

Democratic Watchman

Bellefonte, Pa., July 21, 1911.

FARM NOTES.

—In estimating the multiplication of weeds, it is stated that a single pepper plant will produce 18,000 seeds; dandelions, 12,000; plantain, 47,000, and burdock, 43,000.

—Mushrooms, on account of the amount of nitrogen they contain, approach nearer to animal food than any other vegetable product. An analysis made by Professor Atwood shows that mushrooms contain 3.5 per cent. proteins.

—As a preventive of head grubs, it is advised to smear the sheep's noses with tar during the months of July and August. This is best accomplished by boring holes in a log, filing the holes with salt and smearing tar over the holes.

—During the year of 1910 the United States exported over 1,500,000 barrels of apples, valued at about \$5,500,000, and nearly a million boxes of oranges, valued at about \$2,500,000. A large proportion of these apples and oranges found British purchasers.

—The turnip requires a rich soil. It does best on freshly-broken land. The late turnips may be sown broadcast, after some crop has been removed, generally during July or August. They may be stored in the cellar the same as carrots. To get the best quality of turnips it must be rapidly grown on rich, sandy soil, free from fresh manure.

—"Bone phosphate" is a name given by fertilizer makers to that combination of lime and phosphoric acid which is found in bone. This means that 54 parts of lime are combined with 46 parts of phosphoric acid. Therefore, if your tankage contains 20 per cent. of "bone phosphate," only 46 per cent. of a little over 9 per cent. of all, is actual phosphoric acid.

The location of the beehive during summer is important. Bees do not work contentedly in a hive that is exposed to the sun. During the middle, when the temperature of the atmosphere is high, work within the hive, such as comb-building, must be suspended, as the heat is too great for comfort, especially as the bodies of the little workers give off considerable warmth.

—The Department of Agriculture advises two systems of farming for the average renter, namely: The four-field system and the five-field system. In the former all the cultivated land on a farm is divided into four fields of equal size, and rotation followed in this order: First, corn; second, wheat seeded to clover; third, clover for hay or pasture; fourth, wheat; fifth, clover for hay or pasture.

—Many minor troubles of important agricultural plants and serious troubles of plants of less importance are discussed in Bulletin 328 of the New York Agricultural Experiment Station at Geneva. The purpose of the bulletin is to preserve in permanent form the notes on miscellaneous plant diseases that have accumulated during 10 years' work of the Botanical Department of the station. The Director will send the bulletin without charge to those who apply for it.

—Nitrate of soda is a powerful fertilizer when properly used. It becomes plant food as soon as dissolved and enters immediately into the composition of the plant. Care must be exercised that it is not used too freely. When too much of this salt is applied, the roots are injured and the plant becomes stunted or dwarfed. Upon examining the root system of such plants it will be found that the roots are very short and the ends are stubby. There is little tendency of these roots to form fibrous laterals.

—Potato growers should read Bulletin 328 of the New York Agricultural Experiment Station at Geneva. The results secured in a four-year series of tests on three Long Island farms not only show that it makes very little difference how the fertilizers are applied or what form of fertilizer is used, but bring out very clearly the fact that the presence of fertilizer is of comparatively slight influence unless conditions are otherwise right for growth of the plants. As usual in Long Island tests made by the station, the largest amounts of fertilizer were found least profitable. All station bulletins are sent to applicants without charge.

—Growers who are not familiar with the use of nitrate of soda should not attempt the use of this fertilizer until they have learned how to use it properly. A very slight sprinkling of salt about each plant will serve the purpose. Liquid manure is a safer fertilizer and equally valuable when properly applied. An excellent method to prepare liquid manure is to place a bushel of old unchurned cow manure in a tub or half barrel and then fill with water. Stir occasionally and in three or four days the liquid will be ready to apply. It should be used in the proportion of one quart to four gallons of the water and any quantity of it may be poured about each plant.

—At this hot season when conditions are so favorable for the growth of all insect life, it will be well to make special effort to keep down lice on the poultry and mites in the poultry houses. Cockerels intended for market will not grow and take on flesh and fat, and pullets will not mature and begin laying if they are tormented with insect pests. If the pests are exterminated at this season they are not apt to give much trouble later when the weather is cooler, although they must be regularly fought at all seasons.

—Spraying the henhouse with a mixture of kerosene and crude carbolic acid in hot water will kill the mites and many of the lice.

—Vineyardists in some parts of the State of New York have little trouble from insects; but in the Chataqua grape belt the damage from root-worm, flea-beetle, rose-chafar, blossom-midge and leaf-hopper has contributed not a little to the great decline in productivity of the vineyards in that section. Accordingly these and other insects have been and are being studied by the entomologist appointed by the station at New York under the special fund appropriated by the Legislature of 1909 for relief of the Chataqua county grape growers. Bulletin 331 of the station records the work done in control of these pests, for some of which very successful repressive methods have been developed. Any vineyardist may secure the bulletin by sending his address to the director of the station, at Geneva.

FOR AND ABOUT WOMEN.

DAILY THOUGHT.

Your daily duties are part of your religious life just as much as your devotions.—Deeher.

The new idea of wearing white skirts and dark coats is gaining each week. One hears of a great number of such suits arranged for the out-of-town holidays. The Norfolk jackets are sometimes chosen, but other women prefer the short, loose blazer coat, which fastens below the waist with three buttons and has wide revers.

A favorite coat of this type is in blue serge, with smooth surface or with a coarse twill running through it. The buttons are of white pearl, quite large and carved, and there is a sailor collar with wide revers that reach to the waist line made of white serge to match the skirt.

This skirt is plainly made, quite straight and slender, with a yard and a half hem, and an attached panel back and front. These are stitched down to within six inches of the foot line and flap loose like a swinging sash. They are quite graceful, as they give an effect of width to the narrow skirt.

The sailor collar with long revers made of white serge, or Shetland wool, or the new herringbone mohair, is quite the fashion added to dark coats. These can be made separately and buttoned or basted into the coat for the time being, but they do not look well over another collar of the coat material.

It is better to make a coat without any collar these days if one wishes to play tricks with it, such as adding a white or green or blue collar and revers to carry out some chosen color scheme. It is quite easy to finish off the neck with a silk lining.

Any woman who is at all fastidious in the lines of her clothes will know that two collars do not rest well against the neck and shoulders. The upper one will bulge at the inside line and will fall like a ruffe at its lower edge. This is the reason that so many applied lace collars look ill over a rolling collar which is attached to the coat.

The addition of white or cream sailor collars to dark blouses and suits is in full vigor. Every one prophesies that it will not last through next autumn. But I do not see why that should effect the present mode. The majority of women do not worry in July about the fashions for September. If they can look cool and well dressed now it is about all they can hope to do.

A sailor collar is certainly a most agreeable addition to many kinds of coats and blouses. It redeems the dullness of a dark blue serge; it makes a black satin frock smart enough for a luncheon or an informal dinner, and it adds greatly to the appearance of a white linen suit.

If July continues as it has started out there will be no need for any kind of clothes but the thinnest and the simplest. All the nice little cloth frocks will be suspended in the closet until better days come. Just what to wear every day when one is obliged to go out of the house is a problem.

White linen is the thing most desired because it looks and feels cool, but it lasts for so short a time that one does not feel even like going to the trouble of having a suit laundered for one day's wear. If it could only be kept from wrinkling it might be more satisfactory, but if one moves around in it for an hour it looks as though it had been rough dried.

The shops are offering a rather good substitute for linen. It is mercerized poplin and is quite attractive in many respects. Its weight is light, its colors are good and it does not crease and wrinkle quickly. Women who have suits of it find it most comfortable for everyday wear, where all white is too extravagant. It has a rib in it that keeps it from crushing, and its surface is polished by the mercerizing process until it throws off the dust very well. It comes in gray, in violet, in chamois color and in some shades of blue and green.

The prominent use that continues to be made of the fichu trimming on handsome French gowns vouches for the continuance of the mode for these quaint accessories, says the Dry Goods Economist. The American trade, as a rule, did not understand the proper application or quaint charm of this attractive neckpiece. However, with the education which last season's displays have brought about the public will be even better prepared for the fall line. Fichus should be featured as trimmings on simple evening gowns and on attractive gowns of silk, etc.

There is no doubt that satins will be employed during the early fall in the form of made-up garments, to be worn over the sheer, semi-sheer and silken materials that have formed so large a part of the spring and summer demands this year, says the Dry Goods Economist. It is also expected that some demand will develop for satins suitable for making jacket suits, but only in quantities apportioned to novelties.

One of the strongest styles noted in millinery is the use of huge bows or ribbon, which are placed horizontally across the back, on top of the crown or obliquely at the left side. The black and white striped effects are great favorites for these trimmings, says the Dry Goods Economist. The white taffeta with black velvet stripes is in excellent request in the higher grade of goods. Another variety of ribbon that is in demand for these huge bows on hats, as well as for sashes or dress trimmings, is high-luster satin. Large use is being made of these high-luster satins in the medium and extremely wide widths.

Children of the present day will not be "seen and not heard." They have learned that a wise doctor has said that the more a child is heard the finer will become its lungs, the deeper its breath and the more lasting its health. Every child must be allowed to fidget. It is not only nice for the child, but an absolute necessity to insure normal development. The modern child has advantages over its parents.

A newspaper can be made use of in a variety of ways in the household. It is invaluable for rubbing up the kitchen grate, and does as good work as a brush. It can be used for cleaning stained bottles. Nearly fill the bottle with water and into this but small pieces of newspaper until the water is filled with them, suggests an exchange. Work them around with a stick, after which wash out with clean water, and the bottle will be found as clear as crystal.

Announcements.

The following are the prices charged for announcements in this column: Sheriff \$8.00, Prothonotary \$8.00, Treasurer \$8.00, Registrar \$6.00, Recorder \$6.00. All other offices \$5.00. An announcement will not be made for any candidate unwilling to pledge himself to abide by the decision of the Democratic voters as expressed at the Primaries.

SHERIFF.

We are authorized to announce that D. J. Geringich, of Huston township, will be a candidate for Sheriff, subject to the decision of the Democratic voters of the county at the general primaries to be held Saturday, Sept. 30th, 1911.

We are requested to announce A. B. Lee, of Potter township, as a candidate for sheriff, subject to the decision of the Democratic voters of the county as expressed at the primaries to be held Sept. 30th, 1911.

TREASURER.

We are requested to announce that J. Mitchell Cunningham, of Bellefonte, will be a candidate for County Treasurer, subject to the decision of the Democratic voters of the county at the general primaries to be held Saturday, Sept. 30th, 1911.

We are authorized to announce that John D. Miller, of Walker township, will be a candidate for County Treasurer, subject to the decision of the Democratic voters of the county at the general primaries to be held Saturday, Sept. 30th, 1911.

We are authorized to announce the name of James Schofield, of Bellefonte, as a candidate for County Treasurer, subject to the decision of the Democratic voters of the county at the general primaries to be held Saturday, Sept. 30th, 1911.

We are authorized to announce that Frank W. Grebe, of Philippsburg, will be a candidate for County Treasurer, subject to the decision of the Democratic voters as expressed at the primaries Sept. 30th, 1911.

PROTHONOTARY.

We are authorized to announce that D. R. Foreman, of Centre county, subject to the decision of the Democratic voters of the county, as expressed at the general primaries to be held Saturday, Sept. 30th, 1911.

FOR DISTRICT ATTORNEY.

We are requested to announce that D. Paul Fortney of Bellefonte, will be a candidate for District Attorney, subject to the decision of the Democratic voters of the county as expressed at the general primaries to be held Saturday, Sept. 30th, 1911.

We are requested to announce that J. Kennedy Johnston Esq., will be a candidate for District Attorney, subject to the decision of the Democratic voters of the county at the primaries to be held Sept. 30th, 1911.

We are requested to announce that S. Kline Woodrow, of Bellefonte, will be a candidate for District Attorney, subject to the decision of the Democratic voters of the county at the primaries to be held Sept. 30th, 1911.

We are requested to announce that John M. Keichline, Esq., of Bellefonte, will be a candidate for District Attorney, subject to the decision of the Democratic voters of the county at the primaries to be held Sept. 30th, 1911.

COMMISSIONER.

We are authorized to announce that John R. Lemon, of Ferguson township, will be a candidate for County Commissioner, subject to the decision of the Democratic voters of the county, as expressed at the primaries to be held Saturday, Sept. 30th, 1911.

We are requested to announce that John L. Dunlap will be a candidate for County Commissioner, subject to the decision of the Democratic voters of the county as expressed at the primaries to be held Sept. 30th, 1911.

We are authorized to announce John H. Runkle, of Potter township, as a candidate for County Commissioner, subject to the decision of the Democratic voters of the county, as expressed at the primaries Sept. 30th, 1911.

We are authorized to announce that William Noll, Jr., of Spring township, will be a candidate for County Commissioner, subject to the decision of the Democratic voters of the county as expressed at the primaries to be held on Saturday, Sept. 30th, 1911.

We are requested to announce that William A. Stover, of Penn township, will be a candidate for County Commissioner, subject to the decision of the Democratic voters, as expressed at the primaries Sept. 30th, 1911.

We are authorized to announce D. A. Grove, of College township, as a candidate for County Commissioner, subject to the decision of the Democratic voters of the county as shown at the primaries Sept. 30th, 1911.

RECORDER.

I hereby announce myself as a candidate for Recorder, subject to the decision of the Democratic voters of the county to be held Sept. 30th, 1911. EDWARD C. MCKINLEY, of Boggs township.

We are authorized to announce that W. Francis Speer, of Bellefonte, is a candidate for the nomination for Recorder by the Democratic party; subject to the decision of the Democratic voters of the county, as expressed at the primaries to be held Sept. 30th, 1911.

We are authorized to announce that D. A. Dietrich, of Walker township, will be a candidate for Recorder of Centre county, subject to the decision of the Democratic voters of the county, as expressed at the primaries to be held Sept. 30th, 1911.

MONEY TO LOAN.

MONEY TO LOAN, on good security and houses to rent. J. M. KEICHLINE, Attorney-at-Law, Bellefonte, Pa. 51-14-ly.

Counterfeits, Imitations and "Just-as-good" are but Experiments, and endanger the health of Children—Experience against Experiment.

WHAT IS CASTORIA Castoria is a harmless substitute for Castor Oil, Paregoric, Drops and Soothing Syrup. It is Pleasant. It contains neither Opium, Morphine nor other Narcotic substance. Its age is its guarantee. It cures Croup, Whooping Cough, Colic, Wind Colic, Teething Troubles, cures Constipation and Flatulency. It assimilates the Food, regulates the Stomach and Bowels, giving healthy and natural sleep. The Children's Panacea—The Mother's Friend.

Bears the Signature of CHAS. H. FLETCHER.

In Use For Over 30 Years. 54-36-21m

OFFICE AND STORE—BISHOP STREET, BELLEFONTE, PA. 47-19 MILL AT ROOFSBURG.

Groceries. Groceries.

Sechler & Company Groceries and Food Products.

With the coming of Summer the old Standard hot weather beverage Tea will be in demand. Most Teas now are used blended, but we take no chances on buying Blended Teas. Do our own blending right here in the store. Use only New Crop Goods of Good Value and Finest Flavor, not merely thrown together but compounded so as to draw the separate flavor of each and produce a new and true blend flavor. Try our 60¢ blend for either hot or iced Tea. If you want something fine go the 80¢ goods and if you are willing to go still higher, one dollar per pound, will more than please you. We carry a fine line of Straight Teas—Formosa Oolong, Ceylon, Japan, Young Hyson, Gun Powder, Imperial—Several Grades of each kind on all "Our Lines" of Teas. 5¢ per lb off on sales of one pound or more.

Coffees have not changed in value recently, but we look for an early moderate decline. Our 25¢ and 22¢ goods are the best value of anything now offered.

We have just opened some olives that are worth your attention. Large, bright, perfect fruit at 10¢ per half pint, 20¢ per pint and 35¢ per qt. for sales of one qt. or more. Pickles—Dills, Sweets and Sour. New full Cream Cheese 15¢ per lb. Fruits and Biscuits are in demand just now and we always have them in abundance. If you want some nice, bright country dried Apples we have them. Finest Hams and boneless breakfast bacon at 15¢ per lb.

Sechler & Company, Bush House Block, 56-1 Bellefonte Pa.

Lime and Crushed Limestone.

H-O You Farmers and Agriculturists H-O

Your land must have LIME if you want to raise paying crops. Use Hydrated lime (H-O) through your drill or broadcast when you seed, for quick results, or use ordinary lime, fresh forkings, or lime for general use.

BE SURE TO USE LIME Ground Lime and Limestone for all purposes. Limestone crushed to any size.

Works at Bellefonte, Franktown, Spring Meadows, Tyrone Forge and Union Furnace. The largest lime manufacturers in Pennsylvania.

Now is the time to place your orders for prompt shipments. All railroad connections. Write for literature and all information and send your orders to AMERICAN LIME & STONE CO., 56-4 Office at TYRONE, PA.

The Pennsylvania State College.

The Pennsylvania State College Offers Exceptional Advantages

IF YOU WISH TO BECOME
