Paid after expiration of year

Being Sick the Devil Would be a Monk.

The stand-pat Senators in Congress are heaping humiliation upon the head of President TAFT "with a vengeance." After inducing him to say, less than a year ago, that the ALDRICH tariff law is the best that Congress has ever enacted, they are now acknowledging its imperfections. A short time ago Senator AL-DRICH declared that he is in favor of revision by subjects and Senator LODGE has since fallen into the same idea. There isn't much difference between revision by schedules and revision by subjects, but there is some. For example during the recent campaign the President said he is in favor of revision by schedules and the stand-pat Senators prefer to lead rather than follow.

So far as the general public is concerned, however, the demand is for downward revision whether by schedules or subjects. In the first place the first duty is to remove the tariff tax from meats altogether. This will take millions of dollars a year from the profits of the Beef trust but it will bring wholesome and nourishing food within the reach of the average wage-earner. The next step should be the repeal of the tariff tax on wool and the reduction of that upon woolens to a revenue basis. This will take money out of the pockets of the Wool trust magnates but it will enable industrious mechanics to clothe their children in a manner to shield them from the rigors of a bad climate.

It is a safe proposition that neither Senator ALDRICH nor Senator LODGE is in favor of downward revision of the tariff by any process or method. They are making the false pretense now for sinister purposes. Longe hopes that it will secure his re-election to the Senate few years when he again moved to Tyand ALDRICH expects that the question rone where he lived until a year or so of revising the tariff on rubber may be delayed a considerable time while Con- Tipton. THE GRAIN SHOW THE FEATURE OF FARMER'S WEEK AT STATE COLLEGE .-This is farmer's week at The Pennsylvania State College and fifty-one counties of the State are represented in the more than four hundred attendants.

Developing interest in the production of corn has been the chief aim of the Seed Improvement Association. Through it the first annual grain show at State College is now in progress there. The prize winning samples this week will be forwarded to the national exhibition for competition with the corn of New York, New Jersey, Delaware and Maryland.

Pennsylvania's grain show has for its great object the education of the farmer to a better and higher standard in the quality of his grain. That it has been a benefit to agriculturists is being shown there now, for the corn exhibits demonstrate marvelous progress in the culture of that grain. The following prize winners were announced Wednesday.
