This is a victory for the plaintiffs in the lower court but the attorneys for the defendant company have filed exceptions to the decree of the court and will appeal the case to Supreme court.

The case is one that has excited considerable interest and a certain degree of animosity among the people of State College and Boalsburg. The State College Water company was organized several years ago and attempted to furnish their patrons with water from the supply in Shingletown gap. Finding this inadequate in the early part of 1910 they went into the Galbraith gap above Boalsburg and under the law of eminent domain seized the water supply there and had already lain two miles of pipe when they were stopped by a preliminary injunction issued at the instance of the Boalsburg Water company, which brought action to prevent the forcible seizure of the water, claiming a prior right thereto under the act of eminent domain. The case was heard before Judge Orvis and was long drawn out, many witnesses being heard on both sides. John Blanchard is chief counsel for the plaintiffs and N. B. Spangler and C. LaRue Munson, of Williamsport, for the defendants.
