Grandmother Mary Harper recently celebrated her eighty-fifth birthday anniversary in a very quiet way. This good old lady is a remarkable woman in many ways. She is well and hearty, lives alone and does her own housework with the briskness of a woman of sixty. In fact in the spring she dug and planted her own garden, looked after it during the summer and at haymaking time took a scythe and cut a half ton of hay which she later carried to the stable and pitched into the overhead mow.

The groom is a sober and industrious young farmer and is fortunate in securing the hand of Miss Jackson for a helpmate through life. They will go to housekeeping at Centre Furnace.

How the Body is Nourished.

The bodily process known as assimilation is well explained in these words: "As the blood, in its circulation, approaches any organ, the portions that are appropriate for this organ feel its attractive force, obey it, and leaving the others, mingle with the substance of its tissue and are changed into its own true and proper nature."

How important it is that the blood should be pure and rich, and loaded with no-time useless matter! Hood's Sarsaparilla purifies and enriches the blood, and does all it is possible for medicine to do in the way of perfecting assimilation and building up the whole system. When you have made up your mind to take Hood's Sarsaparilla, insist on having it—don't accept a substitute, for no substitute acts like it.

Reason for Industry.

"You have turned very industrious lately, Tim," said one Tiperary man to another. "That I have, bedad," replied the other. "I was up before the Magistrate last week for assaulting Cassidy, and the Magistrate said that if I came back on the same charge he would fine me \$10." "Did he?" said the first speaker. "And you're working hard so as to keep your hands off Cassidy?" "Don't believe it," said the industrious man, "I'm working hard to save up the 40 shillings."

Mr. Clayton Winters is the new rural mail carrier between Coburn and Rebersburg. He bought the route last week from Victor Walker, who with his family, will move to Pittsburgh.

The musical entertainment last Thursday evening at the home of Rev. Womeldorf was a great success. It was in charge of the Needlecraft club, which is an organization of the young ladies of Rebersburg. This music was in no way whatever connected with the United Evangelical church. The club selected that place because it offered better facilities for such an occasion. The inviting was done by the club members only. The occasion was mostly arranged by Miss Emma Moyer and Miss Helen Womeldorf. A large crowd was present both inside and outside the house. Only strictly classical music was rendered. The numbers were mostly rendered by young girls who showed excellent ability in interpreting music and in piano technique. Hon. Willis Reed Bierly, Prof. C. L. Gramley, Rev. Womeldorf and others spoke in favor of promoting only classical music in our valley and offered suggestions as to the ways in which this cause could be advanced. We hope we will have a number of such musicales given at regular intervals, and given free like the last one.

Your neighbors know the way—Have used Doan's Kidney Pills; Have proved their worth in many tests. Here's Bellefonte testimony. Wm. McClellan, 244 Lamb St., Bellefonte, says: "I suffered for a long time from pains and lameness across my back and some mornings I could hardly get out of bed. Cats and Infantile Paralysis.

'So much has been said in the newspapers in regard to the destruction of dogs and especially of cats, in connection with the infantile paralysis scare, that the following letter from W. K. Horton, general manager of the American Society for the Prevention of Cruelty to Animals, New York City, may be of interest to our readers: The American Society for the Prevention of Cruelty to Animals. New York, July 29, 1916. I am sorry to say that the figures of cats destroyed printed in the Boston "American" of July 26 are correct. Some one started the story that cats were carriers of disease. The sensational press was quick to take this up and make all it could out of it. The result was that there was a stampede on the part of owners to get rid of the animals, and this was especially true in Brooklyn. We did what we could to check this useless sacrifice, but to no effect. We have yet to find any competent authority for the charge that cats communicate disease of any kind. The present Commissioner of Health here told me that there was "nothing on the cat," as disease carriers. Dr. Wade Hamilton Frost of the United States Public Health Service, in charge of the physicians who are helping the local Board of Health in the fight against infantile paralysis, also exonerates the cat. Nevertheless, parents were panic stricken, and swarmed to our receiving stations and to the police stations to give up their animals. We were overwhelmed with requests to call for cats. We are glad to say that, by adding to our equipment, increasing our force, keeping our automobiles and men at work from early morning until midnight and later of each day, including Sundays, we were able to meet the demands; if we had not been, thousands of animals would have been abandoned and turned adrift to live miserable lives on the street and finally to perish of starvation and exposure. It is a fact, though a regrettable one, that in one day we have destroyed as many as 6700 cats, and since the first day of

A PENNSYLVANIA WOMAN TESTIFIES

Back Hurt—Nervous—Sleepless. Cherry Tree, Pa.—"Eight years ago when my little girl was born I came near dying. When I got able to get about, my back hurt so when I would bend over that I would have to take hold of something with my hands to get up. My husband got me two bottles of Dr. Pierce's Favorite Prescription, which I took and got along nicely. I could sit up, and my back did not hurt me. Was so nervous I could not sleep nights; my heart troubled me and my back had sharp stinging pains when I would lean my head forward. I wrote to Dr. Pierce and was advised to take 'Favorite Prescription.' I used several bottles and now I do all my own work and tend to my garden and flowers. May God bless you is my prayer."—Mrs. ELLIS W. STRIFFLER, Route 2, Box 85.

Dr. Pierce's Favorite Prescription speedsily causes all womanly troubles to disappear—compels the organs to properly perform their natural functions, corrects displacements, overcomes irregularities, removes pain and misery at certain times and brings back health and strength to nervous, irritable and exhausted women.

It is a wonderful prescription prepared only from Nature's roots with glycerine. Get it now! In tablet or liquid form.

If you are troubled with indigestion, Constipation, Biliousness, Bilious Headaches, and a hundred and one ills which depend upon an inactive liver—use Dr. Pierce's Pleasant Pellets.

July, nearly 90,000 unwanted cats have gone into the lethal chamber. This may seem like frightful slaughter, but of course it is the only merciful disposition that could be made of these unwanted animals.

W. K. HORTON, General Manager.

—Wisdom in farming today means that the man who tills the soil for a living must plan his career the same as any other business man would do. He must decide what crops can be most profitably produced on the land he occupies and then study how to grow these crops cheaply, and to market them so that he has received not only pay for his time and labor, but interest on the capital invested. It is hardly necessary to say that to do this permanency of location is very important. In the large majority of cases every move means an economic loss.

Hood's Sarsaparilla.

The Whole Body Needs Pure Blood

The bones, the muscles, and all the organs of the body depend for their strength and tone and healthy action on pure blood.

If the blood is very impure, the bones become diseased; the muscles become enfeebled, the step loses its elasticity, the skin loses its clearness, and pimples, blotches and other eruptions appear.

Hood's Sarsaparilla makes pure blood. It is positively unequalled in the treatment of scrofula and other humors, catarrh, rheumatism, dyspepsia, loss of appetite, that tired feeling. 61-35
