Anti-Fly Spray for British Armies.

London.—An anti-fly spray invention has been adopted by the War Office after 150 experiments.

Professor Lefroy, carrying out an anti-fly campaign for the Zoological Society, last year, excited much attention. He prepared a formula for the destruction of flies which practical experience has shown effective.

The solution ejected from a syringe creates an atmosphere fatal to insects in a few minutes.

The chemist demonstrated the effect of his fly spray at his laboratories. A number of flies were released in a small room. After two discharges of the spray they began to fall dead and soon the room was cleared.

The scent of the fluid is not disagreeable and it is not only harmless to animals, but is actively antiseptic. The solution does not damage drapery.

Usually the spraying process is sufficient if repeated three times daily.

The Zoological Society has approved the invention and the War Office, India Office and the Canadian Government have ordered supplies. A concentrated solution is sold at \$7.50 a gallon. A diluted gallon should keep the ordinary house free from flies for a month.—Philadelphia "Ledger."

Justified.

"Look here, Snip," said Slowpay indignantly to his tailor, "you haven't put any pockets in these trousers."

"No, Mr. Slowpay," said the tailor with a sigh; "I judged from your account here that you never had anything to put in them."—Harper's Weekly.

Eleven are Killed When Bridge Falls With Workmen.

Quebec, Sept. 11.—With the loss of 11 lives today, the second attempt to bridge the St. Lawrence river here resulted in a failure when the massive center span, weighing 5,100 tons, suddenly collapsed and fell into the river.

Of the 90 men caught on the span when it began to sway, all were rescued except the 11, and of these only four bodies have been found.

The span was being raised from pontoons and was about 15 feet above the water when from some unknown cause it collapsed and sank into the river, which is 200 feet deep at this place.

The St. Lawrence river was filled with many boats at the time of the accident, and on the hills along the shore where hundreds of persons who came by rail and automobile to see the culmination of the mighty engineering project.

The big steel frame was taken in tow to the gap which it was expected to fill. Shortly after 8 o'clock two pontoons reached the allotted place and were withdrawn by tugs, leaving the massive girder resting on hydraulic jacks. These had begun to raise the big span, while the crowds shouted, thinking that they had seen the most impressive ceremony of the bridge raising. The spectators began to leave, when suddenly there was a roar of breaking steel and the span dove into the water.

The 90 or more men who were on the span were thrown into the river and about 65 were rescued by pleasure craft.

At a late hour tonight 11 were listed as dead and missing.

Hood's Sarsaparilla.

The Whole Body Needs Pure Blood

The bones, the muscles, and all the organs of the body depend for their strength and tone and healthy action on pure blood.

If the blood is very impure, the bones become diseased; the muscles become enfeebled, the step loses its elasticity, the skin loses its clearness, and pimples, blotches and other eruptions appear.

Hood's Sarsaparilla makes pure blood. It is positively unequalled in the treatment of scrofula and other humors, catarrh, rheumatism, dyspepsia, loss of appetite, that tired feeling.
