Near the top of the Seven mountains on the return trip home they came upon a large black bear with two cubs cavorting around in the middle of the road, and evidently in full enjoyment of a sun bath. The motorists stopped the machine while the bears took their own time vacating the road. On Sunday Rev. Kessler delivered a well constructed and very appropriate sermon on some of the seemingly contradictions found in the word of God.

Scarcely one woman in a thousand really appreciates the influence of her sexual organism over her whole life. It is only the skilled physician who has time and again traced diseases back along the delicate nerves to the sensitive womanly organs, who understands how closely related are these organs to every healthy function and attribute of the body. Women who have used Dr. Pierce's Favorite Prescription for diseases of the delicate organs understand the remarkable relief given to overstrung nerves. It relieves irritability, hysteria, depression, spasms and various other forms of nervous disease because these originate in a diseased condition of the delicate womanly organs. "Favorite Prescription" is a special remedy for woman's special ailments. It makes weak women strong and sick women well.

Hood's Sarsaparilla.

Loss of Appetite

MOST SUCCESSFULLY TREATED BY TAKING HOOD'S SARSAPARILLA.

Loss of appetite is accompanied by loss of vitality, which is serious.

It is common in the spring because at this time the blood is impure and impoverished and fails to give the digestive organs what is absolutely necessary for the proper performance of their functions.

Hood's Sarsaparilla, the old reliable all-year-round medicine, is especially useful in the spring. Get it from your druggist today. By purifying and enriching the blood and giving vitality, vigor and tone, it is wonderfully successful in the treatment of loss of appetite and the other ailments prevalent at this time. It is not simply a spring medicine—it is much more than that—but it is the best spring medicine.

Hood's Sarsaparilla makes the rich red blood the digestive organs need.
