

Bellefonte, Pa., January 20, 1911.

But It Took a Troop of Baboons to Kill the Big Cat.

A vivid pen picture of a fight between a leopard and a troop of baboons is given in a German paper by P. Ritter, a sportsman and explorer in German West Africa. Leopards have a particular liking for baboon flesh, which is often used as balt to trap

"One afternoon." the hunter relates, "I was resting on the shady side of a big rock which formed the bank of a small stream. On the opposite side a troop of baboons came down chattering toward the water, a large male going cautiously in front, glancing and scenting around for danger. I remain-

"A deep grunt assured the herd that all was well, and down the steep slope they came. last of all a female with two young, which the mother tenderly helped over the rough places. Suddenly a big leopard shot out from behind a bowlder and with one blow of his paw grabbed one of the young.

"The mother, with a roar of fury, threw herself upon the big cat. The others halted and with one accord leopard bad just settled the female and was about to make off with his prey when he found himself surrounded by the whole borde, which closed in upon

"He gave as good as he got, and two big baboons rolled down the slope apparently done for, but numbers told, and he was literally torn to pieces. It was a horribly fascinating sight, and I never regretted more having no camera with me than I did then.'

THEY DIDN'T FIGHT.

It Was Only a Little Friendly Discussion That Excited Them.

Two Spaniards were conversing earnestly, then excitedly, at last angrily, of electric light, though electric lights The young American woman who pass- had been in use abroad prior to that ed them looked with frightened eyes time. The exhibition of models and toward ber Spanish guide.

Jose?" she asked timidly. "Do you the attention of scientists and capitalthink they will fight-or maybe kill?" ists in this country, and the first in-Jose, smiling and showing his pretty system were put to practical use in teeth. Then They Talked In English.

A couple of Cleveland business men visited Mexico. In Mexico City their train was switched from one station to another. One of the Clevelanders went to the first station to make inquiries. Approaching a pair of dark visaged employees. he cudgeled his memory for the proper words from the phrase book.

"Donde esta?" he hesitatingly asked and paused. The two dark visaged persons listen-

ed attentively. "Gracias." stammered the Cleveland

man. "Doude estan?" Then one of the men looked at the

"Say, Bill." he growled, "what in

merry blue blazes is this fellow talkin' about?"

And after that it was easy.-Cleveland Plain Dealer.

The Donkey's Choice.

The vexed question of the future life of animals has troubled the Mohammedan, as it has other religious. The question, it seems, was considered by Allah a long time ago, and all the animals were asked if they wished to enter paradise. They at once said yes, except the donkeys. These were cautious and asked if little boys went to heaven. The answer being yes, they replied. "In that case we prefer to go to-the other place." S. H. Leeder vouches for the fable in "The Desert Gateway."

Friendships.

There are three friendships which are advantageous and three which are injurious. Friendship with the upright, friendship with the sincere and friendship with the man of much information-these are advantageous. Friendship with the man of specious airs, friendship with the insinuatingly soft, friendship with the glib tongued-these are injurious .- Confucius.

DO YOU NEED OVERALLS?

If You Do. Why Don't You Make Then Yourself?-It's Dead Easy.

trim the grass or weed the garden if he had overalls.

The trouble is that when he wishes to wear overalls the stores are closed and he cannot buy them. I wonder that men do not make them for them-

To provide a pattern you must have an outline or perspective plan of your contour from the belt line down to the ankles. This may be obtained by sitting in wet clay and, on arising, pouring plaster of Paris in the impression. When this hardens lift the mold, lean it against the wall and obtain measurements with a tapeline. Another way is to dust talcum powder on the carpet until it is thickly coated. Then sit down on the talcum powder and carpet, thus removing the talenm from the floor where you have been. Then cut around the outlines of that impression with a sharp knife, remove the carpet so detached, and you have a pattern for one side of the overalls.

Purchase several yards of denim and cut it into the shape indicated by either pattern you have now obtained. Make two sets of these pieces and sew them edge to edge. Pockets may be made by cutting slits in the material clambered back to her assistance. The and sewing empty salt sacks.-Wilbur D. Nesbit in Delineator.

ELECTRIC LIGHTS.

Their Use on an Important Scale Dates From 1876.

The first experimental philosopher to discover that electric light could be produced by a dry battery was Sir Humphry Davy, who in 1810 exhibited a light three inches long, between carbor points, before the Royal society of London. But no commercial value was attached to the use of electricity as an illuminant until more than half a century later. The Centennial exhibition, held in Philadelphia in 1876, really marks the era of our present form practical demonstrations of electric "What are they talking about, Senor lights at Philadelphia in 1876 attracted "Ah. no. Pennsylvania Leads in Intensive Farming.

That the State of Pennsylvania is a leader in intensive farming, the doctrine of which is being preached by the State College and the Pennsylvania Railroad, is Many a man says that he would be indicated by statistics just compiled by glad to do chores about the house, to the Pennsylvania Railroad company for 1910 which show that Pennsylvania last year had 8,384,000 acres in cultivation in corn, barley, buckwheat, hay, oats, pota-toes, rye, tobacco and wheat. This is 8.-503 per cent. of the total of 239,343,800 acres under cultivation in these crops in the United States, and the average yield per acre in the State of Fennsylvania was \$20.56, as compared with \$14.53 for the average yield per acre throughout the

These figures are of special interest to the Pennsylvania Railroad, which in the past four years has been conducting an active campaign in the interests of scientific farming. Much instructive literature has been disseminated by the Railroad company in phamphlet form, while Farmers' Special Educational trains have been operated on various divisions from time to time. In this work the Railroad company is co-operating with the State Agricultural Department and the State College of Agriculture.

The Pənnsylvania Railroad recently announced that it had found its farming campaign a profitable one and that it in-tended to prosecute it vigorously during the present winter. Arrangements are being made for demonstrations and lec-tures to be given in various parts of the State of Pennsylvania.

The country's total farm crop value of barley, buckwheat, corn, hay, oats, potatoes, rye, tobacco and wheat in 1910 was \$3,478,417,773, and Pennsylvania's share of this was \$172,362,500, or approximately 5 per cent of the total, with only 3.5 per cent of the total, with only 3.5 per cent of the acreage. Added interest is given to these figures in view of the fact that in 1909 Pennsylvania's acreage in the above crops was 3.547 per cent of the total of the country, with the percentage of the fore pennsylvania. of the farm crop value for Pennsylvania of 4.311. Compared with 1910, Pennsylvania's percentage of acceage decreased, but her percentage of the revenue in

these crops increased. The comparative agricultural statistics of staple farm crops for the year 1910 have been tabulated by William J. Rose, Division Freight Agent of the Pennsylva-nia Railroad at Harrisburg. These have been issued in attractive form and are being given a wide distribution over the country. They show the total acreage for each crop, both in the United States and in the State of Pennsylvania, together with the average yield per acre. The total production is also given along with

Hood's Sarsaparilla.

ABSCESSES

"I should feel guilty of ingratitude if I did not tell of the benefit I have derived from Hood's Sarsaparilla. Five ugly and painful abscesses formed in the lower part of my abdomen. I was confined to my bed thirteen weeks, and the pain was almost unbearable. A neighbor suggested that I try Hood's Sarsaparilla, which I did. I began to improve immediately, the abscesses began to heal, and I took the medicine until I was well." John Wallace, Field Sec., Y. M. C. A., Pittson, Pa. Hood's Sarsaparilla effects its wonderful cures, not simply because it contains sarsaparilla, but because it combines the utmost remedial values of twenty different ingredients. Get it today. In usual liquid form or chocolated tablets called Sarsatabs. 56-3

the average farm price as of December

first. The comparison in favor of the State of Pennsylvania is very favorable. The average yield of barley per acre in the United States in 1910 was 22.4 bushels, and in Pennsylvania it was 26.5 bushels. The average yield per acre in corn was 27.4 bushels in the United States and 41 bushels in Pennsylvania. In oats Pennsylvania's showing is an average yield of 35.1 bushels as against 31.9. In wheat 17.8 bushels against 15.8 for the entire country and for tobacco 1,500 pounds per pere as against 79.8 pounds pounds per acre as against 797.8 pounds for the entire country.

A \$25,000,00 Gift.

In the past year it has cost Dr. Pierce over \$25,000.00 (exclusive of postage) to give away copies of his great work. The People's Common Sense Medical Adviser. This book containing 1008 pages and over 700 illustrations should be in every family. It answers the unspoken questions of young men and women. It points the path to healthy, happy life. It is sent free on receipt of stamps to defray expense of mailing only. Send 21 one-cent stamps for book in paper binding, or 31 stamps in cloth. Address Dr. R. V. Pierce, Buffalo, N. Y.
