New Fish Law Passed by Legislature.

Harrisburg, June 20.—The fish code regulating the catching of fish in inland waters of Pennsylvania, was sent to the Governor on Tuesday after Senate amendments had been concurred in by the House. The code repeals and replaces virtually all the existing acts accepting the laws prohibiting fishing by aliens and the pollution act of 1876.

The bill fixes the open seasons and size and creel limits for game fish as follows, taking effect January 1, next:

Trout (except lake trout), open season April 15-July 21, size limit 6 inches, creel limit 25.

Bass (large and small mouth), open season July 1-December 31, size limit 9 inches, creel limit 12.

Rock (white, calice, and strawberry), open season July 1-December 31, size limit 6 inches, creel limit 25.

Lake or salmon trout, open season July 1-September 30, size limit, no limit; creel limit, no limit.

Pike, perch, walleyed pike or Susquehanna salmon, open season July 1-December 31; size limit, 12 inches; creel limit 25.

Pickeral, open season July 1-December 31; size limit 12 inches; creel limit 25.

Muscullonge, open season, July 1-December 31; size limit 24 inches; creel limit 4.

Yellow perch, open season July 1-December 31; size limit 6 inches; creel limit 50.

Sunfish, open season, no closed season; size limit, no limit; creel limit 50.

Sunday fishing is prohibited. The use of seines, spears, gigs or outlines, or lines bearing more than three hooks are forbidden. A small dip net or minnow seine net over four feet in diameter may be used for the taking of bait fish only. A minnow trap with an opening net over one inch in diameter is also permitted for taking bait fish.

The use of seines and dip nets is permitted in the Susquehanna below McCall's Ferry dam under license for taking shad, herring and alewife suckers, catfish, eels and carp only from March 1 to June 20.

The pollution section of the bill forbids the use of explosives or electricity or poison in taking fish, or otherwise to pollute streams.

The purchase or sale of any species of trout except lake trout or of any large mouth or small mouth bass is forbidden unless artificially propagated and sold under state license.

John Smith and Pocahontas.

About a mile below Richmond, in what is now the brickyard region, there used to stand the residence of the Mayo family, a place known as Powhatan. This place has long been pointed out as the scene of the saving of Smith by the Indian girl, but late research has proved that, though Smith did come up the James to the present site of Richmond, his capture by the Indians did not occur here, but in the vicinity of Jamestown.

The Indians took him first to one of their villages on York river, near the present site of West Point, Va., and thence to a place on the same stream in the county of Gloucester, where the Powhatan, or tribal chief, resided. Here, on the west side of the river, some nine miles from Williamsburg, the scene of Smith's rescue by Pocahontas has been located.—Julian Street in Collier's.

"Overhang" Houses.

By the year 1670 wooden chimneys and log houses of the Plymouth and Bay colonies were replaced by more stately houses of two stories, which were frequently built with the second story jutting out a foot or two over the first story still further extending over the second story. This "overhang" is popularly supposed to have been built for the purpose of affording a convenient shooting place from which to repel the Indians. This is, however, a historic fable. The overhanging second story was a common form of building in England in the time of Queen Elizabeth, and the Massachusetts and Rhode Island settlers simply and naturally copied their old homes.

Wild Ducks.

Canvasback and redhead ducks, which are very quick of movement, after deep diving are capable of taking flight immediately upon coming to the surface of the water. They do not spring directly upward into the air, but fly at first at an angle until they reach the desired elevation. Surface feeding wild fowl, like the black duck, pintail and teal, fly directly upward from the surface of the water if the emergency demands it.
