what they are doing. A day or two since I called into the handsome millinery saloon of Mrs. Geo. W. Wolfe, on busi ness, just as she received and was opening the third duplicate of hats since her spring purchase. They were beautiful creations, with such an array of shapes and styles it is not surprising that her saloon is headquarters for all the latest models i

feminine head wear. M. C. Stover, the popular landlord of the Spring Mills hotel, has added several improvements and conveniences to the building for the comfort of guests. The hotel has been for years headquarters for commercial agents. His son-in-law, P. K. Detwiler, has a fine livery in the rear, where fast teams can be had at any time. Mr. Detwiler has recently added an automobile and

several new vehicles to the livery. I met one of the condensary officials a day or two since, and inquired about the plant to be erected here, stating that there were grave doubts of it ever being built. He remarked good humor' edly, "Oh, don't get out of patience, don't be like the Irishman who said he combed himself but once a year, and it nearly killed him. But let me tell vou that the condensary plant will be here and in operation by fall." So, as the old song has it, we'll wait a little longer.

Not a house, barn or stable is left intact in Jacksonville, and 1000 inhabitants are camping in the fields. Many are suffering from hurts and physicians have been sent to the stricken district from neighboring towns.

Members of the Unity Presbyterian church had remarkable escapes from death when the tornado tore the root from the building. Many of the con-

gregation suffered slight injuries. So far it is impossible to make an accurate estimate of the loss in the tornado district. Figures received show that at least \$100,000 worth of property was destroyed. This is exclusive of a large number of valuable orchards swept away and summer crops simply wiped out of existence.
