Sun Never Sets in U.S.

Great Britain is no longer the only nation that can say that the sun never sets on its territory. Since the United States acquired the Danish West Indies, it can make the same boast,

says the Youth's Companion.

Hitherto the little island of Culebra, which is virtually a part of Porto Rico, has been our most easterly point of land, and the island of Balabac, in the bilippines, our most westerly the Philippines, our most westerly point. The distance between them is just a little less than 180 degrees, or half the circumference of the earth.

Stord, he circumference of the earth. St. Croix, in the Danish West Indies, is 38 miles farther east than Culebra —enough to bridge the gap. Just as the sun is rising on St. Croix it is set—mended. Foster-Milburn Co., Mfrs., ing on Balabac.

World Short of Food.

Washington, D. C .- Two more years of war will reduce the entire world to the same shortage of food as now exists in Germany, according to scientists in that country who have compiled statistics to support their statement. According to this statement, the German government is urging its people to continue the war two years more, declaring that if it is done Germany cannot be defeated, because the countries at war with her will not endure the hardships which the Germans are willing to un-
