Concerning Easter Eggs.
There are many superstitions in connection with Easter, and each country has a custom of celebrating it peculiar to itself; but, while each varies, they all unite to observe the spirit of spring-time, and all Christians rejoice that the Lord of life forever won victory over death.

Among the many quaint superstitions is the old Aryan one which typifies the return of the sun of springtime by a golden egg—eggs being distributed at the early equinox by priests to strengthen the hopes of the people that the bleak, cold days of winter might soon cease and a brighter time ensue.

The Persians believed that the earth was hatched from an immense egg on Easter morning. The Aryans also believed the sun to be a large golden egg which was constantly rolling nearer to the earth.

With the Jews, says the *Delineator*, the egg became a type of their rescue from the land of bondage, and in their feast of the passover eggs occupied a conspicuous place in the services. It was their connection with the latter that finally caused them to be used by Christians the world over in celebrating Easter—the egg of resurrection into a new life—bringing a message of life from death, as it were.

The Tyrolean Easter eggs are similar to our valentines, for, besides being most beautifully tinted, they have in unique lettering mottoes representing appropriate wishes for the recipients.

The priests of Italy bless all eggs brought to service on Easter morning, and each person carries his back home, where they are placed on a kind of altar arranged for the purpose surrounded by lighted candles and often flowers. Then the members of the family and any guests abiding with them eat these holy eggs as a safeguard against disease and danger. They are hard boiled before they are taken to the church.

High Pressure Days.

Men and women alike have to work incessantly with brain and hand to hold their own nowadays. Never the demands of business, the wants of the family, the requirements of society, more numerous. The first effect of the praiseworthy effort to keep up with all these things is commonly seen in a weakened or debilitated condition of the nervous system, which results in dyspepsia, defective nutrition of both body and brain, and in extreme cases in complete nervous prostration. It is clearly seen that what is needed is what will sustain the system, give vigor and tone to the nerves, and keep the digestive and assimilative functions healthy and active. From personal knowledge, we can recommend Hood's Sarsaparilla for this purpose. It acts on all the vital organs, builds up the whole system, and fits men and women for these high-pressure days.

The Meaning of Palm Sunday.

Palm Sunday is recognized in the Roman Catholic church as the triumphant entry of Christ into Jerusalem amid the hosannas of the people, for this day, the gospel tells us, "a weakened or debilitated condition of the nervous system, which results in dyspepsia, defective nutrition of both body and brain, and in extreme cases in complete nervous prostration. It is clearly seen that what is needed is what will sustain the system, give vigor and tone to the nerves, and keep the digestive and assimilative functions healthy and active. From personal knowledge, we can recommend Hood's Sarsaparilla for this purpose. It acts on all the vital organs, builds up the whole system, and fits men and women for these high-pressure days."
