Democratic Matchman.

Belletonte, Pa., January 19, 1917.

AMERICANS.

What is an American, We hear so much about? Is he just like other men. Or is he very stout Of heart and voice and limb, Of love and liberty And life and home and friends And to be always free?

The name has come to us From old and ancient Spain, Amuricus Vespucius Is in the wondrous chain: It does not matter then If we are light or dark, Just so we act like men, And always do our part

Nor does it matter where We first did see the light, Nor need we have a care Just so we stand and fight, For her, our righteous flag, Against whoever comes. Or tries to slur or nag Our people or our homes

Here you have a chance To live and grow and thrive And make a fair advance While with us here you live, If you will do your part And learn to love our way And stand with us in heart, We'll bid you always stay.

a hospital provides.

'Tis our delight to give A welcome broad and free To all who come to live And help our liberty.

If any do not care To longer stay with us We kindly say "prepare To leave without a fuss.' We did not ask for you, We will not beg you stay, We will make no ado When you have gone away

So there is where we stand And say to all so free This is a glorious land With institutions free. -Dr. Eli Gifford.

ADDITIONAL LOCAL NEWS.

Will of Hon. A. A. Stevens. The will of the late Adie Allen Stevens,

of Tyrone, was admitted to probate at Hollidaysburg on Saturday and, although out of the remaining, the topic of the remaining, the topic of the remaining of the r there is no statement of just what the Philadelphia, \$5,000 for maintaining and estate is worth, it is variously estimated support of a "free bed" for any member at one million dollars and upwards. The of the Tyrone First Methodist church who will was written almost three years ago and the executors named were his son, J. Howe Stevens, E. Frank Frain, who had charge of Mr. Stevens' property interests in Tyrone, and W. L. Pascoe, his law partner. Since the will was executed nia Conference of the Methodist church, the two first named have died, leaving \$5,000 to be held invested in the fund for Mr. Pascoe the only executor. A POSER FOR THE JUDGE.

The Way the Accused Put the Case Up to the Court.

Writing of Polish temperament and talent, Sidney Whitman in "Things I Remember" has an amusing story of a bright Polish Jew who traded in chemicals. He was brought before the law courts for selling poison without fulfilling the legal enactments bearing on such transactions.

The magistrate proceeded to read out the charge when the Jew suddenly interrupted him with the question: "Excuse me, Mr. President. Do you understand anything about chemicals?"

"Mr. S., the expert, is here in that capacity," replied the judge. "And you, Mr. S.," queried the Jew "do you understand anything about law?

"You have just heard from his worship that 1 am an expert in chemicals. If you want to know anything about law please address yourself to the judge." "I ask you, Mr. President, just to

consider the case for one moment. You are the judge of the court and admit that you do not understand anything about chemicals, and the expert tells us that he does not know anything about law. And I, a poor Jew, am expected to be familiar both with the law and with chemicals. Now, Mr. President, I ask you how you can possibly convict me?"

FINDING THE ALTITUDE.

How Airmen Measure the Heights t: Which They Ascend,

Altimeters or barographs are used by aviators to measure the heights to which they ascend. Both of these instruments are constructed on exactly Island Richly Dowered For Artist, Histhe same principle as the aneroid barometer. They depend upon air pressure. At sea level, where the air is the pressure is about fifteen pounds to the square inch, but at greater heights it becomes less. The barometer is govthe height above sea level.

The simplest is a bent tube of glass. shaped like a very long letter J and part is closed, and the space above the lower or hook end of the tube is open and subject to the pressure of the atmosphere. As the pressure becomes less on rising above the surface, the falls. The extent of the fall indicates the height.

Airplanes use one of these instruments mentioned, which are practically self registering barometers, and when the airplane comes down the instrument shows how high it has been carried.-Philadelphia Press.

Looking It Up.

ORIENTAL COURTESY.

An Ameer's Nice Choice of Words In Speaking of a Fall.

A good horseman may be thrown from his horse, under some circumstances, with little or no reflection upon his skill. The accident may have been excusable, even inevitable, when all the details are known; but as casually related the excuses frequently disappear, and the fall, with its ignominious suggestion of incompetency, alone remains. Lady St. Helier, in telling of the deep admiration and re- himself. gard entertained by the Ameer of Afghanistan for Lord Kitchener, gives a little anecdote of the oriental's instant perception and avoidance of the possibility of any humiliating implication

for his friend. Lord Kitchener had suffered a severe accident that resulted in a leg so badly broken as to necessitate several weeks' complete rest at the time, and later, two months' furlough in Eng-

land, and a resetting of the bone. One of Kitchener's staff gave the news of his misfortune to the ameer during a great tiger hunt at Gwalior.

"I told him," the officer wrote Lady St. Helier, "that the chief had a nasty fall at Poona, his horse tumbling down an embankment. He immediately asked for a piece of paper and wrote a telegram of sympathy in Persian. He handed it to Sir Henry McMahon and asked him to send it off immediately. Sir Henry wrote it down in English, but when he came to the words 'to bear of your fall from your horse,' the

ameer instantly corrected him, saying: "'No, no! Not from your horsewith your horse; in Afghanistan-big difference!" "

CAPRI, A TWIN HUMPED CAMEL

torian and Geologist.

Capri, a great twin humped camel of an island, kneels in the blue just off much compressed by its own weight, the Sorrentine peninsula. From the sway backed huddle of white, pink, blue, cream and drab houses along the large harbor up the breakneck road to erned by the pressure and so indicates the fascinating town nestling among the hills, white roofed and Moorish, There are many forms of barometers. and on, still higher, by the winding road or up the nearly perpendicular flights of rock stairs which furrow the partly filled with mercury. The upper frowning crag with their sharp, zigzag outlines to Anacapri, 500 feet or so column of mercury is a vacuum. The above, every step of the way breathes the pride and splendor and degradation of the island's greater days. Here a cyclopean mass of shattered

masonry in the warm emerald water mercury in the long part of the tube tells of a Roman emperor's bath, yonder on a chimney-like cliff the sinister ruins of a stout castle keep whispers of ancient garrisons and pirates not armed with automatic rifles or high powered artillery, and here, overlooking the sea, the vast ruins of a villa recall "that hairy old goat" Tiberius and his wastral voluptuousness that turned fair Capri into satyrdom.

Capri today is richly dowered for sightseer, artist, historian, antiquary and geologist. On every hand are shaded walks and sequestered bowers in the thick groves of orange and lemon, laurel and myrtle, wild backgrounds of tumbled rock, titanic rifts in the coast into which the sea has thrust long, insidious blue fingers .-- National Geographic Magazine.

HIS CHEERFUL RECEPTION. The Compliment Came After He Made

His Little Talk,

A Washington newspaper man was once a member of congress from an Ohio district. He is not an orator and rarely makes a speech. When he was running for congress he got word that he must come to a small town on the edge of his district to attend a meeting. A famous "spellbinder" had been secured, and the candidate was expected to be there, to shake hands and show

When he arrived at the village he was horror stricken to find that the speaker of the occasion had missed his train and would not be there.

"Come right up to the hall," said the chairman of the delegation that met him. "There's a big crowd there, and they are anxious to hear some talking." The candidate went in fear and trembling. He was introduced and talked for fifteen minutes. He started to sit down, but the chairman motioned him to continue. He went on for another quarter of an hour and by that time had told all he knew or ever expected to know that was of interest to his audience.

Then he dropped into his chair. The man who was presiding came cheerfully forward and said: "We have heard our candidate. Now, if there is any one present who can make a speech we shall be glad to hear him."-Youth's Companion.

TEETH MENDING IN CHILE.

Not an Easy Matter For Foreign Dentists to Practice There.

Not every foreigner who comes along with the claim of being a dentist can practice that profession in Chile. The government sees to it that any one who is to look after the health and preservation of the teeth of its people must first demonstrate his qualifications.

The law provides that before a license may be granted a foreigner to practice dentistry in the country the applicant must secure permission from the rector of the University of Chile to take the examination. His foreign diploma, duly certified and authenticated, must be attached to the permit, and a fee of 500 pesos (about \$75 in United States money) must be deposited for the license in the office of the secretary of the university. If the applicant passes the examination successfully the license is issued, and he is authorized to open his office for business.

Any applicant who holds a dental diploma from a school not known or recognized by the Chilean authorities is required to complete the third year's work of the dental department of the University of Chile and must also pass a satisfactory examination before he can obtain a license to practice .- Pan-American Bulletin.

Warning Before Command. In bringing up m that at night when they were tired

Goose Fat.

Goose fat makes excellent pastry that is absolutely free from any flavor of the bird or of the onion stuffing. The pastry turns out light and "short' when this sort of fat is used. A Belgian recipe is as follows: Throw all the fat left after drawing the goose into cold water with a little salt as soon rs the goose is drawn. When the bird is half done ladle off some of the dripping before it browns or becomes strong and as the roasting proceeds leave only enough dripping in the pan to baste with. Next day put the dripping, with

the fresh fat, in a stewpan, with slices of apple, and onion if approved. Add salt and pepper. When done clear it and strain it into a jar. Cover it and keep it in a cool place.

drop."

"Louder !"
