Personal Investigation.

An old woman walked into a bank in Inverness, threw down her depositbook, and said she wished to draw all her money. Having got it, she retired to a corner of the room and counted it . She then marched up to the teller, and exclaimed: "Ay, that'll doe, ma man; jist pit it back again. I only wanted to see if it was a' richt."-Dundee News.

Truth in Old Adage.

In children the training of the senses, so necessary, is for the most part unconscious and self-attained, as in games, yet the science of psychology has invented tests to aid such training of the senses. There seems to be a lot of truth in the old saying: "Do not believe all you see, nor half you hear."

Opals Readily Affected By Changes of Temperature, and This Has Brought Them III Favor.

The superstition which causes people to regard opals with awe as the cause of ill luck, and even death, is due to a peculiar observation made many years ago. Opals were considerably in use in Venice during the plague and it was noticed there in the hospitals that before death the stone would sometimes brighten upon the victim's finger. It never seemed to occur to the people that the illness could produce a glow of color. They took it for granted that the stone occasioned the illness.

As a matter of fact, opals are affected by heat, even by that of the hand, and the fever, being at its height just before death, caused the colors to shine with unwonted clear-

Real Howler.

A good story is being told of a gentleman not unknown in South African musical circles. He is rather proud of his vocal abilities. Recently he attempted in public to render "The Owl."

A friend afterwards remarked that the music was not suitable to his compass, and that he should get it in the key of C.

Our friend immediately marched of to a music shop and announced: "I want 'The Owl' in C."
