GLASS DIAMONDS FOR AFRICA

Trading Schooner, Sailing From New York, Is Going to Show Natives "Movie." Too.

When the stiff nor'easter which whipped the bay into foamy whitecaps abates sufficiently a trim little schooner, Adelia T. Carleton, will slip her mooring at pier 11, North river, and set her head for the coast of Liberia, reports the New York Sun.

Laden down to her gun'les with trinkets, including bracelets of brass and glass diamonds as big as the Koltingor the sturdy little threemilk channel on what is probably the first expedition of its kind that has left these parts in some time. Aboard the craft will be Capt. D. S. Kent, Mate F. E. Lawry, Mrs. Lawry and eight seamen.

The idea of the voyage of the Adelia T. Carleton, which is being backed by several New Yorkers who form the American Tropical Trading company, is to descend on the Liberian coast, barter with the natives, exchanging the attractive glass diamond cargo for the ivory, teak, and ebony, and return to this country with the hold of the little schooner groaning under the weight of riches. Incidentally the cannibals along the ivory coast, if there are any now, will get a chance to see their first movie show.

Skipper Kent says that the round trip voyage will take about four months. He expects to reach Liberia in 25 days with fair weather and

His Only Promise.

A promise to his wife to stay at home more at night and to prepare for the next world was the only pledge made by Max M. Hunberry, defeated candidate for congress from the First Kentucky district.

Hunberry's report filed recently in Washington showed he neither received nor spent a cent.

"The only promise I made to any human being during the whole of my campaign," read the affidavit, "was to my wife. I did promise her I would be with her at least as much or more after the election than I had prior thereto, and I did give her a little friendly advice, which was this: That we both pray earnestly to get to | read into the law, a lawyer recalled a heaven, as there was absolutely no famous case the other day in which danger of us having to go to Wash- the rule of reason had been read out ington."---Utica Globe.

REAL MEANING OF FINESSE

Possibly Here Are Ideas Which May Not Have Been Brought to Your Mind Before.

Finesse is one of those wonderful French words which seems to mean so much and yet, when one hunts them right down to their fundamentæl essence, turn out to mean really nothing so very much at all.

The word finesse as originally introduced into this country meant the maneuver in whist, by which you take a trick from your opponents with a inferior, also, to one possessed by your opponents.

Speaking generally, without chasing the word too near its lair, finesse means the art of doing things niftily -I find it necessary to refer constantly to American slang in order to get the best definition for subtle French expressions.

Now there is, sisters and brethren, an old saving which saith that it isn't so much what you do as how you do it. The thing has a tang of the South about it, and I suspect that it really isn't much older than the Louisiana purchase; but, be that as it may, to lift an expression from the newspaper editorial writers, finesse has to do with how you do things .- George Vaux Bacon in the Green Book Maga-

It can hardly be donied that this habitual self-mastery, this habitual control over one's emotions, is one of the chief reasons why so much of American life is so uninteresting and monotonous. It reduces the number of opportunities for intellectual friction, it suppresses the manifestation of strong individuality, often it impoverishes the inner life itself. But, on the other hand, it has given to the American that sureness of motive, that healthiness of appetite, that boyish frolicsomeness, that purity of sex instincts, that quickness and litheness of manners, which peans; it has given to him all those qualities which insure success and ber of any kind of society

Not Taught to Spell in Austria. The search for information on the pronunciation of some of the strangey spelled towns involved in the European situation has brought some facts hat throw light on the public policies pursued by the Austrians towards hose subject to them. In this city, ately, a well appearing, well-to-do sublect of Austria-Hungary was approached by a man who wanted some of these jawbreaking words pronounced for him. The Austrian did not seem to be an ignorant man. He spoke good English, but he confessed hat he could give no help. "I might ecognize the name of the town if I heard it spoken," he said, "but I cannot identify it by the spelling. You see, we are not taught to spell at home, and I know nothing that will help."-Philadelphia Record.

In Praise of Corned Beef.

I have never been to a dinner party where corned beef was the piece de resistance. Certain climbers doubtful of their position would of course shrink from offering a viand generally regarded as inexpensive; but if you 30 to the right predatory butcher you can spend any amount of money—even to mortgaging the old farm-on a costly cut of beef, and then get it saltpetered with a wonderful and special orilliancy. Just as in Pendennis Miss Fotheringay, of the Theaters Royal, Drury lane and Crow street, declared she would go anywhere with a gentleman who offered her lobster and champagne with honorable intentions, myself would go anywhere to a bostess who offered me corned beef, 10 matter what her intentions .-Franklin James, in the Atlantic.

A young mother living in New York, drowned herself in agony at the discovery that she was a consumptive and had transmitted to her idolized boy the seeds of consumption. When the doctors told her the child was diseased she caught him in her arms and they died together. Consumption is not hereditary. Consumption has been cured, a fact which has been proven in autopsies in which the lungs show the healed scars of tuberculosis. Hope should never be taken from the consumptive. It is a certain thing that people with obstinate cough, bronchitis, bleeding at the lungs, weakness and emaciation, conditions which if neglected or unskillfully treated terminate in consumption, have been perma nently benefited by the use of Dr. Pierce's Golden Medical Discovery.
