All places of business will be closed from 11 a. m. until 8 p. m. According to the program, the parade, consisting of the veterans, Sunday school children and citizens generally, will be quite an imposing affair, and will form at 5.30 o'clock at the Lutheran church building and march directly to the cemetery. In heavy-soil localities, gaps are apt to attack young chicks, especially when quartered on damp, heavy ground. In light, sandy soils this disease is practically unknown.

Feed very little soft feed and you will raise more chicks. If you must feed soft stuff dont throw it upon the ground. Feed it in small trough or on a clean board.

During the heavy storm Friday afternoon the lightning struck the Houersville German Reformed church and shattered the steeple and building quite a bit, so much so that they propose taking the steeple down and rebuilding it, rather than try to repair it. Of course this is the second time the building has been struck but this time had it not been for the timely arrival of a few persons who reside near the church the structure would have been destroyed by the flames, as the stroke set it on fire.

Panama Canal Three-Fourths Done.

"Uncle Sam" has taken stock of what has been accomplished at Panama after seven years of hard work. May 4 ended the seventh year of canal construction by Americans.

Only one-fourth of the great task of excavation remains to be done, for the "ground hogs" have removed 138,000,000 cubic yards from the line of the canal. That leaves only 44,000,000 yards to be cut away.

The placing of the concrete in the locks is more than 52 per cent completed, the installing of the lock gates has begun and 70 per cent of the filling for the Gatun dam, which will feed the canal with water, has been done.

The lock gates are staggering in their vast proportions compared with the timber gates of the canals in this country. Each leaf, of which there are two in a gate, is 7 feet thick, 65 feet long and from 47 to 82 feet in height, there being no fewer than 92 of these leaves. Special hoisting machinery has been installed to place these masses of steel.

One of the unexpected obstacles in the construction was the development of twenty-two slides in the Culebra cut within a distance of nine miles, but it is stated that these will not delay the completion of the canal, as the earth can easily be removed by dredges after the water is turned on.

Aged Negro Minister Lynched.

Rev. Benjamin Smith, the aged leader of the negro race near Swainsboro, Ga., was hanged to the limb of a tree and his body riddled with bullets by a mob of white men because he had wounded Deputy Marshal Canady.

Smith had trouble with his young wife, and the latter had complained to the authorities. Canady went to the Smith house to arrest the preacher. The later resisted and shot the officer, inflicting a serious wound.

Smith fled, but was pursued with bloodhounds and was captured in a swamp near the town, brought back and hanged to a tree in sight of his home.

Smith was very old, being white headed and toothless, but for years his word had been law to the negro population. He was noted for his oratory.

While the mob was chasing Smith unknown parties dynamited the negro Odd Fellows hall, entirely destroying the building.

The lynching and the use of dynamite have terrorized the negroes and any are fleeing. A general exodus is threatened, which will work great damage to the planters.

Huston Must Serve Jail Term.

Supreme Court Affirms Conviction of Capital Architect.

The supreme court of Pennsylvania at Harrisburg handed down an opinion in the case of Joseph M. Huston, the capitol architect, affirming the action of the Dauphin county court in refusing him a new trial.

According to his own counsel, the decision of the state's highest tribunal means that the architect will have to serve his sentence to prison unless some new and now unknown means of obtaining another stay of execution is obtained. The convicted man has ten days before the decree of the court takes effect.

The sentence imposed in the Dauphin county court by Judge Kunkel, and upheld last March by the superior court and now by the supreme court, was that Huston should serve from six months to two years in the eastern penitentiary and pay a fine of \$500 and the costs of the prosecution.

The opinion in full was read by Chief Justice Fell as follows:

"The order allowing this appeal limited the argument to the assignments of error which relate to the actions of the court of quarter sessions on sending the jury back for further deliberations after a verdict of guilty of defrauding the commonwealth had been presented to the court and the foreman of the jury had attempted an explanation of the verdict in a colloquy between himself and the trial judge.

"After a consideration of the whole colloquy as it appears in the reporter's notes of the case a majority of the court are of the opinion that the judgment appealed from should be affirmed on the opinion of the superior court. Judgment affirmed."

Huston was not in court. The appeal on which the decision was based was taken on March 25 last in Philadelphia and argument began there on April 24.

Suit to End Lumber Trust.

Sweeping charges of a gigantic conspiracy to maintain high prices, to blacklist concerns not regarded as "proper" trade, and to violate generally the Sherman anti-trust law, are made in a government suit filed by Attorney General Wickersham in the United States court in New York against the so-called lumber trust.

Ten trade organizations and more than 150 individuals are named as defendants in this suit, which may be the first of several planned by the department of justice against combinations of retailers in staple commodities and the necessities of life to prevent the ultimate consumer from buying anywhere except from local retailers.

Government officials consider the suit one of the most important ever brought under the Sherman anti-trust law, inasmuch as its great object is to put an end to agreements which prevent the ultimate consumer buying commodities directly from the producer.

If the courts uphold the government's contention and rule that such agreements come under the inhibition of the Sherman law, it is believed that many suits will follow with the object of removing one of the greatest causes of the high cost of living.

The suit filed is against the Eastern States Retail Lumber Dealers' Association, which is the central body of nine local organizations covering five states, the District of Columbia and the cities of Baltimore and Philadelphia.

Attorney General Wickersham and his special assistant, Clark McKecher, have devoted more than a year to collecting the evidence on which the suit is based. This evidence includes copies of the alleged agreements, blacklists and reports of the various organizations, branding wholesalers and retailers, who have dared to violate the rules of the associations as "poachers," "mavericks," "scalpers" and "illegitimate dealers" to whom "short shrift" must be applied.

This is the government's first anti-trust suit conforming to the supreme court's Standard Oil decision, in that it alleges "undue" and "unreasonable" restraint of the trade of the consumer and the manufacturer.

The government charges in brief that by an elaborate system of blacklisting not only individual consumers but some of the largest industrial corporations have been prevented from dealing directly with wholesalers.

HOLDING OFF OLD AGE?—To grow old is as easy

as it is to spend money. A few seem to manage to keep young just as some, but not always the same, people seem able to save. Most men and women of middle age wonder how it is possible to do either.

It seems there is a real scientific method of keeping young. Not the following from the Philadelphia Public Ledger:

"It is the belief of Dr. Arnold Lorand, physician to the Carlsbad baths, that by following certain general rules of hygiene indicated in his important work, 'Old Age Deferred' (F. A. Davis Co., Philadelphia, \$2.50,) a man not only need no longer be 'Oldized' or 'shriveled' at 40 or 50, but may live to be 100, instead of three-score years and ten.

An address delivered by him before the Brussels Royal Society of Medical and Natural Sciences, Dr. Lorand once described old age as a chronic disease, due to degeneration of the ductless glands—the thyroid, the sexual glands, and the adrenals in particular, and in his present work he holds that these are as amenable to treatment as other chronic complications.

The work covers the care of the entire human body, as well as 'hygienics of the mind.' It deals especially with keeping the various organs well, and fully explains how the neglect of nature's indications may have serious results. The work appeals to the common sense, and is of prime importance. Its interest is so vital to all that, while much of it is necessarily technical, the reader's attention never flags. It should be in every home as a work of real reference."
