FARM NOTES

-Fall rye will make good spring pasture at a time when pasture will be great-

-You can usually tell a good farmer by the orderly appearance of his barn floor and granary.

-Figures gathered from the Fruit Growers' Association of the West, place the cost of placing and caring for an acre of apple orchard for the first six months

-The celery growers of Kalamazoo, Mich., last year grew 800,000 boxes of cel-ery, each containing six dozen stalks. The value of this crop is \$800,000—one

-A Pennsylvania farmer writes that in curing warts on horses and cows he has found nothing so simple and reliable as to put on vinegar, then soda and let it He says that one or two applica-

-One Middle West seed company purchased recently 700 bushels of alfalfa seed. The seed, uncleaned, sold for \$8.00 the bushel, and was sold by Steven Heel, of Shawnee, Okla., who received \$5950 for

-A good horseman never trots a draft horse, even when he has no load. That is not what they are for. Some degree of speed is desirable, however, even in a drafter, and the fast walk is not only the proper thing, but the only speeding to which a heavy draft horse should be permitted.

-Everyone should compost every bit of manure. Build a rail pen in the garden, and into this throw all the ashes and trash about the place that will rot and become fertilizer. Pour the wash water into it, for it has some value. The pile will be ready to scatter over the gar-

-Observations made by the Government officials show that the month of maxium egg laying of hens is April, with birds kept in a closed, warm house, and March with those kept in a curtain front house. As eggs bring a higher price in March than in April, it should not take long to determine the better method of

-Rotation of crops will help you to improve the fertility of your soil and make it possible to feed more animals on the farm. Select the crops with reference to soil building, market and animal requirements. It is not wise to plant crops that are not needed, but plants that will pay in money, animal products, soil

-Copulation does not fertilize the egg laid the same day. A study of the ova-ries teaches that the egg that was laid today was already coated with shell at least 12 hours before being laid. That meet-ing, however, should fertilize a series of eggs laid afterwards by the hen, although it might be several days before fertility in eggs might be found. Some authori-ties claim that a male actually fertilizes

ten eggs at the same time.

—In the matter of breeds one has a wide choice. The mutton breeds of which is better—try an experiment sheep are numerous and among them the Shropshire, Southdown, Oxford, Lin-coln, Cotswold, Leichester, Dorset and sheep are nu Hampshire have all proved hardy and profitable in this country. The mutton breeds are very prolific, the ewes frequently having twins and triplets, and with ordinary care 50 ewes will bring forth more than that number of lambs.

-That farmer makes the most money who devotes his fields to the growing of crops to feed stock, making use of all the raw products at home, thereby not only saving much of the cost of transportation but also maintaining the fertility of the soil. Taking everything into consideration, corn will probably produce more food per acre for domestic animals than any other plant and there are but few feeds which can be fed in a greater variety of ways.

-Notwithstanding the extensive use of the steam cars, the great increase in the trolley lines, all of which are well patronized, the advent of the automobile that is utlized to such an extent that it is the "car for the million," good horses that are well proportioned and present a comely appearance bring good prices. In fact, at no other period in the history of the country have good horses paid better profits over and above the expense of raising them than at the present time.

-The collar should fit-be just right in length and shape. If worn by the same horse all the time it will shape itself to the neck. But nothing can overcome a wrong size. It must be snug and not tight, free but not too loose. The hames must be adjusted right. If the top strap is too tight the neck is pinched and the tugs raised too high. If the top strap is too long the tightening of the hame strap below causes a bad fit and may throw the pulling joint of the tugs too

-It is about as James J. Hill says: the only thing that would drive the people back to the land is empty stomachs. When times are bad there is always a certain number of people who go to the country because they feel they can have a roof over their heads there and enough to eat. Otherwise, they are bred and wed to city life and would feel as home-sick and out of place in the country as a born farmer would be in a crowded tenement district. Some people are better off in the city in ordinary times. Let them stay. There is competition enough al-ready in the country. The need is not for more farmers, but for better ones.

—Some fruit growers believe that the most appropriate time to plant an apple orchard is in the fall, from about the last of October till the middle of November. when the ground is loose and moist enough to work well, but not wet and sticky. At that time the growing season is over and the trees will hardly be injured at all by the change from nursery to orchard. The roots that have been cut orchard. The roots that have been cut in digging and preparing for resetting will callous over, and the ground will settle firmly about the roots, and in the spring the trees are ready to awaken into new life without a check to their growth. But in severe winters some trees will be lost. The better plan is to set the trees in a treech with top closes to the in a trench with top sloping close to the ground. Then cover with litter to prevent severe freezing. They will be in fine shape for early spring planting.

For 2,000 years this glorious temple stood there on the Acropolis as perfect as it was when Phidias completed it nearly 500 years before the birth of Christ, and it would have been standing just as complete today but for that rascally Venetian shell. In the year mentioned above Athens, still in the possession of the Turks, was besieged by the Venetians, and a bomb from one of their guns falling through the roof of the Parthenon, in which the Turks had stored a lot of powder, left it the ruin it has ever since remained. -Rev. PROPOSED AMENDMENTS TO THE CONSTITUTION SUBMITTED TO THE CITIZENS OF THIS COMMONWEALTH FOR THEIR APPROVAL OR REJECTION, BY THE GENERAL ASSEMBLY OF THE COMMONWEALTH OF PENNSYLVANIA, AND PUBLISHED BY ORDER OF THE SECRETARY OF THE COMMONWEALTH, IN PURSUANCE OF ARTICLE XVIII OF THE CONSTITUTION. Number One.

A JOINT RESOLUTION.

Section 1. Be it resolved by the Senate and House of Representatives of the Commonwealth of Pennsylvania in General Assembly met. That the following amendment to the Constitution of Pennsylvania be, and the same is hereby, proposed, in accordance with the eighteenth article thereof.

That section six of article five be amended, by striking out the said section, and inserting in place thereof the following:

That section six of article five be amended, by striking out the said section, and inserting in place thereof the following:

Section 6. In the county of Philadelphia all the jurisdiction and powers now vested in the district courts and courts of Common Pleas, subject to such changes as may be made by this Constitution or by law, shall be in Philadelphia vested in five distinct and separate courts of equal and coordinate jurisdiction, composed of three judges each. The said courts in Philadelphia shall be designated respectively as the court of Common Pleas number one, number two, number three, number four and number five, but the number of said courts may be by law increased, from time to time, and shall be in like manner designated by successive numbers. The number of judges in any of said courts, or in any county where the establishment of an additional court may be authorized by law, may be increased, from time to time, and whenever such increase shall amount in the whole to three, such three judges shall compose a distinct and separate court as aforesaid, which shall be numbered as aforesaid. In Philadelphia all suits shall be instituted in the said courts of Common Pleas without designating the number of the said court, and the several courts shall distribute and apportion the business among them in such manner as shall be provided by rules of court, and each court, to which any suit shall be provided by law.

In the county of Allegheny all the jurisdiction and powers now vested in the several numbered court of Common Pleas, composed of all the judges in commission in said courts. Such jurisdiction and powers now vested in the several numbered court of Common Pleas, composed of all the judges in commission in said courts. Such jurisdiction and powers hall extend to all proceedings at law and in equity which shall have been instituted in the several numbered courts, and shall be subject to such changes as may be made by law. The president judge of said court shall be selected as provided by law. The number
