

SYNUPSIS.

CHAPTER I—Fired by the news of the sinking of the Lusitania by a German submarine, Arthur Guy Empey, an Ameri-can, leaves his office in Jersey City and goes to England where he enlists in the British army.

CHAPTER II—After a period of train-ing, Empey volunteers for immediate serv-ice and soon finds himself in rest billets "somewhere in France," where he first makes the acquaintance of the ever-pres-ent "cooties."

CHAPTER III-Empey attends his first church services at the front while a Ger-man Fokker circles over the congregation. CHAPTER IV-Empey's command goes into the front-line trenches and is under fire for the first time.

CHAPTER V-Empey learns to adopt the motto of the Brtish Tommy, "If you are going to get it, you'll get it, so never

CHAPTER VI-Back in rest billets, Em-pey gets his first experience as a mess pey get orderly.

CHAPTER VII-Empey learns how the British soldiers are fed. CHAPTER VIII-Back in the front-line trench, Empey sees his first friend of the trenches "go West."

When the body was lowered into the grave the flag having been removed,

we clicked our heels together and came to the salute.

I left before the grave was filled in. I could not bear to see the dirt thrown in on the blanket-covered face of my comrade. On the western front there are no coffins, and you are lucky to get a blanket to protect you from the wet and the worms. Several of the section stayed and decorated the grave with white stones.

That night, in the light of a lonely candle in the machine gunner's dugout of the front-line trench I wrote two letters. One to Pete's mother, the

each nail hung a miscellaneous assortment of equipment. The lighting arrangements were superb-one candle in a reflector made from an ammunition tin. My teeth were chattering from the cold, and the drip from the airshaft did not help matters much. While I was sitting bemoaning my fate and wishing for the fireside at home, the fellow next to me, who was writing a letter, looked up and innocently asked, "Say, Yank, how do you

spell 'conflagration'?" I looked at him in contempt and answered that I did not know.

From the darkness in one of the corners came a thin, piping voice singing one of the popular trench ditties entitled:

"Pack up your Troubles in your Old Kit Bag, and Smile, Smile, Smile." Every now and then the singer would stop to cough, cough, cough, but it was a good illustration of Tommy's cheerfulness under such conditions.

A machine-gun officer entered the dugout and gave me a hard look. I sneaked past him, sliding and slipping, and reached my section of the frontline trench, where I was greeted by in two days' time he would arrive at the sergeant, who asked me, "Where - 'ave you been?"

I made no answer, but sat on the muddy fire step, shivering with the cold and with the rain beating in my face. About half an hour later I teamed up with another fellow and went on guard with my head sticking he'll miss me when I leave," he stuck over the top. At ten o'clock I was his rifle over the top and fired two shots relieved and resumed my sitting position on the fire step. The rain suddenly stopped and we all breathed a sigh of relief. We prayed for the morn-

handle sticking into the small of your back, with a tin hat for a pillow and feeling very damp and cold, with "cooties" boring for oil in your armpits, the air foul from the stench of grimy human bodies and smoke from a juicy pipe being whiffed into your nostrils, then you will not wonder why

the trench for a rest. While in a front-line trench orders forbid Tommy from removing his little squares of cardboard from the boots, puttees, clothing or equipment. bag between his feet. The "cooties" take advantage of this order and mobilize their forces, and Tommy swears vengeance on them and mutters to himself, "Just wait until I hit rest billets and am able to get my own back."

Just try to sleep with a belt full of

ammunition around you, your rifle bolt

biting into your ribs, intrenching tool

Tommy occasionally takes a turn in

Just before daylight the men "turn to" and tumble out of the dugouts, man the fire step until it gets light, or the welcome order "stand down" is given. Sometimes before "stand down" is ordered, the command "five rounds rapid" is passed along the trench. This means that each man must rest his rifle on the top and fire as rapidly as possible five shots aimed toward the German trenches, and then duck (with the emphasis on the "duck"). There is a great rivalry between the opposing forces to get their rapid fire all off first, because the early bird, in this instance, catches the worm-sort of gets the jump on the other fellow, catching him unawares.

We had a sergeant in our battalion named Warren. He was on duty with his platoon in the fire trench one afternoon when orders came up from the rear that he had been granted seven days' leave for Blighty, and would be relieved at five o'clock to proceed to England.

He was tickled to death at these welcome tidings and regaled his more or less envious mates beside him on the fire step with the good times in store for him. He figured it out that Waterloo station, London, and thenseven days' bliss!

At about five minutes to five he started to fidget with his rifle, and then suddenly springing up on the fire step with a muttered, "I'll send over a couple of souvenirs to Fritz so that when "crack" went a bullet and he

could hear a sighing moan. Our big boys behind the line had opened up

good for rheumatism?" Then you have something else to call us "sissies" for doing so. It was a think of. Will you come out of this war crippled and tied into knots with move to the twelve, then a dead sirheumatism, caused by the wet and mud of trenches and dugouts? You to see what had happened, but not for give it up as a bad job and generally saunter over to the nearest estaminet along the trench, and with a cheer the to drown your moody forebodings in a glass of sickening French beer or to bullets were cracking overhead, and try your luck at the always present occasionally a machine gun would rip game of "house." You can hear the and tear the top of the sandbag parasing-song voice of a Tommy droning pet. How I got up that ladder I will

by a Tommy interrupting with, "What's

CHAPTER XI.

Over the Top. On my second trip to the treaches our officer was making his rounds of inspection, and we received the cheer-

ful news that at four in the morning we were to go over the top and take you. the German front-line trench. My heart turned to lead. Then the officer carried on with his instructions. To the best of my memory I recall them as follows: "At eleven a wiring party will go out in front and cut lanes through our barbed wire for the passage of troops in the morning. At two o'clock our artillery will open up with an intense bombardment, which will last until four. Upon the lifting of the barrage the first of the three waves will go over." Then he left. Some of the Tommies, first getting permission from the sergeant, went into the machine gunners' dugout and wrote letters home, saying that in the morning they were going over the top, and also that if the letters reached their destination it would mean that the writer had been

killed. These letters were turned oven to the captain with instructions to mail same in the event of the writer's being killed. Some of the men made out their wills in their pay books, under

the caption, "Will and Last Testament." Then the nerve-racking wait commenced. Every now and then I would glance at the dial of my wrist watch and was surprised to see how fast the minutes passed by. About five minutes to two I got nervous waiting for our guns to open up. I could not take my eyes from my watch. I crouched against the parapet and strained my muscles in a deathlike grip upon my rifle. As the hands on my watch showed two o'clock a blinding red flare lighted up the sky in our rear, then thunder, intermixed with a sharp, whistling sound in the air over our heads. The shells from our guns were speeding on their way toward the German lines. With one accord the men sprang up on the fire step and looked over the top in the direction of the German trenches. A line of bursting shells lighted up No Man's Land. The din was terrific and the ground trembled. Then, high above our heads we

I glanced again at my wrist watch. wooden cross at their heads. We were We all wore them and you could hardly

minute to four. I could see the hand lence. It hurt. Everyone looked up long. Sharp whistle blasts rang out men scrambled up the ladders. The out the numbers as he extracts the never know. The first ten feet out in front was agony. Then we passed through lanes in our barbed wire. I knew I was running, but could feel no motion below the waist. Patches on the ground seemed to float to the rear as if I were on a treadmill and scenery was rushing past me. The Germans had put a barrage of shrapnel across No Man's Land, and you could hear the pieces slap the ground about After I had passed our barbed wire

and gotten into No Man's Land a Tommy about fifteen feet to my right front turned around and looking in my direction, put his hand to his mouth and yelled something which I could not make out on account of the noise from in rest billets. The next day our capthe air about me. These were caused by passing rifle bullets. Frequently, to my right and left, little spurts of dirt would rise into the air and a ricochet bullet would whine on its way. If a Tommy should see one of these little spurts in front of him, he would tell the nurse about it later. The crossing of No Man's Land remains a blank to me.

Men on my right and left would get up, while others remained huddled barbed wire came into view and seemed carried on a tide to the rear. Suddenly, in front of me loomed a bashed-in trench about four feet wide. Queer-looking forms like mud turtles were scambling up its wall. One of these forms seemed to slip and then rolled to the bottom of the trench. I leaped across this intervening space. The man to my left seemed to pause in midair, then pitched head down into the German trench. I laughed out loud in my delirium. Upon alighting on the other side of the trench I came to with a sudden jolt. Right in front of me loomed a giant form with a rifle which looked about ten feet long, on the end of which seemed seven bayonets. These flashed in the air in front of me. Then through my mind flashed the admonition of our bayonet instructor back in Blighty. He had said, "whenever you get in a charge and run your bayonet up to the hilt into:a German the Fritz will fall. Perhaps your rifle will be wrenched from your grasp. Do not waste time, if the bayonet is fouled in his equipment, by putting your foot and 9.2's and 15-inch shells commenced on his stomach and tugging at the rifle dropping into the German lines. The to extricate the bayonet. Simply ash of the guns behind the lines, the press the trigger and the bullet will

I had joined the Suicide club, of me. I could hear sharp cracks in and my troubles coramenced. Thirtytwo men of the battalion, including myself. were sent to L---, where we

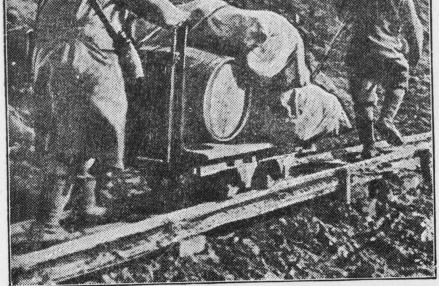

went through a course in bombing. Here we were instructed in the uses, methods of throwing and manufacture of various kinds of hand grenades, from the old "jam tin," now obsolete, to the present Mills bomb, the standard of the British army.

It all depends where you are as to what you are called. In France they stumble and fall. Some would try to call you a "bomber" and give you medals, while in neutral countries they and motionless. Then smashed-up call you an anarchist and give you "life."

From the very start the Germans were well equipped with effective bombs and trained bomb throwers, but the English army was as little prepared in this important department of fighting as in many others. At bombing school an old sergeant of the Grenadier guards, whom I had the good fortune to meet, told me of the discouragements this branch of the service suffered before they could meet the Germans on an equal footing. (Pacifists and small army people in the U. S. please read with care.) The first English expeditionary forces had no bombs at all, but had clicked a lot of casualties from those thrown by the Boches. One bright morning someone higher up had an idea and issued an order detailing two men from each platoon to go to bombing school to learn the duties of a bomber and how to manufacture bombs. Noncommissioned officers were generally selected for this course. After about two weeks at school they returned to their units in rest billets or in the fire trench, as the case might be, and got busy teaching their platoons how to

make "jam tins."

this I cursed the Prussian war god with all my heart, and I think that St. Peter noted same.

The machine gunners in the dugout were laughing and joking. To them Pete was unknown. Pretty soon, in the warmth of their merriment, my blues disappeared. One soon forgets on the western front.

CHAPTER IX.

Suicide Annex.

I was in my first dugout and looked around curiously. Over the door of same was a little sign reading "Suicide Annex." One of the boys told me that this particular front trench was called "Suicide Ditch." Later on I learned that machine gunners and bombers are known as the "Suicide Club."

tumbled off the step, fell into the mud at the bottom of the trench, and lay still in a huddled heap with a bullet hole in his forehead.

At about the time he expected to arrive at Waterloo station he was laid to rest in a little cemetery behind the lines. He had gone to Blighty.

In the trenches one can never tellis not safe to plan very far ahead. I was fast learning that there is a After "stand down" the men sit on regular routine about the work of the the fire step or repair to their respectrenches, although it is badly upset at

Between 11:30 and noon he is dismissed, has his dinner and is "on his own" for the remainder of the day, unless he has clicked for a digging or working party, and so it goes on from day to day, always "looping the loop" and looking forward to peace and Blighty.

Sometimes, while engaged in a "cootie" hunt, you think. Strange to say, but it is a fact, while Tommy is searching his shirt serious thoughts come to him. Many a time, when performing this operation, I have tried to figure out the outcome of the war, and what will happen to me.

scream of the shells through the air, and the flare of them, bursting, was a spectacle that put Pain's greatest display into the shade. The constant pup, pup, of German machine guns and an occasional rattle of rifle firing gave me the impression of a huge audience applauding the work of the batteries. Our 18-pounders were destroying the German barbed wire, while the heavier stuff was demolishing their trenches and bashing in dugouts or funk holes. Then Fritz got busy.

Their shells went screaming overhead, aimed in the direction of the flares from our batteries. Trench mortars started dropping "Minnies" in our front line. We clicked several casualties. Then they suddenly ceased. Our artillery had taped or silenced them.

During the bombardment you could almost read a newspaper in our trench. Sometimes in the flare of a shell-burst a man's body would be silhouetted against the parados of the trench and it appeared like a huge monster. You could hardly hear yourself think. When an order was to be passed down the trench you had to yell it, using your hands as a funnel into the ear of the man sitting next to you on the fire step. In about twenty minutes a generous rum issue was doled out. After drinking the rum, which tasted like varnish and sent a shudder through your frame, you wondered why they made you wait until the lifting of the barrage before going over. At ten minutes to four word was passed down, "Ten minutes to go!" Ten minutes to live! We were shivering all over. My legs felt as if they were asleep. Then word was passed down: "First

wave get on and near the scaling ladders.' These were small wooden ladders which we had placed against the parapet to enable us to go over the top on the lifting of the barrage. "Ladders of death" we called them, and veritably they were.

Before a charge Tommy is the politest of men. There is never any pushing or crowding to be first up these ladders. We crouched around the base of the ladders waiting for the word to go over. I was sick and faint, and was puffing away at an unlighted fag. Then came the word, "Three minutes to go; upon the lifting of the barrage and on the blast of the whistles, 'Over the top with the best o' luck and give them hell." The famous phrase of the western front. The Jonah phrase of the western front. To Tommy it means if you are lucky enough to come back you will be minus an arm or a leg. Tommy hates to be wished the best of luck; so, when peace is de-

free it." In my present situation this was the logic, but for the life of me I could not remember how he had told me to get my bayonet into the German. To me this was the paramount issue. I closed my eyes and lunged forward. My rifle was torn from my hands. I must have gotten the German because he had disappeared. About twenty feet to my left front was a huge Prussian nearly six feet four inches in height, a fine specimen of physical manhood. The bayonet

from his rifle was missing, but he clutched the barrel in both hands and was swinging the butt around his head. I could almost hear the swish of the butt passing through the air. Three little Tommies were engaged with him. They looked like pigmies alongside of the Prussian. The Tommy on the left

was gradually circling to the rear of his opponent. It was a funny sight to see them duck the swinging butt and try to jab him at the same time. The Tommy nearest me received the butt of the German's rifle in a smashing blow below the right temple. It smashed his head like an eggshell. He pitched forward on his side and a convulsive shudder ran through his body. Meanwhile the other Tommy had gained the rear of the Prussian. Suddenly about four inches of bayonet protruded from the throat of the Prussian soldier, who staggered forward and fell. I will never forget the look of blank astonishment that came over his face.

Then something hit me in the left shoulder and my left side went numb. It felt as if a hot poker was being driven through me. I felt no painjust a sort of nervous shock. A bayonet had pierced me from the rear. I fell backward on the ground, but was

not unconscious, because I could see dim objects moving around me. Then a flash of light in front of my eyes and unconsciousness. Something had hit me on the head. I have never found out what it was.

I dreamed I was being tossed about in an open boat on a heaving sea and opened my eyes. The moon was shining. I was on a stretcher being carried down one of our communication trenches. At the advanced first-aid post my wounds were dressed, and then I was put into an ambulance and sent to one of the base hospitals. The, wounds in my shoulder and head were not serious and in six weeks I had rejoined my company for service in the front line.

CHAPTER XII.

Bombing. The boys in the section welcomed me

back, but there were many strange Tommy on the street, just wish him the faces. Several of our men had gone best of luck and duck the brick that West in that charge, and were lying "somewhere in France" with a little in a war-time sandwich.

Previously an order had been issued for all ranks to save empty jam tins for the manufacture of bombs. A professor of bombing would sit on the fire step in the front trench with the remainder of his section crowding around to see him work.

On his left would be a pile of empty and rusty jam tins, while beside him on the fire step would be a miscellaneous assortment of material used in the manufacture of the "jam tins."

Tommy would stoop down, get an empty "jam tin," take a handful of clayey mud from the parapet, and line the inside of the tin with this substance. Then he would reach over, pick up his detonator and explosive, and insert them in the tin, fuse protruding. On the fire step would be a pile of fragments of shell, shrapnel balls, bits of iron, nails, etc.-anything that was hard enough to send over to Fritz; he would scoop up a handful of this junk and put it in the bomb. Perhaps one of the platoon would ask him what he did this for, and he would explain that when the bomb exploded these bits would fly about and kill or wound any German hit by same; the questioner would immediately pull a button off his tunic and hand it to the bomb maker with, "Well, blame me, send this over as a souvenir," or another Tommy would volunteer an old rusty and broken jackknife; both would be accepted and inserted.

Then the professor would take another handful of mud and fill the tin, after which he would punch a hole in the lid of the tin and put it over the top of the bomb, the fuse sticking out. Then perhaps he would tightly wrap wire around the outside of the tin, and the bomb was ready to send over to Fritz with Tommy's compliments.

A piece of wood about four inches wide had been issued. This was to be strapped on the left forearm by means of two leather straps and was like the side of a match box; it was called a "striker." There was a tip like the head of a match on the fuse of the bomb. To ignite the fuse, you had to rub it on the "striker," just the same as striking a match. The fuse was timed to five seconds or longer. Some of the fuses issued in those days would burn down in a second or two, while others would "sizz" for a week before exploding. Back in Blighty the munition workers weren't quite up to snuff, the way they are now. If the fuse took a notion to burn too quickly they generally buried the bomb maker next day. So making bombs could not be called a "cushy" or safe job.

(Continued next week).

Incredible.

Gold is said to be so malleable that it can be beaten as thin as the ham
