PINE GROVE MENTION.

Farmer Frank B. Homan has the auto

Mrs. John Wright and son spent last week among friends at Zion.

Mrs. Frank Gates, who has been ill the past month, is now recovering.

The first whiff of winter came Monday night with a snow squall and ice. Mrs. Catherine Stover is this week visiting the G. F. Miller home on the cor-

J. M. Weiland, of Lebanon, spent last week among old friends in and about

Elmer Evey, on going to the barn Saturday morning, found one of his best horses dead.

Col. D. F. Fortney, one of Bellefonte's legal lights, spent Saturday in town on

Charles Colobine will offer at public sale next Tuesday, at Baileyville, his overplus stock.

Mr. and Mrs. Frank Bowersox last week visited their friends of long ago at Middleburg and Millheim. Rev. A. A. Price has been holding a

protracted meeting at Meek's M. E. church the past two weeks. The John E. Reed sale last Thursday was well attended and everything was

handed down at fair prices. Mr. and Mrs. N. C. Neidigh enjoyed a drive over old Tussey Saturday to visit

friends in and about Neff's Mills. M. C. Rossman was unfortunate in having his black stallion die last Thurs-

day after only an hour's sickness. Tuesday morning Claude Williams started in as Isaac Woomer's right bower

in the milling business at Graysville. J. D. Neidigh and crew are busy as

nailers putting up a 3000 bushel lime stack before cold weather interferes. Mr. and Mrs. J. H. Neidigh spent Fri-

day in town. Mrs. Neidigh did some shopping while J. H. did some collecting. Last Thursday Fred A. Roush hied himself to Lewistown and is now holding down a good job in the Burnham steel

Miss Grace, oldest daughter of J. C. and Mrs. Bailey, is suffering with an attack of typhoid pneumonia and is seri-

A. C. Kepler, with his mother, mctored to Tyrone where they spent Tuesday and Wednesday with Dr. A. B. Markle and family.

John Mong will quit farming in the spring and flit to near State College, to the W. K. Corl tenant house, with a view of educating his children.

Mr. and Mrs. William Felding, of Staten Island, are visiting friends here-abouts. Mrs. Felding before her marriage was Miss Sadie Keichline.

Perry Gentzel, one of Nittany valley's prosperous farniers, was among the farmers here on Saturday and purchased a bunch of young stock for wintering.

Mrs. Mary Gordon, of Erie, has been at the bedside of her brother, David B. Hess, who has been quite ill the past month, but is now convalescing nicely.

Next Sunday afternoon Rev. W. H. Gramb will fill the pulpit in the Pine. Hall Lutheran church, also hold the election of a pastor in the person of Rev. Fleck.

W. P. Port, an old Civil war veteran, has been ill the past ten days. His daughter, Mary Smith, of Altoona, is aiding in his many wants and he is now improving.

Last Tuesday Miss Florence, eldest daughter of Mr. and Mrs. W. H. Weaver, the Branch, reached her fifteenth birthday and a large number of her girl friends gave her a surprise party.

George Behrer came over from Spruce Creek for a joy ride down the old pike. In the party were his wife, his mother. Mrs. John Isett and daughter. They took lunch in the Erb gap at the famous Gum spring.

You don't want to miss the chicken and waffle supper in the town hall on Thanksgiving evening. The affair will be in charge of the Citizen's band and we bespeak for them a good attendance of hungry folks.

Wednesday Mr. and Mrs. Frank Hettinger, of the Fort, moved to town taking quarters in part of Mrs. Anna Fry's home on east Main street, where the young couple will take their first lessons in housekeeping,

Last week John Charles moved his steam saw mill outfit to the Dr. Kidder tract near Walnut Grove, where he ex pects to cut one-half a million feet of oak lumber, so that John and his crew will manage to keep the wolf from the

The sharp drop in the mercury Monday night put a quietus on state road working. But supervisor Hurley is do-ing his level best to complete the stretch from Hon. J. W. Kepler farm to this place. Ferguson township has no kick coming. The state road is now completed through the entire length of the township, except the above mentioned

Owing to lack of room Washington Grange held its regular meeting in the Horticultural building at State College last Saturday evening. A large class was given the 4th degree. Past Master John Dale gave the committee work and Prof. Mairs managed the floor work to a finish. After several short talks a splendid feast was served. As the State Grange meets at State College in December the entertainment committee want to get busy to entertain the 1500 or more Patrons from all over the State.

The new mail route scheduled for this section went into effect on Monday. Mail carrier John Shoop now leaves State College at 9.30 o'clock, going west

to Charles Strouse's corner, thence south to Frank Millers, west on the Hall road to the Pine Grove cross roads, Hall road to the Pine Grove thence east to Cir-Frank Miller's, west on the White north to Oak Grove, thence east to Cir-cleville and on the back road to State College. Leaves State College at 12.15 going east to Centre Furnace thence south to the Branch and Boalsburg road, west to state road, north to Miller's corner, east to Lytle's corner, north to State College, making two and one-half miles added to the old route.

DIDN'T WANT THE PROMOTION

Corporal Had Good Reasons for Declining Elevation Which Most Soldiers Would Welcome.

Some soldier was Corporal A. Lincoln Brown, and he belonged to some regiment, too, for at the time we speak of he was in the Ninth cavalry.

Nobody remembers how it happened now, but there was some mix-up, and there was no money in the treasury for the disposal of the army, and for five solid months soldiers hadn't seen what a dollar bill looked like. The army paymasters were just laying around and waiting for something to happen.

Lieut. Col. John H. Gardner, now retired and recruiting officer for the San Francisco district, was a first lieutenant of the Ninth cavalry at that time. In common with all the officers of his command he was getting along financially during the period of nonpayment of troops by borrowing money each month from banks. Lieutenant Gardner was in command of a troop. In common with all the troop commanders he had to loan all his men money regularly so that they could buy tobacco, and pay for their laundry and all that sort of a thing, and one of Gardner's heaviest debtors in the troop was Corporal A. Lincoln Brown.

There was a vacancy in a sergeancy in Gardner's troop. The lieutenant studied over the list of men he had who were fitted to be sergeants and finally he chose Brown as the best of the lot. He had Brown called before

"Corporal," he said, "I'm going to give you that vacant sergeancy." Normally when a corporal in the army is told something like that at least a grin of appreciation can be counted on. Corporal Brown, however, looked frightened first and then gloomy. "Beggin' de troop comman-

ain't got nothin' against me, has you?' "Why, of course not," replied Lieutenant Gardner. "Why do you ask a fool question like that when I just told you I was going to have you promoted? Don't you want to be pro-

der's pardon, sah," he said, "but you

"Ah should say not, sah," said Corporal Jones vehemently. "Ah done owes you fo'ty dollars now, sah, when Ah is wearin' two stripes on mah sleeve an' Ah ain't got no show fo' to collect even a corporal's pay, sah. Ah ain't desirous of assumin' de responsibility of tryin' toe collect a sergeant's pay, sah. Ah done got all wo'k toe do Ah can perform now, sah."-San Francisco Chronicle.

Vocation Selection.

Vocation teaching, with a selection of students for different classes of work by so-called scientific methods, seems to be still in a very rudimental stage. Prof. Herman Schneider has had notably successful experience with the co-operative courses of the University of Cincinnati, but concludes that the plan of choosing the lifework for individuals by their phys ical peculiarities, is not reliable. It has been held that such characteristics as the shape of the fingers or of the head disclose special aptitudes or abilities. This is a development of the old phrenology, and might indicate that a certain money-making executive will have appropriately shaped head and hands, but successful executives chosen at random showed no such pe culiarities. The claim of some pro fessors of psychology that certain mental qualities-memory, attention, and so on-gave fitness for certain work has proved equally misleading The old method of testing ability by trying varied lines of work seems to be the only dependable one, and in the several years of a college course may serve as a very good guide.

At Work Despite War. The International Institute of Agriculture is one of the most remarkable examples extant of co-operative effort among the nations in humanitarian and scientific work. Since the present war began its activities have proceed. ed almost as in times of peace, though it is to be feared that the entrance of Italy into the conflict will prove a formidable handicap, as the institute has its headquarters in Rome. As if to emphasize its superiority to the present political situation, the institute has published a pamphlet, dated Rome, 1915, giving an interesting history and description of this great international enterprise, and making no allusion to

the war. Sulphur in New Zealand.

Sulphur deposits are found on White Island, in the Bay of Plenty on the coast of the North Island of New Zealand, about thirty miles from the mainland. This island, which covers about 600 acres, attains a height of 200 feet on one side and opens to the sea on the other. Its topography indicates an old crater, and the boiling lake on the island, which is one of the aweinspiring sights of New Zealand, is a further evidence of volcanism. After the New Zealand Sulphur company had spent \$100,000 in preparation for mining sulphur in this locality, a volcanic disturbance wrecked the camp and killed ten men.

MOST ADVANCED REGION OF THE MUSCOVITE EMPIRE.

Characteristics of the People Are in Strong Contrast to Those of the Central Districts-Are More Like the Westerners.

The South Russians, or the people of Little Russia, from among whom the colossal Muscovite empire draws some of its bravest, steadiest fighting men, are a people distinguished for their contradictory characteristics in a land that is a puzzle of contradictions. The South Russians, the toughest fiber of the Russian armies, are a people full of interest, of quaint philosophies, and of pleasant ways, according to a bulletin issued by the National Geographic society. The sketch reads:

"Between Central and South Russians the contrast is as strong as between the Prussian an dthe Bavarian. As in Germany, the vigor of the czar's mighty empire is more sharply expressed in the north than in the south, and yet, in the case of both empires, much of the national strength and energy are furnished by the south.

"Russian life is sprightly in the south. In the north, it is sullen, monotonous, oppressive. In the southland, too, there is a far greater display of well-being and comfort. The northern peasant lives in colorless villages, in grayish-brown thatched houses built of logs, which are stretched along unsanitary streets, redolent with the accumulations of carelessness. Around these houses there are almost never any signs that their occupants are making homes, there are no efforts toward improvements. The roads are mostly just ground left between two rows of houses; the yards are

just ground left bare around them. "The South Russian builds his home and orders his village, in the rule, picturesque and inviting. There are gardens before the door, and orchards round about, and the houses of the village are painted white or pale green. Porches, balconies, glass and vine-covered verandas relieve the architectural uniformity. There is more cleanliness, gayety, and softer manners in the south to tempt the friendly judgment of the stranger.

"The people of Central Russia confess that they are often more harsh and more neglectful of appearances than they of the south, but, also, they claim that the northern Russians are more faithful, consistent, sturdy and more tender than their brothers in Little Russia. North and south, east and west, all agree that in South Russia true laziness may be found in unsurpassed expression. It is said that the indolent South Russian will say to his wife: 'Little wife, say "woa" to my

herse; I have a pain in my tongue.' "Otherwise, the South Russian has come more like the Westerners. He dresses as the German, or the Enginterest in the world without than the nourished, better educated, and, possibly, a trifle less religious. He is also of purer Slavonic stock, less melancholy Finnish is in his blood, and his dialect is strongly marked.

"He runs more to ornament, more story-telling than does his northern compatriot. He is an unabashed and all-inquisitive questioner, asking the entire stranger whether the stone in his scarfpin is genuine or not, how much his neckwear cost, what his religion is, and other things somewhat one shoulder. personal and unexpected. But he is generally willing to be as free and frank himself, as he demands. Lazy, through the point of his belt buckle, the Little Russian is vigorous and successful; of elastic, friendly temperament, he is an unpeered fighter; argumentative at all times, about all things; he is clannish and a patriot, and a stay-at-home he is, yet burning with interest for all that goes on in the world."

Need of Reforestation in Japan. The forest area of Japan is decreasing at the rate of one million acres a year. This area is being cut away partly for timber and lumber and for firewood and partly to make the land available for the cultivation of rice.

The forests of Japan at the end of 1914 covered about 45 million acres. Extensive efforts are being made to increase the acreage of forest lands by planting surfaces now cleared off with young trees of quick growth. It has been urged that it is necessary to replant all surfaces as soon as they are cleared for commercial purposes in order to lessen the great loss annually caused by floods in the mountains .- Vice Consul Harold C. Huggins, Yokohama, Japan, in Commerce Reports.

Telephone in Latin America. According to statistics published by the Pan-American union, there were on January 1, 1914, 232,816 telephones in Latin America, as compared with 9,542,000 in the United States. Argentina stood first among the Latin-American countries, with 74,296, but Uruguay led in the proportion of telephones to population, with 1.95 per 100.—Scientific American.

> The establishment, which includes. besides the kennels of the cats a tenroom cottage and office for those in direct charge of the animals, covers more than an acre. The main kennel contains 20 pens for the cats, each of which is fitted up with every known device that will add to the comfort and health of its occupants. The partitions separating the pens are of fine woven wire on a highly-polished hardwood base, thus insuring plenty of light and air. At a convenient height in each pen are several shelves upon which the cats may climb. The pens also contain dainty individual sleeping baskets, and once a cat has been introduced to its own bed it never attempts to use that belonging to an-

Even pampered and beribboned Persian cats valued at a thousand dollars enjoy an occasional romp out of doors as much as the most plebeian.

New Ald for Cupid.

New York is full of lonesome girls who are just pining away because they have no male to tote them around. For this reason it has been proposed that an introduction bureau be estab lished where young people may meet, become acquainted and help increase the earnings of the marriage license bureau. But here's the proprietor of a beef-and emporium who advises all lonely girls to become waitresses, He says the brown-the-hash girls have stenographers beaten to a frazzle in the pastime of grabbing off a meal ticket. In fact, he says more wait. resses are marrying their bosses than those engaged in the gentle occupa tion of mauling a typewriter. "I don't know of an occupation where girls get married quicker," says the restaurant man. "I have had six girls in my employ marry in four months, and all married well. A waitress makes good tips and meets hundreds every week and men get a chance to study them more than in any other trade. A wait ress has a chance to study men and can pick her company intelligently."-New York Times.

Belt Buckle Saves Life.

John Irato of 150 St. Ann avenue, lishman, and he more often takes an The Bronx, while painting one of the bridges of the Harlem river branch peasant of the north. He is better of the New Haven railroad near Beechwood avenue, New Rochelle, came in contact with one of the electric wires charged with 11,000 volts that supplies power to the electric trains.

Flame was seen to spurt apparently to bright colors, to singing and to from his body to the steel upright near which he stood. He fell to the ground, got up and walked away. He was taken to the New Rochelle hospital against his will, where it was found that he was cut about the face and that there was a slight burn on

It was discovered that the electric current had passed out of his body which was open, without injuring him.

Medical.

SUFFERED FROM BACKACHE RHEUMATISM, DROPSY,

Dear Mr. Editor-I wish to tell you of a recent experience I had when suffering from backache, weak back, rheumatism, dropsy, and congestion of the kidneys. I tried a new medicine called "Anuric," which has recently been discovered by Dr. Pierce, of whose medicines and Surgical Institution in Buffalo, cines and Surgical Institution in Buffalo, N. Y., you have no doubt heard for years. This medicine acted upon me in a wonderful manner. I never have taken any medicine so helpful in such quick time. I do wish anyone in need of such a remedy would give it a trial.
(Signed) G. H. HERR.

NOTE: Folks in town and adjoining counties are delighted with the results they have obtained by using "ANURIC," newest discovery of Dr. Pierce, who is head of the INVALIDS' HOTEL and SURGICAL INSTITUTE, in Buffalo, N. Y. Those who started the day with a backache, stiff legs, arms and muscles, and an aching head (worn out before the day began because they were in and out of bed half a dozen times at night) are appreciating the perfect rest, comfort and new strength they obtained from Dr. Pierce's Anuric Tablets. To prove that this is a certain uric acid solvent and conquers headache, kidney and bladder diseases and rheumatism, if you've never used the "Anuric," cut this out and send ten cents to Doctor Pierce for a large sample package. This will prove to you that "Anuric" is thirty-seven times more active than lithia in eliminating uric acid-and the most perfect kidney and bladder corrector. If you are a sufferer, go to your best druggist and ask for a 50-cent box of "Anuric." You run no risk for Dr. Pierce's good name stands behind this wonderful new discovery as it has for the past half century for his "Golden Medical Discovery" which makes the blood pure, his "Favorite Prescription" for weak women and "Pleasant Polleta" for weak women and "Pleasant Pellets" for liver ills.
