## Why Wilson Should Be Elected.

BRYN MAWR, PA., August 15th, 1912. P. GRAY MEEK, Proprietor and editor, DEMOCRATIC WATCHMAN, Bellefonte, Pa.

Dear Sir :-- I should like to have the privilege and pleasure of writing a letter paign. First I am enclosing an editorial ative to the Republican "soup houses." known as Carbon county disease. I am fully aware of the fact however This is a contagious and infectious dishardly be possible.

I am also writing you three extracts fifty to eighty per cent. of cattle affected from the three Presidential candidates die. The animals affected resemble speeches of acceptance of the nomination very much those cattle affected with for President of United States touching black leg, or Anthrax, and yet by a careupon the constitution of the United ful examination the distinction can be States. The first is from Mr. Taft's easily determined. presidential speech of acceptance in which he says.

"The Republican party stands for the constitution as it is, with such amendments adopted according to its provisions as new conditions thoroughly understood may require. We believe that it has stood the test of time, and that there have been disclosed really no serious defects in its operation. It is said that this is not an issue in the campaign. It seems to me it is the supreme issue. The Democratic party and the form-er Republicans who have left their party are neither of them to be trusted, in this subject as I have shown. The Republican party is the nucleus of that public opinion which favors constant progress, and development along safe and sane lines and under the constitution, as we have had it for more than one hundred years, and which believes in the mainte-nance of an independent judiciary as the Keystone of our liberties and the balance wheel by which the whole governmental machinery is kept with-in the original plan."

The No. 2 form is from Mr. Wilson's peech of acceptance in which he says:

"Plainly, it is a new age. The tonic of such a time is very exhilerating. It requires self-restraint not to attempt too much, and yet it would be cowardly to attempt too little. The path of duty soberly and bravely trod is the way to service and distinction, and many adventurous feet seek to set out upon it. There never was a time when imatience and suspicion were more eenly aroused by private power selfishly employed, when jealousy of everything concealed or touched with any purpose not linked with general good, or inconsistent with it, more

do hope that the people will be rewarded for their patience with the election of Mr. Wilson.

With best wishes for the DEMOCRATIC WATCHMAN and Bellefonte, I am, Very respectfully yours, EDWARD L. POWERS.

Fatal Cattle Disease.

EDITOR WATCHMAN:

Dear Sir:-The mysterious disease which has caused the death of about thirty young cattle pastured on the Allegheny to the DEMOCRATIC WATCHMAN on the mountains at what is known as Beaver's general issues of the presidential cam- Meadows, or Beaver's Mills, has been proven to be Hæmorrhagic Septicæmia, taken from the Philadelphia Record Wed- commonly known as Buffalo or deer disnesday morning, August 14th, 1912, rel- ease, and in some parts of Pennsylvania

that you are strictly up-to-date and have ease, caused by a germ usually found in all New York and Philadelphia's leading the swampy pastures in the mountainpapers, but, I felt so serious about this ous regions, especially where there is a matter that I thought your eyes might lot of decomposed vegetable matter. This possibly miss the editorial, which would disease spreads very rapidly, and the

mortality being very high, anywhere from

It attacks mostly young cattle, among which it is most virulent, and is transmissible to all domestic animals. It has not been known to have attacked human beings.

The animals affected develop and show the effect of a high fever, rumination ceases, staring coat, some times a cough, slight bleeding from nose and mouth, and a mucous discharge. Some animals develop a swelling of the glands between the jaws and arcund the throat causing breathing to be labored and swallowing some times impossible, the visible mucous membranes of eve and nostrils being a deep red or violet tinge. The animal strays from the herd, walks with a staggering gait, finally dying without much struggling.

The blood is very black, otherwise unchanged. Death may occur in six hours or may be delayed as long as four days. As a precaution it is better to remove all animals from infected pastures, keeping them from other cattle and animals as much as possible. Disinfect stable. troughs, mangers and yards as thoroughly as possible. In addition to pasture, feed good wholesome food, protect from cold and dampness so that exposed cattle may resist the disease to a greater advantage, should they become infected. Burn the carcass of animals dying of this disease, or bury deeply, covering with lime so as to hasten decomposition.

Last Friday Dr. S. M. Nissley, of Bellefonte, and Dr. W. H. Fry, of Pine Grove Mills, made an investigation of the pastures and animals as far as possible. On

broke out he enlisted for three months also leaves three sisters, Mrs. Dennis ships to see that the law is enforced. service after organizing a company, of Mongan, of Coleville; Mrs. Nora Hen- The matter will be brought up at the which he was made lieutenant. -----Nittany valley is hard up for resident physicians. Dr. P. S. Fisher, of Zion, has been housed up for months with no hope of ever being able to resume practice, while Dr. S. S. McCormick, of Hublersburg, who has been a sufferer with Bright's disease for some time, was stricken with paralysis about ten days ago and is now almost helpless. Both doctors are under the care of Bellefonte physicians, and everything possible is being done for their comfort and restora-

----Mechanics and laborers are in demand at State College, owing to the building operations going on there and the necessity of getting the buildings completed by the opening of college, if possible. Good headway is being made upon the large addition to the engineering building and while it will hardly be completed in time for the opening of college it will be within a week or two thereafter. Twelve houses are also in course of construction and to finish these on time will require some tall hustling on the part of the contractors, but that is what they are aiming to do.

-The remodeling of the Nittany Valley road is proceeding very slowly, only about three miles of the road having been completed. When work was started it was stated that enough men would be put on the job to complete the road through to Cedar Springs this fall. Now the reason given out for not doing so is the fact that the stone cannot be secured in quantities great enough to work any more men than they now have with tuberculosis Mrs. Sophia Yaudes on the job. Boss Hurley figures that at died at her home in Moshannon on Tuesthe present rate they will probably be day afternoon, aged sixty-four years.
