Friday, 7:30 p. m., Litany and instruction. Visitors welcome. Rev. M. DeP. Maynard, Rector.

Miss Bessie Shirey, of Woodland, Pa., will speak in the United Brethren church, Wednesday evening, October

Not Easy to Make Good Escape from Penitentiary.

Dash Jury, a Blair county citizen who is a familiar figure in the criminal courts and who last July completed a term of imprisonment at the Rockview penitentiary, was sent back for another year last Wednesday by Judge Baldridge, at Hollidaysburg. After being sentenced Dash gave a statement to an Altoona Mirror reporter on how hard it is for convicts to make good their escape from the penitentiary, as follows:

By way of introduction Dash explained that the convicts at the prison on the big farm in Centre county are not very closely guarded. Referring to his own experiences at the prison during his first term which lasted a

year Jury declared: "I've often been two miles from the prison with nobody with me. It ain't no use trying to escape. They'll get you again. You get out on them mountains and you can't get off them. The mountains take a turn. I've known fellows that got out when I was there that would wander through the mountains for a week and then fetch up right above the prison. The guards would get 'em."

Jury went on to explain that the prison authorities are assisted by dwellers in the mountains who know every path and who spot an escaped prisoner on sight. These communicate with the warden as soon as a suspicious character is seen and guards are hot foot on the trail of the wanderer. According to the observation of the man, who has broken into jail so many times that he can't keep track of them all, a prisoner at Rockview, who knows when he is well off, will stay his term out. Dash has a holy horror of the mountains that girt the beautiful valley in which the prison and its huge grounds are located.

Dash had a good word to say of the prison farm and general conditions there. He told about the splendid equipment of the farm and particularly of the barns and stables. He had helped care for the live stock during his year there and had enjoyed the experience, but he manifested great repugnance to going back to do another

During his year at Rockview Jury learned to do all kinds of farm work and explained that he felt himself qualified to serve as a farm hand. Dash's worst enemy is John Barley-

Training Airplane Experts at Penna. State College.

Training students as inspectors of airplane material is the latest wartime addition to the curriculum of Professor George R. Green has started a class of twenty young men in wood technology. They will study the structure, strength and durability of spruce and ash, which are the chief woods used in airplane construction. Government officials have told Professor Green there is a great need of competent inspectors to be stationed at the various airplane plants able affair. throughout the country. Later the course will include a study of timbers used in ship building, and Penn State supplying inspectors in their yards.

—Last Friday night funeral di-rector Frank E. Naginey was notified Mrs. Agnes Meyer, of Williamsport, of a death at the Bellefonte hospital and George Meyer, of McElhattan, and told that he was to take charge of the remains. Forthwith he went to the remains. Forthwith he went to that institution and was told that he would find the body in a certain room. Mr. Naginey in some way got into the wrong room and in the dim light saw a form lying upon the bed which he naturally took for the corpse. Pulling down the covers he took hold of the legs to straighten out the supposed corpse when there was a kick and the owner of the legs said: "What's the matter with you? I'm not the corpse, that's in the next room." Mr. Naginey was very much astounded, of course, at having made such a mistake, but at that managed to identify the man he had mistaken for a corpse to be one the hospital could least afford to lose, the genial James F.

Krape. ---On Wednesday afternoon a big seven ton truck went over the bank on the Red Hill, on the road to Snow Shoe, and overturning caught one of the men by the shoulder, pinning him to the ground until passersby helped to release him. The truck was from Williamsport and with two men in it was on the way to Snow Shoe for a load of coal. Going up the hill the driver of the car stalled the engine and the car ran backwards and over the bank, rolling down a distance of twenty-five feet. The names of the men in the car could not be learned.

-James H. Herron, chief engineer of the new western penitentiary, is moving his family to Bellefonte this week. They have taken the Shoemaker house at the corner of Curtin and Allegheny streets.

Senator Vare Implicated in Philadel-

phia Murder Mystery. Philadelphia, October 2.—State Senator Edwin H. Vare was today named as the man higher up who was to furnish the money to bring gunmen from New York for election work in the Fifth ward here on primary day, Sepwould be forthcoming from Isaac Deutsch, the man who is alleged to

have engaged the gangsters.

The Vare brothers, who have made millions in city contracts, were brought into the case through sensational testimony by Samuel G. Maloney at a hearing given to Mayor Thomas B. Smith and eight others charged with conspiracy to murder and other crimes in connection with the Fifth ward killing. Altogether, seventeen men are under arrest here and in New York in connection with the murder and the political feud.

Maloney, a former Republican factional leader in the Fifth ward and now head of the local branch of the Val O'Farrell detective agency, was

the star witness at the hearing.

Tonight Senator Vare, who with his brother, the Congressman, are the leaders of the faction opposed to that headed by the United States Senator Boies Penrose and State Senator James P. McNichol, in this city, gave out a statement in which he said that everything Maloney swore to so far as it concerned the Vares was an "absolute lie" and is only part of the general frame-up he warned the people of Philadelphia about in a public state-

ment two days ago.

Prior to Maloney's recital of alleged conditions in the Fifth ward, Isadore Stern, a member of the Legislature from that ward, told how he had warned Mayor Smith the night before the primary on the long distance tel-ephone of possible bloodshed, and how he had engaged a special train to bring the Mayor from Atlantic City for the purpose of bringing about or-der and how the Mayor replied that Stern could not "pull any sucker stuff like that over on me."

TEACHING SOLDIERS TO SING

Soldiers at Fort Shafter Learn Words and Airs of America's War Songs From Movie Screen.

There is one officer on Oahu, says the Sunday Advertiser of Honolulu, according to the Army and Navy Journal, who is a firm believer in the value of song as a military asset to the soldier. Col. James A. Irons, commanding the Second United States infantry, believes so thoroughly in the importance of havtember 19, when a policeman was killed. Congressman William S. Vare, the Senator's brother, was named as giving assurance that the money the men of his regiment just what the war songs of America are.

The method which Colonel Irons has started at Fort Shafter is one which should be used throughout the army. It consists of having national and patriotic airs played by the orchestra at the evening performances at the airdrome-Fort Shafter's moving picture theater-while the words are thrown upon the screen where the men can read them. In this way the soldiers become acquainted with the words of the songs, and what is equally important, they become accustomed to singing together. The soldiers are enthusiastic over the new plan and the singnot impossible that, sometime within the service of the men who are now serving the second infantry, that regiment may be called on to march from Bordeaux to Berlin, and that the march will be made easier and the spirit of the men at the end of the hike will be the men at the end of the hike will be crop the heat acts on the overlying far better if it is made to the tune of rocks, but finally combustion dies out them-sung by every man in the regi-

Cards have been issued from the regimental press printing the words of "Annie Laurie" and the "Star Spangled Banner," and the list of 90 battles, engagements and skirmishes in which the Second infantry took part. The first was in November, 1791, at Mau-

### BIRDS AID IN WAGING WAR

Their Work in Increasing Crop Yields by Destroying Insect Pests Declared Highly Important.

Food is needed for our armies. Birds help the farmers produce that food by destroying insect pests, Therefore, birds may be considered as one of the Mr. and Mrs. Fearon Russell went allies. In the Farm and Fireside one reads:

> "Birds are almost as busy as bees, and their work in increasing crop yields is highly important. One of the cheapest and most effective ways to fight insect pests that annually take crop toll estimated at \$800,000,000 is to aid in the preservation of bird life. Few people realize how many insects are destroyed by birds. A teaspoonful of chinch bugs has been taken from the crop of one quail, and an adult bird has been known to eat 5,000 plant lice in two hours. Such worms and bugs as infest our gardens are favorite food for bluebirds, robins and many other kinds of birds.

"It is true that some insect pests to the great war, though, prices for many materials commonly used in sprays, washes and poison mashes are

work at before the war wages. "Birds also eat thousands of weed seeds. A single quail, when killed, was found to contain 10,000 pigweed seeds. With labor scarce and high, whatever will aid the farmer in his crop against weeds is worth while."

Bags From Banana Trees. Machinery has been taken to Honolulu from the state of Washington by four men who are making an investigation of the use of the fiber of the banana trunk for bag making. The investigation was brought about by announcements that the sugar planters of the Hawaiian islands, as well as those of other sugar-producing countries, are faced with uncertainty concerning steady shipments from Calcutta of bags to be used as containers for raw sugar. Ever since bags have been used by the Hawaiian sugar planters in exporting the raw product from the islands to the mainland of the United States, the Hindu bags, which are made to contain 125 pounds each, have proved to be satisfactory. War conditions have caused the planters to cast about for a substitute.

Old Laws, Modern Conditions. New England, with its recollections of ancient "blue laws," should be interested in the report that war-time England has seen fit to revive a statute of Charles I.'s time prohibiting the transaction of business on the Sabbath, says the Springfield (Mass.) Republican. As there is a shortage of labor, with the consequence that shop people are overworked, the need of providing a day of rest is acute, and numerous shopkeepers have been arrested for doing business on Sunday. The English authorities are very ingenious in digging up ancient statutes to fit some 62-39

breeding place for the big Rangeley

Vanishing Coal Beds.

Many coal beds in the great coal fields of the Western States have at one time or another taken fire and burned for long periods, baking and reddening the overlying strata so that they have become a kind of natural brick or terra cotta. The fires were hot enough in places to fuse and recrystalize the overlying shale and sandstone so as to form natural slag. At some places the slag resembles true igneous rock; at others it consists

largely of rare minerals. Thoroughly fused slag seems to occur chiefly in crevices or chimneys through which the hot gases generated by the burning coal escaped to the surface. The chimney-shaped masses of slag are harder than the surrounding baked rock and, after that has weathered away, form the curious pinnacles that surmount many clinker

bluffs or buttes in the West. Some of the coal beds, especially those on the higher hills, were perhaps ignited by lightning; others were probably started by prairie fires or camp fires; but since burning at the surface has been so common as to affect most of the coal beds in an area of more than two hundred thousand square miles, much of it has probably been due to spontaneous combustion. Coal beds are now burning at or near the surface in many places in the West. The fire is disclosed by the smoke and the fumes that rise from ing is worth going far to hear. It is it, and by the heat at the surface of the earth near the outcrop or above the bed-heat so intense that it kills

all vegetation.
As the coal burns out, the overlying rock or earth generally caves in, so as to form large fissures in the ground. As the fire works back from the out-"Annie Laurie"-the regimental an- for lack of oxygen. It is hard to say how far from the surface the fires may extend. Field studies of the United States Geological Survey indicate that a bed lying beneath twenty feet or less of cover may burn out completely under large areas, and even where the cover is several hundred feet thick the burning may extend five hundred feet back from the outcrop.-Youth's Companion

#### S. Simons Goes A-Lunching.

Simon Simons, honorary president of the Economical Sports association, looked at the clock again, drew in his belt still another notch, and decided he really must go to lunch.

"I'm really quite hungry," he thought. "I believe I'll try a sort of progressive luncheon—it will be quite a lark. Let's see, I'll start at Oopenheimer's-their 10-cent bowl of ivy soup is the biggest in town." And he walked five blocks to Oopenheimer's, drank the soup and set out for Swishendish's, eight blocks away, where, he knew, the 5-cent sandwiches were quite as big and as crowded as the usual 10 centers.

After lingering over a Siamese cheese sandwich, he walked to Bickel and Watson streets, to Pogenwoog's, where he got an ice-cream cone for 3 cents, and by that time he was so hungry from all the exercise that, in desperation, he strode into a restaurant where a placard read: "Full course dinner, 85 cents."

When he got back to the office, two hours later, he found that Twickenham B. Woos had dropped in to buy \$2,000 worth of stock in the B. V. D. sandpaper mine, and dropped out again .-Indianapolis Star.

Conserving Wheat Flour.

A prominent New York hotel has recently added to its, menu a bread containing rye flour and whole wheat flour in addition to white flour. Another method of saving wheat flour which is being well received, is to use one part of cottonseed meal to four, five or six parts of wheat flour. A United States senator not long ago served bread made from these ingredients to several of his colleagues in Washington, and they seemed much pleased with it. Government chemists have demonstrated that flour can also be made from peanuts, dried peas, sweet potatoes, etc., and that such flour can be mixed with wheat flour to make excellent bread.—Popular Mechanics Mag-

\$90 Coal. Probably a record price for coal was recently paid by the captain of an American cargo steamship returning from Genoa to New York after delivering a war cargo at the Italian port. At Genoa the Yankee skipper was compelled to pay \$90 a ton for coal enough to carry him to Fayal, in the Azores.

At the island port he was able to purchase coal at the comparatively reasonable rate of \$30 a ton, and got 500 tons, enough to bring him to New York. The extremely high price of coal nowdays is somewhat of an offset to the big profits to be made in war freights.
