State College Graduates Pass Army Examination.

Five recent graduates of The Pennsylvania State College have been notified that they passed the Government examinations for officers in the regular army. They were commissioned second lieutenants. As members of the student regiment at State College, they received their en-

tire military training. The men appointed were Frederick C. Dose, 1914, of Brooklyn, N. Y., field artillery; Gordon J. F. Heron, 1915, Philadelphia, cavalry; Gerald R. Butz, 1914, State College, coast artillery; S. E. Wolfe, 1915, Lebanon, coast artillery, and W. R. Stewart, 1915, Beaver, coast artillery. Dose and Heron were assigned to the officers' school, at Leavenworth, Kansas, for their training. Butz, Wolfe and Stewart have reported for instruction at Fortress Monroe, Virginia.

Prayer meeting and Bible study will be held in St. John's Reformed church Thursday evening of each week, instead of Wednesday evening.

To Organize a Farm Bureau. A meeting will be held in the court house, Bellefonte, at ten o'clock on Thursday morning, February 1st, for the purpose of organizing a farm bu-

reau for Centre county. As evidence of the advantages to be derived from a well conducted farm bureau we submit the following:

"The work of the county agricultural extension representatives varies possible, through demonstrations.

The county extension work in Penn-

Up in Bradford, which is primarily No other cow in the herd made as

cows with yearly records. Eight of these did not produce enough to pay their feed costs. Had the owner kept only his eight best cows he would have made a profit of \$55.00 more best producing cow in the association showed a profit over two and onehalf times greater than the total profit made by this whole herd of 16 cows. It was such conditions as this which existed in Bradford county before the advent of the farm bureau leader.

A dairyman in one of the Bradford county associations gave the following facts several years ago to prove the immediate value which he obtained as a result of having his cows tested. Before testing he sold heifer calves for \$20.00 each and bull calves for \$5.00 each. As soon as he had his testing association records he sold two heifers for \$50.00 each and three bull calves for \$15.00 each, making the total increased receipts due to

the fact that he had records, \$90.00.

The testing represented a cash outlay

of \$15.00 for the year. In other words

for every dollar he invested he re-

ceived \$6.00 in return. It is the ability on the part of the extension representative to discover and apply a remedy to bad practices and to increase agricultural makes his work worth many times the comparatively small salary necessary to command his services.
