will hold up in milk through the fall and into the winter. If they are allowed to decrease in milk flow now, it will be difficult to increase the flow later.

Certified milk is that which is produced under the most sanitary conditions and certified by legal authorities. It will keep sweet for some one to two weeks. Ordinary milk will sour in two or three days.

Cows require from one to eight ounces of salt per day. The more concentrates they receive, the more salt they require. It should be where they can have access to it every day.

There are not less than ten acres, in the town of Hammon, N. J., devoted to the culture of dahlias. This industry has grown so extensive that an association has been formed of which the following are officers: William F. Basset, president; Charles A. Wood, vice president; and Edward H. White, secretary and treasurer.

In experiments to ascertain the depth to cultivate corn ground, the Wisconsin Experiment Station has found that cultivation three inches deep left the ground more moist below the cultivated layer than cultivation one and a half inches deep, and these results have in the main been confirmed by similar experiments at the Utah Station.

Build good hog houses before bad weather sets in. Houses in the end are cheaper than feed at present prices, and hogs will not do their best when compelled to sleep out of doors in bad weather. A good feeding floor pays well. Enough feed is wasted on the average farm by throwing it into the mud and slush to help pay the additional expense of housing.

Never move cows faster than a comfortable walk while on the way to the place of milking or feeding. They should never be excited by hard driving, abuse, loud talking or unkind remarks. The milking should be done quietly, quickly, cleanly and thoroughly. Do not allow any unnecessary noise or delay. Begin milking at exactly the same hour in the morning and evening, and milk the cows in the same order.

To successfully store vegetables, it is necessary, first of all, to study the nature of the vegetable. As a general thing, they must be kept in a cool atmosphere, but not cool enough to freeze. But, in the case of pumpkins or squashes, they must be kept in a warm, dry air, and must be carefully handled.

The weeds should be pulled up as the crop is gathered, so that there will not be any chance for them to go to seed. In plowing weeds under, one is apt to be sowing the seed for more trouble next year. Not only should the weeds among the crops be pulled up, but there should be a similar raid made on those growing along the fence line.

This operation should be followed by deep plowing and a sowing of rye. The latter will give a good winter covering, and, plowed under in the spring, will add manurial properties to the soil. Where the land is permitted to lie open in the fall, it should be tilled occasionally, so as to prevent weed sowing.

While most school girls wear coat suits, many require an extra coat for very cold days and other wear, such as motoring. A great many of these long coats which completely cover the frock from neck to hem, and are made in heavy cloth with big fur collars, will be worn this winter, and may well figure well in the business of providing the schoolgirls' outfit for the winter term is being carried out.

A warm red coat made with a big collar of opossum and a double row of large horn buttons, the coat being made in loose fitting style with the sleeves stitched at the wrist, supplies a very charming and becoming garment, while rough tweeds will be very much to the fore, and very dull shades of purple, red and blue are the favorite colors.

Professor Call says it is a common practice in dairy sections to grow cowpeas and corn in separate fields and mix them as the silo is being filled. It would seem a more desirable practice to grow the corn and cowpeas together.

An experiment along this line was conducted at the Kansas Experiment Station during the years 1903, 1904 and 1905, the corn and cowpeas being planted together in rows. When planted the right thickness—corn 12 to 24 inches, and cowpeas 4 to 6 inches apart, in drill rows three and a half feet apart—each grew equally well and produced from ten to fourteen tons of green fodder per acre.

FOR AND ABOUT WOMEN.

DAILY THOUGHT.

To have what we want is riches; but to be able to do without is power.—George Macdonald.

The early autumn coat is most picturesque with its enveloping folds, its draped revers, and its huge pockets. Made of faced cloth and satin, this coat varies in length, and some of the fronts are finished in rounded effects, as shown in the design on this page.

Buttons are less used for trimming on the new autumn coats, and there is very little braiding, the folds of the material on the skirt part of the coat being considered sufficient ornamentation.

The fashion of combining two materials in summer gowns is being repeated in some of the autumn coats. There are models in faced cloth, with bands of satin, and in satin cloth combined with moire, or in velvet and crepe de Chine.

The skirt, contrary to custom, is where the new ideas are shown. It is a six-gored model with a wide panel back and front reaching to the hem of the skirt.

The sleeve has passed through many vicissitudes this season, and as there is nothing which dates a dress more than a few words must be said regarding its characteristic features in the near future.

The sleeve has passed through many vicissitudes this season, and as there is nothing which dates a dress more than a few words must be said regarding its characteristic features in the near future.

Although blouses have been relegated to the background by the leaders of fashion with the exception of those which match the costume and partake of the nature of a corsage, their period of prosperity is by no means over.

A recent number of the Commercial Tribune has some sensible remarks on the subject of the business woman's appearance. The personal appearance impresses one with the business faculty of a young woman.

For the Neck.—Narrow, flat bows of point d'esprit, either black or white, are now "the thing." Most of the bows, of various materials are flat.

For mourning, there are airy little frills and jabots of black net and point d'esprit.

Among the fancy tid bits are little clusters of silk roses, with plain corded silk for stems.

The Irish and cluny bows are as popular as ever, particularly when these laces are used as edging or trimming on bits of fine muslin.

Senator Grim En Tour of State

Whirlwind Rush Through Westmoreland County—First Week a Grand Success.

Senator Grim, Democratic nominee for governor of Pennsylvania, began his tour of the state in Westmoreland county on Tuesday, Sept. 13, at Greensburg. Though he reached that destination at 6 o'clock in the morning he was met by a large delegation.

After this Senator Grim, accompanied by County Chairman J. Hilary Keenan and a number of leading Democrats, left for Scottsdale. At the latter place he shook hands with about 600 voters of all parties, and many other than Democrats pledged him their support.

Leaving Scottsdale, the next place visited was Mount Pleasant. Here Burgess A. T. Collins and a delegation of citizens of all parties met the candidate. A reception was held at the Grand Central hotel, and a number of workmen met called on Senator Grim and assured him that he would carry the town by a good majority.

In the evening the senator and his enthusiastic escort went to Irwin, Pa., the center of the Westmoreland county coal field and the scene of the big strike which had been on for some time. There an impromptu meeting was organized, attended by several hundred interested citizens, and the candidate for governor spoke at some length. At a late hour the party moved on to Pittsburg. Of his arrival there on the Republican Pittsburg Dispatch said:

"Spick and span, said to be the handsomest of all the candidates for governor and looking as though no amount of campaigning would faze him, Webster Grim, Democratic candidate for the office of chief executive of Pennsylvania, arrived at the Colonial hotel shortly before midnight. The candidate had passed a busy day, with receptions and short speeches, at Mount Pleasant, Irwin, Scottsdale, Greensburg and other places, and is thinking over his speech for this great day at Kennysville."

in Maine yesterday is an indication of the drift of things all over the country. It is undoubtedly a Democratic year, and the time is ripe in Pennsylvania for a change. It seems to me that we have reached the refinement, the acute stage of graft. The pendulum must swing in the other direction, and that must be away from the Republican organization, which has been in control and which must be held responsible for the deplorable conditions that have affected the morals of the whole state.

Senator Grim spent Wednesday in Pittsburg and attended the great Democratic picnic and banquet at Kennysville park, where he made a speech, the salient features of which are given in another column. He was joined there by Hon. Thomas H. Greer, ex-governor, who also spoke. From Pittsburg Candidates Grim and Greer went to Washington county, where receptions were tendered to them in various places. Thence they passed into Greene county, where the local committees and Congressional Candidate Jesse A. Winters escorted them from place to place and to one enthusiastic reception after another. Friday afternoon and Saturday morning were spent in Fayette county, the feature of which was a splendid mass meeting at Uniontown on Friday night. Both candidates spoke and created the most intense enthusiasm. Saturday afternoon was spent in Somerset.

For mourning, there are airy little frills and jabots of black net and point d'esprit. Among the fancy tid bits are little clusters of silk roses, with plain corded silk for stems. The Irish and cluny bows are as popular as ever, particularly when these laces are used as edging or trimming on bits of fine muslin.

Acknowledge it.

BELLEFONTE HAS TO BOW TO THE INEVITABLE—SCORES OF CITIZENS PROVE IT.

After reading the public statement of this representative citizen of Bellefonte given below, you must come to this conclusion: A remedy which cures years health's a.c.e. can be relied upon to perform the same work in other cases. Read this: William McClellan, 24 E. Lamb Street, Bellefonte, Pa., says: "Doan's Kidney Pills fixed me up in good shape and consequently I think highly of them. I suffered for a long time from a pain and lameness across my back and some mornings I could hardly get out of bed. My back ached constantly and the kidney secretions were irregular in passage. Hearing a great deal about Doan's Kidney Pills, I decided to give them a trial and procured a supply from Green's Pharmacy Co. They cured me and I am now enjoying good health. My advice to anyone afflicted with kidney complaint is to give Doan's Kidney Pills a trial." (Statement given October 21, 1907.)

Mr. McClellan was interviewed on November 23, 1909 and he said: "I have taken Doan's Kidney Pills once or twice during the past two years, while suffering from backache and they have given me prompt relief. You are welcome to publish my testimonial at any time you desire." For sale by all dealers. Price 50 cents. Foster-McMillan Co., New York, N. Y. Remember the name—Doan's—and take no other.

Hot Mint Sauce.—Mint sauce to go with lamb may be either hot or cold. To make the former put into a small saucepan five or six sprigs of fresh mint, a bay leaf, a teaspoonful of chopped onion, a teaspoonful of sugar, one tablespoonful of vinegar, one tablespoonful of strained tomato, one cupful of stock and the beaten white of one egg. Bring to boiling point, then simmer gently for ten minutes. Thicken with a teaspoonful of cornstarch, add a few fresh chopped mint leaves and serve.

erret county in a series of receptions. The candidates spent Saturday night at Meyersdale, guests of their colleague on the ticket, Hon Samuel B. Philson, Democratic nominee for state treasurer.

Keystone Treason.

[From the Philadelphia Record.] There was a great opportunity to capitalize Republican disaffection in Pennsylvania by giving independent voters the opportunity to concentrate their strength upon a strong and reputable candidate for governor. This opportunity has been practically thrown away by the intrusion of a third party. The only thing that will be determined by the voting in November, aside from the surety of the election of a gangster governor, will be the ascertainment of how many Berryites there are in the ranks of the two great parties. There is greater reason for regret following this suicidal outbreak in Pennsylvania because in Pennsylvania there was greater need of reformative effort. No other state in the union suffers so grievously from corrupt misrule.

The report that Senator Hale will retire to private life at the expiration of his present term has been amply confirmed by the result of the election in Maine.
