

Democratic Watchman

Bellefonte, Pa., June 30, 1911.

FARM NOTES.

—If when the hogs are growing fast their hind legs become weak feed a little bonemeal daily.

—The horse's idea of a merciful man is one who sees to it that it does not have to pull with sore shoulders.

—Agricultural experiments show that if it is necessary to fertilize the soil to secure a crop of 20 bushels of wheat per acre, it is even more necessary to fertilize for a good crop of fruit.

—The man who rents a farm buys its produce for value for a limited time. The man who buys the farm outright gets the producing value and the land both, but, after all, only for a limited time.

—Some farmers prefer level land because it looks beautiful to them. Others prefer it a little hilly because that impresses them as being picturesque. Nothing like being content with what we have.

—According to figures published by a foreign authority, the total consumption of potash for agricultural purposes in 1900 was 297,189 tons and 646,933 tons in 1909. The largest consumers were Germany, 386,376 tons, and the United States 162,376 tons.

—A well-balanced ration for a horse is near 1 to 8, for milk cows 1 to 5 for a hog 1 to 5. Then the ash or mineral content of a feed should have some consideration. An animal must have some mineral matter in its ration in order to grow and maintain a strong framework.

—The *Record* subscriber who has some Sea Island cotton which he would like to plant in a box for the oddity can secure valuable information on planting, care, etc., by writing to the Louisiana Agricultural Experiment Station, Baton Rouge, La., for a bulletin on the subject. It will be sent free upon request.

—That the hardy catalpa is one of the best fence post trees that can be grown in Iowa, is the conclusion reached by the Iowa Experiment Station. Eighteen-year-old trees that have been properly cared for will yield from 2000 to 2500 posts to the acre. The gross annual return per acre per year on the Iowa plantations studied varied from \$10.77 to \$20.34. Copies of bulletin 120, giving complete directions for growing catalpas, can be obtained free by writing to the Iowa Experiment Station, at Ames.

—There is one farm crop in the production of which—because of climate—we run away with the world. This is corn. Corn is our big crop. We raise 80 per cent. of all the corn in the world. Last year we produced 3,125,713,000 bushels. We exported 44,072,207 bushels. Last year's crop of Canada was but 18,716,000 bushels. Canada bought 15,000,000 bushels from us. One-third of all her purchases from us was corn. She could have taken twice as much—five times as much—ten times as much. And she would, had we been able and ready to become an equally good customer of hers.

—Mrs. L. A. H. Cressona, Pa., writes the *Record*, that she has quince trees that blossom every year but will not bear. Can anything be done for them? This, no doubt, is caused by fire blight which appears in the spring on the blossoms. Some flower clusters turn black and the disease is carried from flower to flower by bees and other insects. From the flowers the disease spreads to the leaves and twigs. "Blossom blight" is a different form of the same disease. The only treatment for this trouble is of a preventive nature. Trees should be kept in good, vigorous condition by cultivation and fertilization, and all blighted parts should be cut out as soon as observed.

—What has Canada got, what does she produce, that we could use—use liberally as she might use corn? What, indeed, but lumber. We could trade corn for lumber with Canada all the year 'round. That's why the Lumber Trust is spending its yellow millions like water to defeat reciprocity.

Who would most benefit from a multiplication of the Canadian corn market? The American farmer. Who would most benefit were Canadian lumber to come to us free? Every American in town or country who built a barn or a house. Every American who paid rent for a house; for no one certainly not you wise ones of the Senate, has to be told that ultimately and always the consumer pays the tax.

—Besides the scale, however, there are other enemies, viz., the peach borer, which is especially injurious in the southern section of the State, due to a lighter soil; the plum curculio, which affects the value of the fruit; the Serapiin scale (at present almost solely confined to Cumberland county, in injurious form;) the black peach louse, which does injury only in the lighter soils, and principally during the early life of the tree; the green peach louse, which only becomes seasonably and locally troublesome on younger trees; the fruit bark beetle, which is not confined to the peach, but will attack almost any weakened fruit tree—on a healthy, vigorous tree it produces no effect whatever; the twig borer of peach, which in some seasons and localities does noticeable injury and may stunt young trees to some extent; the rose-bug, which in times of plenty sometimes eats into the fruit in June and destroys it for market purposes.

—The peach crop is an important one to New Jersey, Delaware and Maryland, the industry ranking for a score of years as an important industry. It is also of great importance in parts of Pennsylvania. The San Jose scale pest gave peach growing the first serious knock-out, cleaning out orchard after orchard. This called for more careful work and watching. The old haphazard methods that did well enough 30 years ago had to be supplanted with scientific care, and the State Experimental Station prepared itself with the latest information, made experiments and finally worked a lot of good. The nurseries were kept under even closer supervision, new orchards were started in all sections of the State in a tentative way, and clean stock became the rule rather than the exception. With the ever-increasing experience in the use of insecticides and fungicides, control of the San Jose scale became a matter of routine, with results that could be absolutely counted on whenever the work was done in the proper manner. The result has been that peach growing in New Jersey is increasing and flourishing on a firmer basis than ever.

FOR AND ABOUT WOMEN.

DAILY THOUGHT.

It is the sweet and entire forgiveness of children, who ask pity for their sorrows from those who have caused them, who do not perceive that they are wronged, who never dream that they are forgiving, and who make no bargain for apologies—it is this that men and women are urged to learn of a child—Alice Meynell.

When your hot-water bottles leak do not throw them away, but fill with hot sand. Make the sand hot in the oven and pour into the bottle. It will keep hot much longer than water.

A woman bordering on hysteria one night called up her physician by telephone at a late hour, beseeching him to give her something to quiet her nerves, so that she could sleep. He directed her to run hot water into her bathtub, to sit in it and particularly to dip a Turkish bath-towel in it and let it rest over her entire spine. She was amazed over the result, soothing and comforting to the highest degree.

A good pure water bath is a tonic all can afford. The home woman who has worked hard all day till she has reached a "lifeless" feeling of weariness, should take a bath as a bracer just before dinner. Business women whose life is fatiguing, appreciate its stimulation in the morning. Women with uncertain circulation should never jump into a tub of cold water, as the shock has a tendency to weaken the heart.

Sea salt makes a strengthening home bath. A handful of salt crystals should be put in a covered vessel of hot water and let remain to dissolve over night. In the morning pour it into the freshly-drawn bath.

The camphorated bath is bracing. This is made by mixing two parts of camphor to one of tincture of benzoin and four of cologne in a bottle by shaking it well. Keep it tightly corked. When a bath of warm water is ready add enough of this mixture slowly, drop by drop, to make the water slightly milky.

In every blouse or frock the cuffs are far more important than most women realize. They are generally very prominent, for we use the hands and arms almost constantly. They give quick evidence of work that suggests either the amateur or the experienced. It is better to attach cuffs of some transparent fabric to a lawn under bodice on which is the yoke to match. And this scheme gives you opportunity to make as many gimpes as you require.

Net, allover lace, finely tucked handkerchief linen and hand-whipped insertion in rows are materials for cuffs. They should be piped at the edge with satin, velvet or linen. This can be adjusted as a flat band or as a round cord. The cuffs should be trimmed just as much as the other part of the blouse. Tiny buttons, bows or beads are excellent on these important parts of a blouse. Hand-run colored thread is another method to which many makers are resorting. Do not neglect the cuffs. They are little, but, oh, so important. They show everything that has been done for them and will repay you for the consideration that they deserve, but rarely receive.

White hose are just now receiving the big share of attention, says the *Dry Goods Economist*, due to the arrival of real summer weather and vacation periods. The demand is so much ahead of the immediate supply that it is a common thing for buyers to be told that deliveries cannot be made under ten days to two weeks. Tans are still selling well and take second place. It is almost needless to say that sales of silk and plated goods continue unabated.

Even the baby has come in for his share of pretty styles of footwear. White pique, laced with linen cord, is a clean, attractive style for morning wear. There are the most cunning little felt Juliettes edged with white rabbit skin, for the bedroom.

Kid boots of pale colors offer softness and durability, for in the modern day of "cleansers" a soiled pair can easily be freshened up. A dainty little pair of white silk booties is embroidered with silk or tiny silk ribbon.

Most novel of all is the idea of using a small piece of Irish lace, which you have kept just because you have been waiting for some use to be made of it. Over a colored silk foundation this lace is spread and its flower-like beauty is delicately appropriate for the lace and linen of the party dress.

Chocolate Walnut Cakes.—One and a quarter of a teaspoonful of baking powder, one tablespoonful of grated chocolate, one and a half tablespoonfuls of sugar, half an ounce of coarsely chopped walnut nuts, one and a half tablespoonfuls of butter, one egg, half a teaspoonful of vanilla extract. Cream the butter and sugar together, then beat in the egg, lightly stir in the flour, baking powder, grated chocolate and vanilla extract. Put in well buttered small cake tins and sprinkle the chopped walnut meats on the top. When nearly baked, brush over the top with a little beaten egg.

Sugared Sweet Potatoes.—To make sugared sweet potatoes, take the quantity of potatoes desired, boil them until they are almost done, then peel and cut into slices about half an inch thick. Sprinkle well with brown sugar and fry in a liberal allowance of hot butter.

Marry when the year is new. Always loving, kind and true; When February birds do mate, You may wed, nor dread your fate; If you wed when March winds blow, Joy and sorrow both you'll know. Marry in April when you can, Joy for maidens and for man; Marry in the month of May, You will surely rue the day, Marry when June roses blow, Over land and sea you'll go. They who in July do wed, Must labor always for their bread, Whoever wed in August be, Many changes are sure to see, Marry in September's shine, Your living will be rich and fine, If in October you do marry, Love will come, but riches tarry. If you wed in bleak November, Only joy will come, remember, When December's snows fall fast, Marry and true love will last.

Announcements.

The following are the prices charged for announcements in this column: *Sherriff \$2.00, Prothonotary \$2.00, Recorder \$2.00. All other offices \$2.00. An announcement will not be made for any candidate desiring to pledge himself to abide by the decision of the Democratic voters as expressed at the Primaries.*

SHERIFF.
We are authorized to announce that D. J. Ginter, of Huston township, will be a candidate for Sheriff, subject to the decision of the Democratic voters of the county as expressed at the primaries to be held Saturday, Sept. 30th, 1911.

PROTHONOTARY.
We are authorized to announce that John D. Miller, of Walker township, will be a candidate for County Prothonotary, subject to the decision of the Democratic voters of the county as expressed at the primaries to be held Saturday, Sept. 30th, 1911.

RECORDER.
We are authorized to announce that Frank W. Grebe, of Philadelphia, will be a candidate for County Recorder, subject to the decision of the Democratic voters of the county as expressed at the primaries to be held Saturday, Sept. 30th, 1911.

TREASURER.
We are authorized to announce that J. Mitchell Cunningham, of Bellefonte, will be a candidate for County Treasurer, subject to the decision of the Democratic voters of the county as expressed at the primaries to be held Saturday, Sept. 30th, 1911.

COMMISSIONER.
We are authorized to announce that John R. Lemon, of Ferguson township, will be a candidate for County Commissioner, subject to the decision of the Democratic voters of the county as expressed at the primaries to be held Saturday, Sept. 30th, 1911.

CASTORIA
FOR INFANTS AND CHILDREN.
Roller Flour Feed Corn Meal and Grain
Manufactures and has on hand at all times the following brands of high grade flour:
WHITE STAR OUR BEST HIGH GRADE VICTORY PATENT FANCY PATENT
The only place in the county where that extraordinarily fine grade of spring wheat Patent Flour can be secured. Also International Stock Food and feed of all kinds.
All kinds of Grain bought at the office. Flour crushed for wheat.
OFFICE and STORE—BISHOP STREET, BELLEFONTE, PA. 47-19 MILL AT ROOPSBURG.

CASTORIA
In Use For Over 30 Years.
54-35-21m The Centaur Co., New York City.

Sechler & Company
Groceries and Food Products.
With the coming of Summer the old Standard hot weather beverage Tea will be in demand. Most Teas now are used blended, but we take no chances on buying Blended Tea. Do our own blending right here in the store. Use only New Crop Goods of Good Value and Finest Flavor, not merely thrown together but compounded so as to draw the separate flavor of each and produce a new and true blend flavor. Try our 50¢ blend for either hot or iced Tea. If you want something fine go the 80¢ goods and if you are willing to go still higher, one dollar per pound, will more than please you. We carry a fine line of Straight Tea—Fermosa (Olong, Ceylon, Japan, Young Hyson, Gun Powder, Imperial)—Several Grades of each kind on all "Our Lines" of Teas. 5¢ per lb off on sales of one pound or more.
Coffees have not changed in value recently but we look for an early moderate decline. Our 25¢ and 25¢ goods are the best values of anything now offered.
We have just opened some olives that are worth your attention. Large, bright, perfect fruit at 10¢ per half pint, 20¢ per pint and 35¢ per qt. for sales of one qt. or more. Pickles—Dills, Sweets and Sours. New full Cream Cheese 18¢ per lb. Fruits and Biscuits are in demand just now and we always have them in abundance. If you want some nice, bright country dried Apples we have them. Finest Hams and boneless breakfast bacon at 18¢ per lb.

Sechler & Company,
Bush House Block, 56-1 Bellefonte Pa.,

H-O You Farmers and Agriculturists H-O
Your land must have LIME if you want to raise paying crops. Use Hydrated lime (H-O) through your drill or broadcast when you seed, for quick results, or use ordinary lime, fresh forkings, or lime for general use.
BE SURE TO USE LIME
Ground Lime and Limestone for all purposes.
Limestone crushed to any size.
Works at Bellefonte, Frankstown, Spring Meadows, Tyrone Forge and Union Furnace. The largest lime manufacturers in Pennsylvania.
Now is the time to place your orders for prompt shipments. All railroad connections. Write literature and all information and send your orders to
AMERICAN LIME & STONE CO.,
